TEMPLE KIDNEY TRANSPLANT PROGRAM

Our goal at the Temple Kidney Transplant Program is to offer the widest range of treatment options to patients with end-stage kidney disease, severe diabetes and the complications linked to both. Temple's years of experience gives us the opportunity to take on even the most difficult cases that are passed on by other centers.

Program Description

Our Navigating Through Transplant Symposium aims to provide valuable insights into topics in the continuum of care for patients who require a kidney transplant. With an emphasis on optimizing clinical management, patient education and support before and after kidney transplantation, as well as breaking down the many barriers to transplant that patients face.

The Impact of your Sponsorship

Your support allows Temple Kidney Transplant to bring evidence-based education to the transplant community at no cost. This translates into nurses, social workers, dietitians, dialysis center staff and other healthcare professionals having the tools to provide high quality care to patients before, during and after kidney transplantation. With the support of sponsor organizations, Temple has been able to continue to provide this important education free of charge to participants.

Levels of Sponsorship

Temple has a sponsorship level to fit every budget and offers a wide variety of promotional opportunities, both in person and as a part of digital and print marketing materials. Below you will find an outline of the 2026 sponsorship levels.
