A MESSAGE FROM OUR PRESIDENT

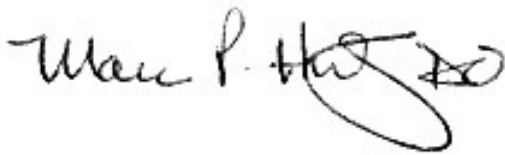

Thank you for your continued support of Jeanes Hospital and your interest in our 2019 Community Health Needs Assessment.

As a community hospital with a more-than-90-year history, Jeanes Hospital has evolved dramatically from its beginnings as a hospital established by its Quaker founder for “those with cancerous, nervous, and disabling ailments” to a provider today of high-acuity medical and surgical services. Our close alignment with an academic medical center, Temple University Hospital, helps to further strengthen our mission and growth by bringing additional resources and expertise to the excellence in care that we have long provided to our patients.

This report offers important insights into health-related issues facing the communities we serve, illuminates the potential for program enhancements and service offerings that we can implement, and reveals opportunities to create partnerships across our service area. The issues are great, but we recognize that strategy and support are critical to making progress. By joining with our partners and our community, we can align resources and make thoughtful decisions that will help improve the health of those who depend on us for their care.

Excellence in patient care can only happen with a willingness to listen to those who receive this care and the ability to grow along with their needs. We appreciate the opportunity to make a positive difference in the lives of our patients and their families as we share this report with you.

Sincerely,

Marc P. Hurowitz, DO, MBA, FAAFP
President and CEO
Jeanes Hospital

INTRODUCTION TO THE COMMUNITY HEALTH NEEDS ASSESSMENT

Jeanes Hospital is proud to present its 2019 Community Health Needs Assessment (CHNA). This report summarizes a comprehensive review and analysis of public health, socioeconomic, and other demographic data from our immediate service area, Philadelphia and Southeastern Pennsylvania. All data was reviewed and analyzed to determine the top health issues facing our immediate and surrounding communities.

This CHNA will assist our Hospital, as well as local and community organizations and social agencies, to identify community health priorities, develop interventions and determine how to effectively commit resources to improve the health of the neighborhoods we serve.

We offer special thanks to the many community-based organizations and over 350 citizens and stakeholders that participated in this assessment. We appreciate their time and valuable input throughout the CHNA process. We also thank our patients, their families and communities without which this assessment would not have been possible.

Thank You!

PARTICIPATING ORGANIZATIONS

Aldersgate Youth Services Bureau
 Anne T. Jeanes Foundation Board
 Berachah Church – Food Pantry
 Burholme Emergency Medical Services
 CORA Services, Inc.

ABOUT JEANES HOSPITAL

Located in Northeast Philadelphia, Jeanes Hospital opened in 1928 through a provision in the will of Anna T. Jeanes, a local Quaker philanthropist. The endowment she created provided funds to build a hospital for “those with cancerous, nervous, and disabling ailments” that would operate according to the Quaker philosophy of treating each patient compassionately, as a whole person.

In the years since its founding, Jeanes Hospital has evolved to become a thriving community hospital that provides a range of adult medical and surgical services. In 1996, the hospital joined Temple University Health System, further advancing its growth.

Our Vision

Meeting the physical, emotional, cultural, and spiritual needs of our community with a caring, safe, and supportive environment;

- Understanding and advocating for the needs of our community and meeting those needs with timely, cost effective, responsive services;
- Providing a healthy, creative, and rewarding work environment that attracts, retains, and develops the best staff, physicians, and volunteers; and
- Demonstrating leadership among community hospitals through continuous improvement, innovation, and investment of our people, technology, and facilities.

Our Services

Jeanes Hospital provides an extensive range of medical, surgical, and emergency services for residents of Northeast Philadelphia and Eastern Montgomery County. The hospital combines the comfort and convenience associated with most community hospitals together with the resources of a downtown academic medical center. Key clinical services include:

- High-acuity surgical services – neurosurgery, vascular surgery, joint replacement surgery, spine surgery, weight-loss surgery, minimally invasive general surgery, head and neck surgery, gynecologic surgery, and urologic surgery;
- Medical services – emergency medicine, intensive care, primary stroke center, primary care, orthopedics, gastroenterology, nephrology, endocrinology, Temple Heart and Vascular Institute, Temple Head and Neck Institute, and Temple Neurosciences Center;
- Procedures and tests – cardiac catheterization, electrophysiology, stress echocardiogram, diagnostic imaging, MRI scan, CT scan, interventional radiology, digital mammography, endoscopy, and pain management.

Jeanes Hospital aligns its population health efforts closely with its affiliated Temple Center for Population Health, LLC (TCPH). Established in 2014, the TCPH promotes and supports the population health efforts of our communities. Efforts are aligned with the goals of the U.S. Department of Health and Human Services’ three-part aim of achieving better care for patients, better health for our communities, and lower costs through healthcare system improvement.

MISSION STATEMENT

To maintain and enhance the quality of life for individuals in the communities we serve. The hospital emphasizes the Quaker belief that in each person there resides a spirit that creates a common bond among us all.

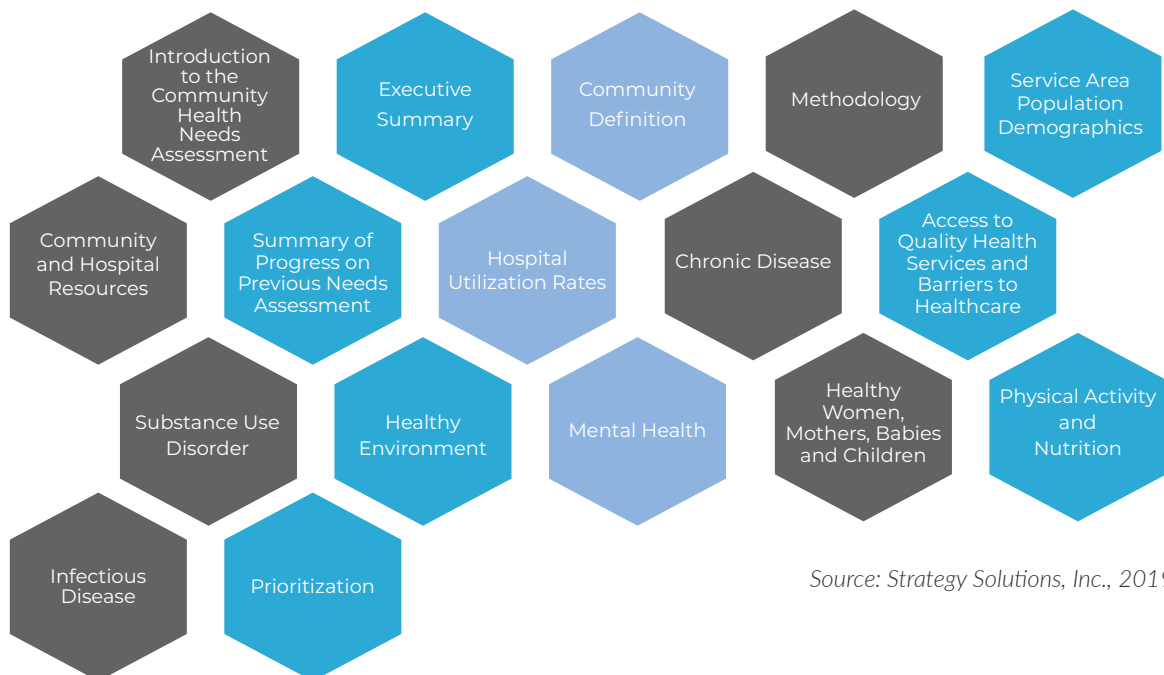

EXECUTIVE SUMMARY

A Community Health Needs Assessment (CHNA) helps gauge the health status of a community and guides development and implementation of strategies to improve a community’s health. The CHNA process also promotes collaboration among local agencies and provides data to evaluate outcomes and the impact of population health efforts.

The 2019 Jeanes Hospital CHNA process was facilitated by Strategy Solutions, Inc., a planning and research firm with a mission to create healthy communities. The CHNA process followed best practices outlined by the Association for Community Health Improvement and met all Internal Revenue Service (IRS) requirements for nonprofit hospitals.

The process was conducted to identify the primary health issues, current health status, and health needs of residents living in the Hospital’s service area. The results enable our Hospital and greater community to establish priorities, develop interventions, and direct resources to improve the health of our surrounding community. This CHNA includes the components that are outlined in **Figure 1** below.

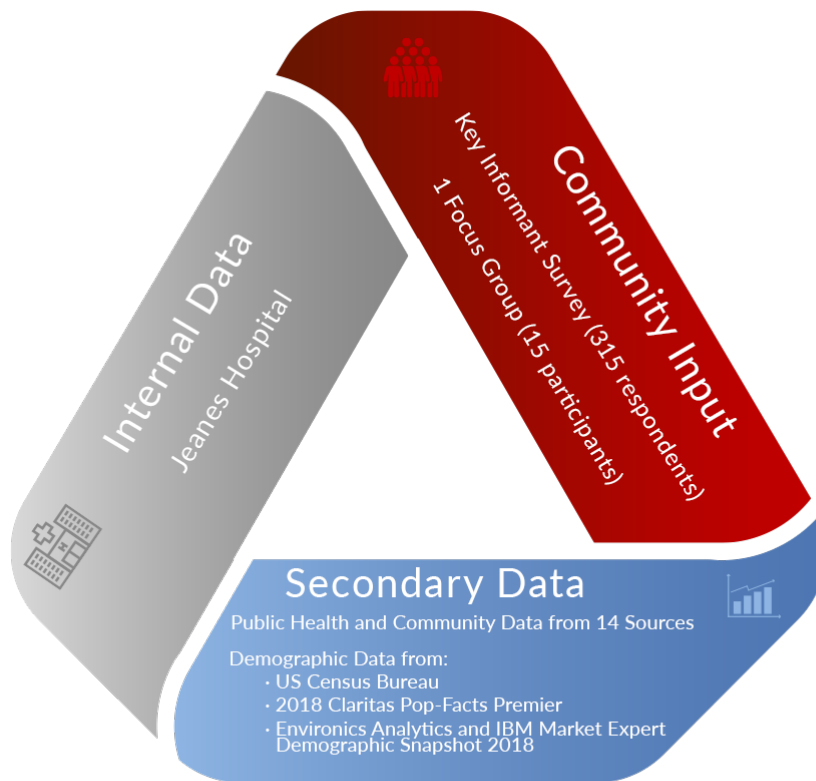

Figure 1: CHNA Components

Source: Strategy Solutions, Inc., 2019

To support this assessment, numerous qualitative and quantitative data sources were used to validate findings using the triangulation method outlined in **Figure 2**.

Figure 2: Data Triangulation

Source: Strategy Solutions, Inc., 2019

The CHNA used City, County, and State Departments of Health data compiled from the most up-to-date, publicly available resources along with Healthy People 2020 benchmarks and The Robert Wood Johnson Foundation's County Health Rankings. This information provided a framework for this CHNA as well as primary research conducted to collect input from community residents, providers and stakeholders.

Zip code level demographic and socio-economic data for Jeanees Hospital's service area was collected from the U.S. Census Bureau (obtained through Environics Analytics and IBM Market Expert), the American Community Survey as well as the U.S. Bureau of Labor Statistics.

In compliance with patient privacy laws, aggregate Jeanees Hospital utilization data was included from patient records. The indicators included in Jeanees Hospital's 2019 CHNA can be found in Appendix A of this report.

Jeanes Hospital collected a total of 315 Key Informant Surveys and conducted a Focus Group with 15 provider and community representative participants on December 3, 2018.

On March 7, 2019, the Jeanes Hospital Steering Committee met to review primary and secondary data collected and discussed the health needs and issues present across the Hospital's service area. During this meeting, 28 needs and issues were identified based on health, social, economic and other health disparities found in the data (differences in sub-populations, comparison to state, national or Healthy People 2020 goals, negative trends, or growing incidence).

Between March 18 and 21, 2019, 14 members of the Steering Committee completed a prioritization exercise using an online survey tool to rate all identified needs on a 1 to 10 scale for each of the selected criteria below:

- **Magnitude of the Problem** - The degree to which the problem leads to death, disability, or impaired quality of life and/or could be an epidemic based on the rate or percentage of the population that is impacted by the issue.
- **Impact on Other Health Outcomes** - The extent to which the issue impacts health outcomes and/or is a driver of other conditions.
- **Capacity** - The extent to which systems and resources are in place or available to implement evidence-based solutions.

Following the Steering Committee's completion of the prioritization exercise, SSI staff analyzed all response scores and ranked the results based on the overall composite score (highest to lowest) calculated by summing scores for each of the three criteria described above.

On April 12, 2019, members of the Hospital's Steering Committee met to discuss the prioritization results and identified four (4) priority areas to focus on as a Hospital in order to address immediate community health issues and care needs:

1. Chronic disease rates;
2. Access to healthcare;
3. Mental health access and education; and
4. Substance use disorder treatment and education.

These four priority areas are in line with the priority areas identified during the Hospital's 2016 CHNA and the implementation strategies and programs that have been implemented since then.

REVIEW AND APPROVAL

The Jeanes Hospital Board of Directors approved the Hospital's CHNA on May 16, 2019.

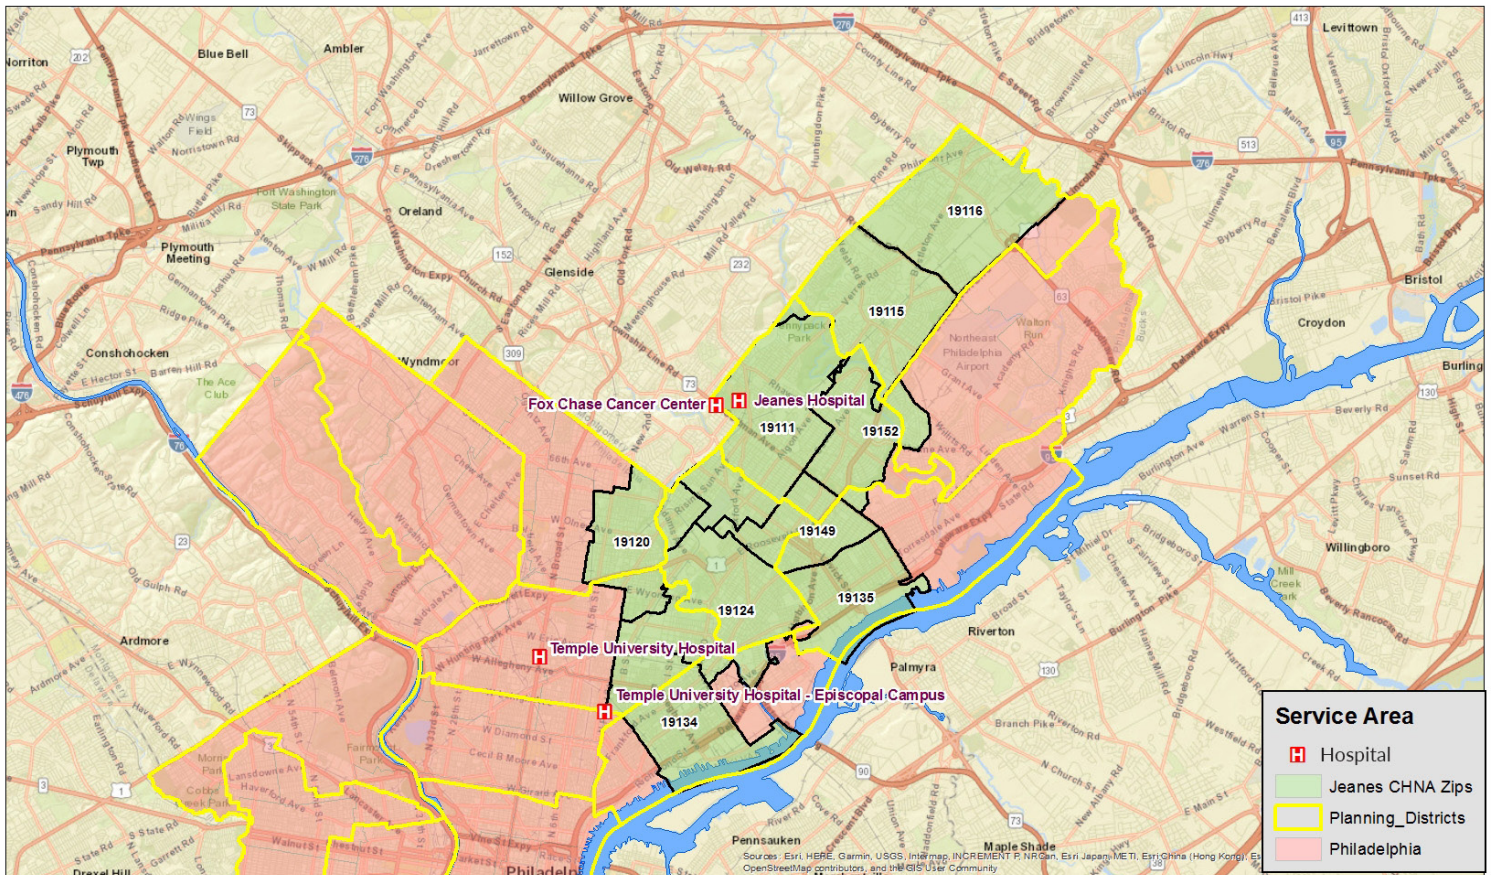

COMMUNITY DEFINITION

In compliance with the IRS guidelines at the time of data collection for this assessment, Jeanes Hospital defined its immediate service area as nine (9) zip codes in Philadelphia County: 19111; 19115; 19116; 19120; 19124; 19134; 19135; 19149; and 19152. These are the zip codes from which about 70% of patients seen on an inpatient and observation basis reside as illustrated in Figure 3. These zip codes roughly correspond to the City of Philadelphia’s Lower Northeast, Central Northeast and North Delaware Planning Districts as set forth in the City of Philadelphia Department of Public Health’s 2017 Community Health Assessment for Philadelphia, PA.

METHODOLOGY

Jeanes Hospital contracted the services of SSI to assist the Hospital with the 2019 CHNA. SSI, a planning and research firm with a mission to create healthy communities, facilitated this process following best practices outlined by the Association for Community Health Improvement, an affiliate of the American Hospital Association. The CHNA complies with the Internal Revenue Service’s (IRS) guidelines (IRS Notice 2011-52) for charitable 501(c) (3) tax-exempt hospitals published in December 2014 and includes input from individuals representing the broad interests of the communities served by Jeanes Hospital, including those with direct knowledge of the needs of the medically underserved, and populations suffering from chronic diseases.

Throughout the nine (9) months beginning in August 2018, SSI worked closely with Jeanes Hospital to identify and collect primary and secondary data, analyze results and to complete the Hospital’s needs assessment. **Figure 4** is a summary of Jeanes Hospital 2019 CHNA methodology.

Figure 4: Jeanes Hospital 2018-2019 CHNA Methodology Summary

Source: 2019 Strategy Solutions, Inc.

DATA COLLECTION

In an effort to examine the health-related needs of the residents of Jeanes Hospital's service area and to meet current IRS requirements, the study methodology employed both qualitative and quantitative data collection and analysis methods. The Hospital and its consulting team made significant efforts to ensure the entire service area, all socio-demographic groups and all potential needs, issues and underrepresented populations were considered to the extent possible. This was accomplished by organizing Focus Groups and identifying key stakeholders that represented various subgroups in the community described in detail below. In addition, the process included extensive use of data from the Philadelphia Public Department of Health, Pennsylvania Department of Health and U.S. Centers for Disease Control and Prevention.

To guide this assessment, the Temple University Health System formed a Steering Committee consisting of 15 Hospital leaders experienced with serving the surrounding community. The Steering Committee included representatives from the System as well as each individual Hospital. The System selected these representatives because of their direct knowledge on the needs and issues faced by underrepresented groups within the Hospital's service area, including medically underserved populations and low-income individuals, minority groups and those with chronic diseases. The Committee met bi-weekly between August 2018 and April 2019, with two of these meetings held in person on September 21, 2018 and March 8, 2019. All other meetings were held via teleconference. These Committee meetings were conducted to provide guidance on various components of the CHNA

The secondary quantitative data collection process included:

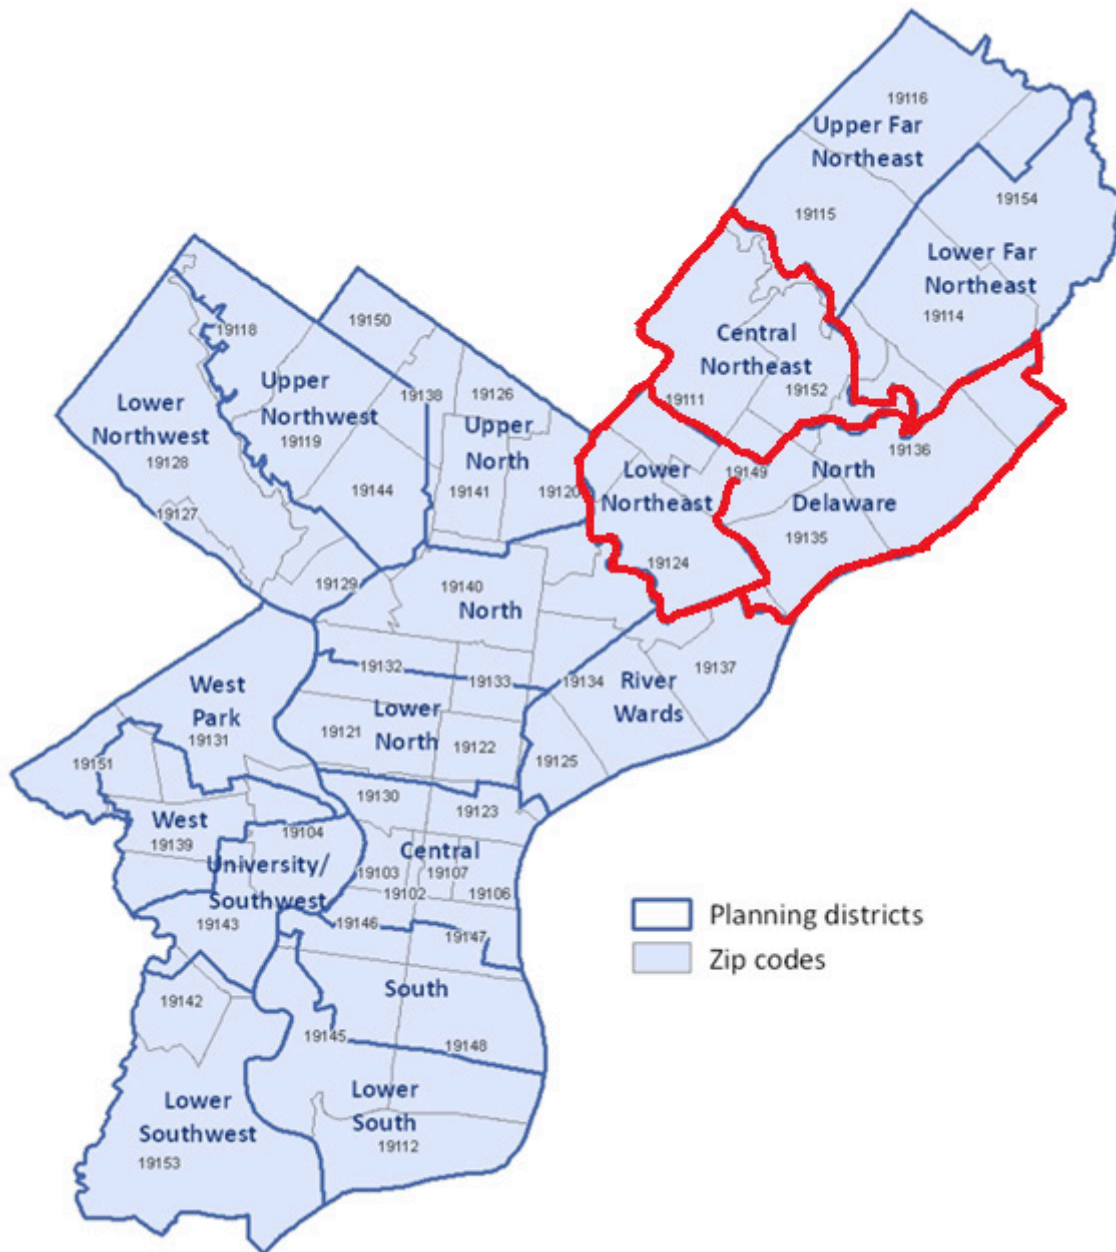

- Demographic and socio-economic data from the United States Census Bureau obtained through Claritas-Pop-Facts Premier, 2018, Environics Analytics and IBM Market Expert Demographic Snapshot 2018, from the Claritas Company Projections of the U.S. Census, 2010 Census;
- Disease incidence and prevalence data obtained from the Pennsylvania Departments of Health and Vital Statistics as well as the City of Philadelphia Department of Health;
- Behavioral Risk Factor Surveillance Survey (BRFSS) data collected by the Centers for Disease Control and Prevention;
- American Community Survey; and
- Healthy People 2020 goals from HealthyPeople.gov.

In addition, various health and health related data from the following sources were utilized:

- Pennsylvania Department of Education;
- County Health Rankings and Roadmaps ;
- Philadelphia County 2017 PA Youth Survey and the National Survey Results on Drug Abuse - 1975-2013;
- Emergency Department and inpatient utilization data from the Hospital was also included; and
- Economic data was obtained through the United States Census Bureau.

The City of Philadelphia Department of Public Health's 2017 Philadelphia Health Needs Assessment provides public health data for 18 different planning districts across the City. These districts represent distinct neighborhoods facing different health, economic, social and other challenges. Throughout this CHNA, where available, public health data is reported for the districts that largely overlay with TUH's service area, which include the City's North, Lower North and River Wards Districts. These districts are outlined below in red in **Figure 5**.

Figure 5: Philadelphia Department of Health Planning Districts

Source: Department of Public Health, City of Philadelphia

Data presented throughout the CHNA is the most recent published by the source at the time of the data collection. Significant differences are noted for data only where the source published differences based on statistical significance testing.

HOSPITAL UTILIZATION DATA

In accordance with patient privacy laws, aggregate Jeanes Hospital utilization data was included from patient records. This utilization data was reported by age (adults age 18 years and older and youth under 18 years of age) and was based on:

- Emergency department discharges for ambulatory care sensitive conditions;
- Emergency department and inpatient psychiatric admissions; and
- Preventable hospitalizations.

FOCUS GROUPS

The Steering Committee identified numerous community stakeholders that represent target populations served by the Hospital within its immediate service area. Jeanes Hospital staff and SSI developed a Focus Group facilitation guide to capture community input and feedback on community health status and health needs, access to services and potential solutions. Jeanes Hospital staff scheduled the Focus Group session and invited community stakeholders. SSI staff facilitated the Focus Group and took notes. For the 2019 CHNA, one Focus Group was conducted on December 3, 2018 with 15 representatives from key community organizations. *See Appendix B Focus Group Topic Guide used for this assessment.*

KEY INFORMANT SURVEY

The Steering Committee identified key stakeholders in the community to receive a Key Informant Survey. SSI and the Hospital staff developed the survey instrument. This survey was used to obtain vital information about the community from the social and health services providers serving them. SSI created an electronic survey and link, which Jeanes Hospital sent out to the identified key informants and all Hospital staff. The survey was active from December 11, 2018 to January 24, 2019. A total of 315 individuals completed the survey. *See Appendix C for the Key Informant Survey used for this assessment.* **Table 1** below outlines the community affiliation of the respondents.

Table 1: Key Informant Survey Respondent Primary Community Affiliation

Community Affiliation	Number
Non-Profit/Social Service Organization	10
Health Care/Public Health Organization	53
Education/Youth Services	1
Community Member	21
Business Sector	1
Government/Housing/Transportation Sector	0
Mental/Behavioral Health Organization	1
Faith-Based Organization	8
Cultural Organization	0
Jeanes Hospital Staff/Employee	224
Other	14

DATA LIMITATIONS

The primary and secondary data collected for this assessment includes several limitations. Much of the secondary data is from the County level and is not specific to the Hospital's service area due to geographic limitations of currently available data. In addition, researchers were limited to the collection of the most recent publicly available data sources of which many are two (2) or more years old. All primary data is also qualitative and does not necessarily reflect a representative sample of the service area since it was collected through convenience sampling.

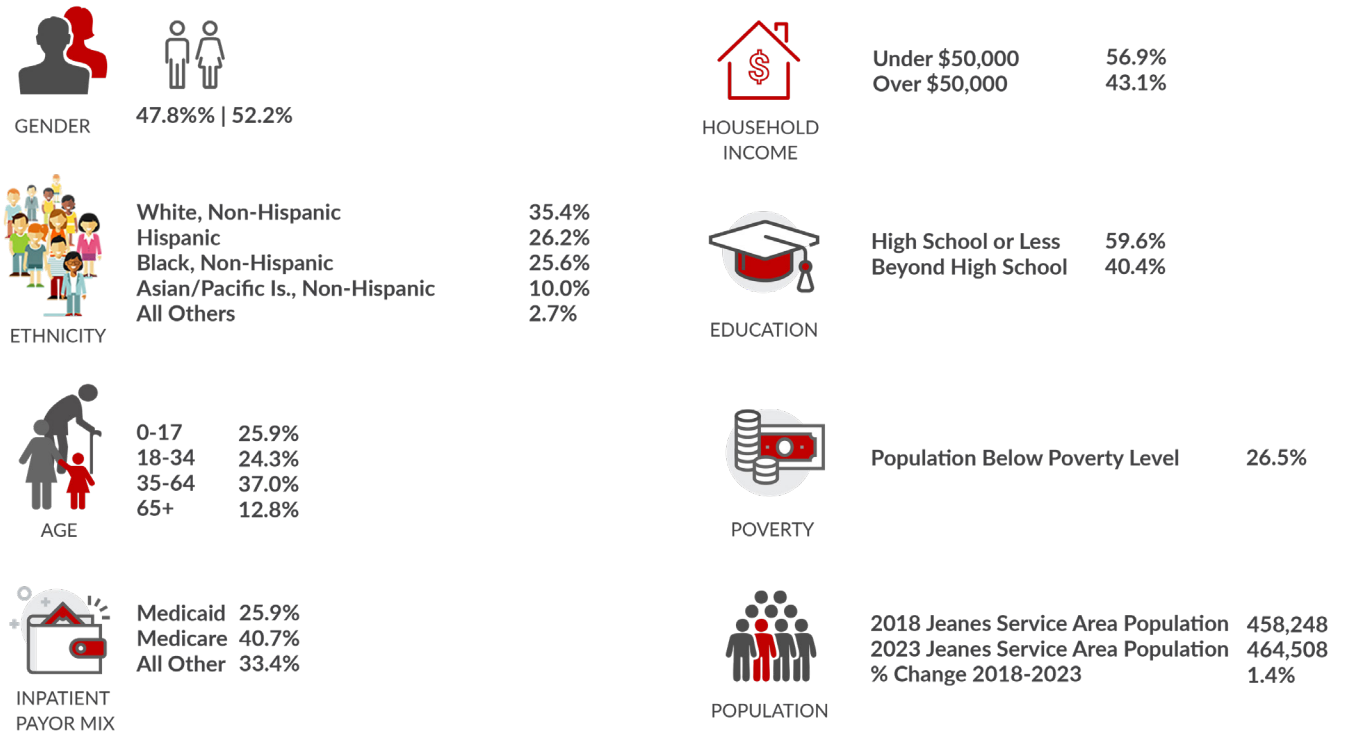

FEEDBACK FROM PREVIOUS JEANES HOSPITAL CHNA REPORT

Jeanes Hospital welcomes questions and comments on its CHNAs through a link provided on its Community Health webpage under contact us ([click here](#)). No substantive comments have been received through this site since the 2016 CHNA report was published.

DEMOGRAPHICS

Residents of Jeanes Hospital’s immediate service area experience many social and economic challenges as demonstrated by the demographic data described below in **Figure 6**.

Figure 6: Jeanes Hospital Service Area Demographic Profile

Sources:

Gender: Claritas - Pop-Facts Premier 2018, Environics Analytics

Ethnicity, Age, Household Income, Education, and Population: IBM Market Expert Demographic Snapshot 2018, from The Claritas Company projections of the U.S. Census, 2010

Inpatient Payor Mix: IBM Market Expert, State Inpatients Area Based Analysis, [CY2017]

Over the next five year period, the Jeanes Hospital’s community as defined in this report is expected to grow by about 1.4% (458,248 to 464,508) which is slightly below the City of Philadelphia’s expected growth rate (1.5%).¹ Jeanes Hospital’s community has slightly more females (52.2%) than males (47.8%).² The population is also predominantly non-White and the percentage of the population that is White (35.4%) is also less than half of the State (76.2%) rate. The percentage of Black residents (25.6%) is more than twice as high as the State (10.8%).³ In the service area, there is also a much higher Hispanic (26.2%) and Asian (10.0%) population when compared to the State.⁴ Throughout the report, indicators that identify Non-Hispanic White, Non-Hispanic Black and/or Non-Hispanic Asian will be referred to as White, Black and Asian respectively.

The percentage of residents living in Jeanes Hospital’s’ community with an education beyond high school (40.4%) is lower than Pennsylvania (53.6%), as well as the Nation (59.4%).⁵ In the service area, 26.5% of the families have incomes below the federal poverty level and 56.9% of households have incomes under \$50,000. The percentage of families living in poverty is almost double that of Pennsylvania (13.3%) and much higher than the Nation (15.1%).⁶

Table 2 lists the poverty range and unemployment rate for Jeanes Hospital’s service area zip codes. There are four zip codes with over 20% poverty, all of these are also experiencing unemployment at a rate of 10% or higher.

Table 2: Jeanes Hospital Poverty and Unemployment Demographics

Zip Code	City	Poverty Range	Unemployment Rate
19149	Philadelphia	>20%	10.9%
19124	Philadelphia	>20%	16.0%
19120	Philadelphia	>20%	15.4%
19134	Philadelphia	>20%	19.1%
19116	Philadelphia	15.01% - 20.00%	6.4%
19152	Philadelphia	15.01% - 20.00%	7.5%
19115	Philadelphia	15.01% - 20.00%	6.3%
19111	Philadelphia	15.01% - 20.00%	10.5%
19135	Philadelphia	15.01% - 20.00%	11.8%

Poverty Rate as of 11/15/18: 2012-2016 American Community Survey

Unemployment Rate as of 11/15/18: U.S. Census Bureau, Census 2010 Summary File 1

COMMUNITY & HOSPITAL RESOURCES

Existing health and social services in the service area, and for Southeastern Pennsylvania as a whole, were collected for this report. Information on social services was obtained through the United Way 2-1-1 in Southeastern Pennsylvania and from the Yellow Pages Internet search. Existing Hospital and Health System resources can be found in *Appendix D, Hospital Resource Listing*. The community-based health care and social service resources can be found in *Appendix E, Community Resource Listing*.

SUMMARY OF PROGRESS ON 2016 CHNA IMPLEMENTATION STRATEGY

Figure 7 below lists the major health priorities Jeanes Hospital identified in their 2016 CHNA and decided to concentrate on over three (3) years ending June 30, 2019.

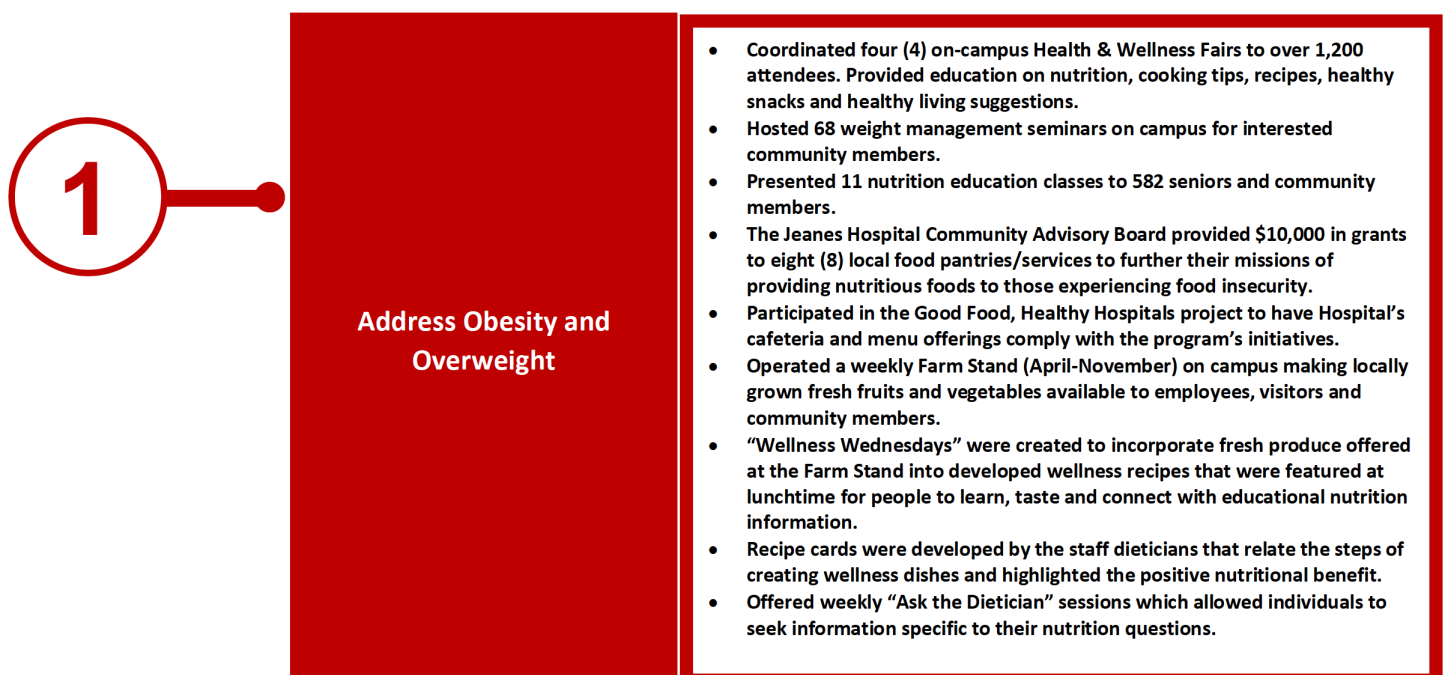

Figure 7: Jeanes Hospital 2016 CHNA Identified Health Priorities

Source: Jeanes Hospital Evaluation of 2016 CHNA

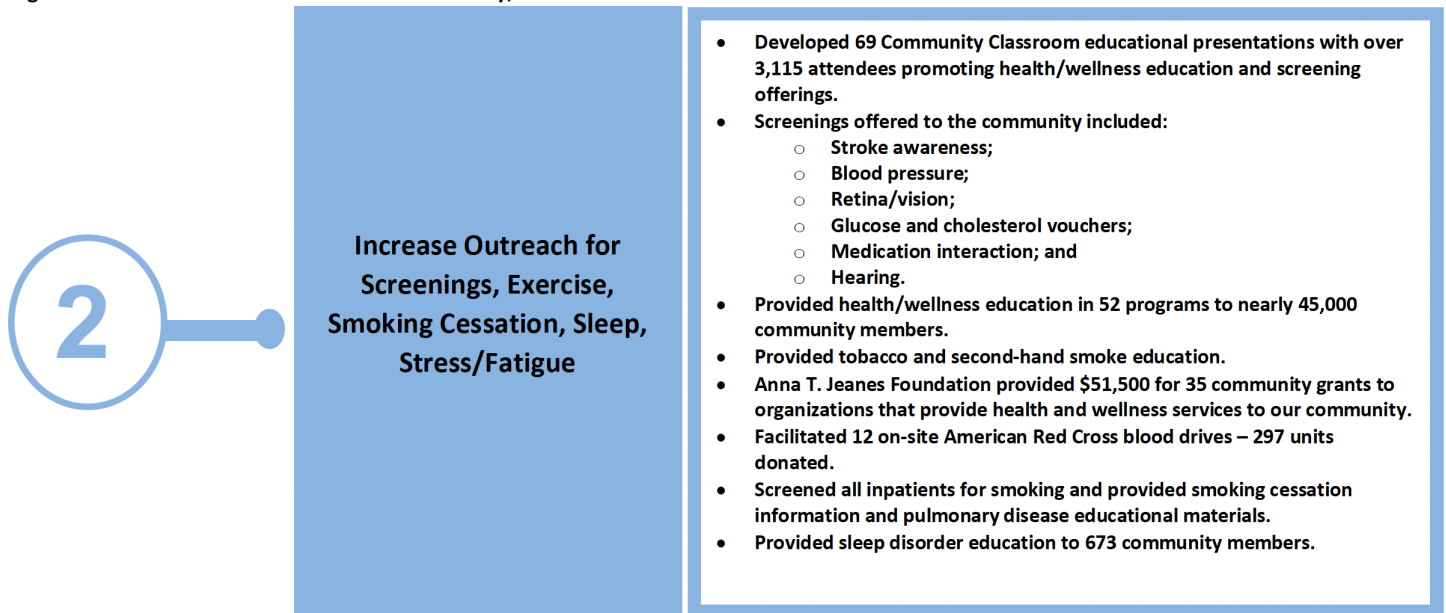

Figures 8, 9, 10, 11, and 12 below highlights the major accomplishments that the Hospital made in each of the five health priorities that were outlined in their 2016 CHNA implementation strategy action plan. Jeanes Hospital has created yearly implementation strategy updates on the progress made in each of the health priority areas. Please visit <https://www.templehealth.org/locations/jeanes-hospital/about/communityhealth/implementation-strategy-updates> to access these updates.

HOSPITAL UTILIZATION DATA FOR AMBULATORY CARE SENSITIVE CONDITIONS

Ambulatory care sensitive conditions are health conditions for which Hospital admission could be prevented by interventions in primary care. Reducing avoidable hospitalizations provides opportunities for reducing health care spending and improving quality of care and quality of life. Avoidable hospitalizations are associated with high and rising costs, and they disrupt elective health care planning and affect patients' daily life. Hospitalizations for ambulatory care sensitive conditions are potentially avoidable by preventing the onset of disease, controlling an acute episodic illness, or managing a chronic condition effectively. Since data is available only for half of the most recent year (2018), changes in utilization are calculated for years 2016 to 2017.

This utilization data was analyzed based on emergency room and inpatient visits, broken out by Adults age 18 years and older and youth under 18 years by the following areas:

- Ambulatory care sensitive conditions – inpatient admissions;
- Mental health and substance abuse conditions, both inpatient and emergency room;
- Ambulatory care sensitive conditions – Emergency Department only; and
- Acute dental conditions.

The main takeaways from each of the areas are described below. Detailed tables are located in Appendix F.

The largest increases for inpatient admissions for ambulatory care sensitive conditions include:

- ↑ Alcohol & Drug Abuse 59%;
- ↑ Behavioral Health 52%;
- ↑ Cancer 21%;
- ↑ Hypertension 44%; and
- ↑ Reproductive Disorder 150.

The largest increases for mental health conditions treated in the Emergency Department include:

- ↑ Anxiety 2%;
- ↑ Bi-Polar 17%; and
- ↑ Depression 11%.

The largest increases for mental health conditions treated in the inpatient setting include:

- ↑ Anxiety 50%; and
- ↑ Paranoia/Psychosis 200%.

The largest increases in ambulatory care sensitive conditions in the in the Emergency Department include:

- ↑ Cellulitis of unspecified toe 100%;
- ↑ Acute pharyngitis, unspecified 170%;
- ↑ Acute upper respiratory infection, unspecified 55%;
- ↑ Cellulitis of trunk, unspecified 100%;
- ↑ Cellulitis of unspecified part of limb 14%;
- ↑ Female pelvic inflammatory disease, unspecified 16%;
- ↑ Other local infections of the skin and subcutaneous tissue 100%;
- ↑ Simple febrile convulsions 300%;
- ↑ Suppurative otitis media, unspecified, unspecified ear 200%;
- ↑ Unspecified convulsions 20%; and
- ↑ Urinary tract infection, site not specified 6%.

The largest increases in acute dental conditions include:

- ↑ Dental caries, unspecified 46%;
- ↑ Diseases of lips 100%;
- ↑ Other lesions of oral mucosa 77%;
- ↑ Other oral mucositis (ulcerative) 33%;
- ↑ Periapical abscess with sinus 50%; and
- ↑ Periapical abscess without sinus 22%.

GENERAL FINDINGS

Based on an analysis of primary and secondary data, the following community health needs and issues were examined:

- Chronic Disease;
- Access to Quality Health Services and Barriers to Healthcare;
- Substance Use Disorder/Tobacco Use;
- Mental Health;
- Healthy Environment;
- Healthy Women, Mothers, Babies and Children;
- Physical Activity and Nutrition; and
- Infectious Disease.

Each of the above topics are discussed in more detail on the pages that follow. Each topic is broken down into the following sections:

- *What the Community is Saying*, which reflects input from participants in the primary data collection;
- *Opportunities for Improvement*, which were determined based on the identification of negative trends over time and/or through a comparison of local secondary data to State and national data as well as the Healthy People 2020 benchmarks and/or where significant disparities exist even if data has improved in recent years; and
- *Areas of Improvement*, which were included based on the identification of positive trends over time and/or through a comparison of local secondary data to the State and national data as well as the Healthy People 2020 benchmarks.⁹

A full listing of all secondary indicators can be found in *Appendix A*.

CHRONIC DISEASE

Health conditions that are long-lasting, in remission, relapse and have continued persistence over time are categorized as chronic diseases. Secondary, Focus Group and Key Informant Survey data revealed the following as needs and issues related to chronic disease:

- Diabetes;
- Overweight/obesity;
- Heart disease;
- Cancer;
- Stroke;
- Patient education related to chronic diseases;
- Lack of access to preventative care information; and
- Lack of early detection.

WHAT THE COMMUNITY IS SAYING

Key Informant Survey respondents identified lack of early detection steps taken was one of the top community issues because patients often present with end-stage symptoms. Respondents also discussed the Hospital's aging population, which includes many seniors that have multiple chronic diseases and struggle with maintaining their health.

Focus Group participants identified lack of widespread information on the impact of chronic diseases on the body as a key community need. Lack of education on the use of the medical equipment for treating chronic diseases, how to avoid hospitalization and how to prevent the escalation of chronic diseases were also identified.

In addition, Barriers to care identified related to chronic diseases included:

- Navigating the system;
- Lack of providers and limited availability of services;
- Lack of income;
- High co-pays; and
- Lack of insurance coverage.

Figure 13 shows the top four most frequently mentioned needed services to address these issues identified by Key Informant Survey respondents and Focus Group participants.

Figure 13: Key Informant Survey and Focus Group Respondents: Top Four Needed Services Related to Chronic Disease

Source: 2018 Jeanes Hospital Focus Group, Strategy Solutions, Inc.
Source: 2019 Key Informant Survey, Strategy Solutions, Inc.

Additional needed services identified by primary research participants related to chronic diseases included:

- CPR and first aid training;
- Early intervention training on warning signs of chronic diseases;
- Training on disease processes;
- Refocus on improving all around health of patients;
- Improve follow-up process to be more accessible through technology;
- Provide free follow-up appointments/screenings; and
- Increased advocacy for preventative care.

OPPORTUNITIES FOR IMPROVEMENT

HEART

While the percentage of Adults age 35 and older who have ever been told they had a heart attack in Philadelphia County has remained fairly consistent and in 2015-2017 (7.0%) was comparable to the State (7.0%), the percentage was almost double that of the nation (4.4%).¹⁰

Although the Heart Disease mortality rate has decreased in Philadelphia County in 2016 (215.8), it remains significantly higher than the State (175.8).¹¹

Despite decreasing from 2011 (155.2) to 2016 (146.3), the Coronary Heart Disease mortality rate per 100,000 in Philadelphia County in 2016 was also significantly higher than the State (107.6), and the Nation (126.2). It was also well above the Healthy People 2020 Goal (103.4).¹²

The Cardiovascular mortality rate per 100,000 in Philadelphia County also decreased from 2011 (289.7) to 2016 (274.1) but remains significantly higher than the State (225.8).¹³

The Heart Disease (215.8) and Cardiovascular (274.1) mortality rates in Philadelphia County are also significantly higher than the State rates (175.8 and 225.8 respectively).¹⁴

The overall Premature (under age 65) Cardiovascular Disease Mortality rate for the City of Philadelphia was 60.6, while the rate among Black residents was 78.5 (2014). The City's Lower Northeast District (69.8) is higher than the City of Philadelphia rate overall, while North Delaware (56.9) and Central Northeast (45.6) Districts are lower.¹⁵

The percentage of Adults who have been told that they have Hypertension has increased over the past fifteen years from 31.3% in 2000 to 38.2% in 2014/15 for the City of Philadelphia. The percentage is higher for Black residents of the City (48.0%), while the City's Lower Northeast (35.3%) Central Northeast (33.9%) and North Delaware (37%) Districts were lower than the City Overall.¹⁶

STROKE

The Cerebrovascular mortality rate in 2016 for Philadelphia County (42.1) was significantly higher than the State rate (36.8) even though the rate has decreased since 2011 (49.1).¹⁷

CANCER

The incidence rate for All Cancers in Philadelphia County has increased from 492.3 in 2011 to 542.7 in 2016. The County rate is significantly higher than the State rate (474.1). The mortality rate for All Cancers in Philadelphia County has decreased from 215.7 in 2011 to 192.8 in 2016 but is still significantly higher than the State (158.7).¹⁸ The rate is also higher than both the US rate (158.7)¹⁹ and the Healthy People 2020 goal (161.4).²⁰

The incidence rate for All Cancers in the City of Philadelphia in 2016 was 492.3, significantly higher than the State rate (474.1).²¹ The Cancer Mortality (All Causes) was significantly higher in the City of Philadelphia (192.8) for all races than the State (164.0).²² The rate among the Black population (214.5) was significantly higher than the State rate (198.7).²³ The City's North Delaware (215.5) and Lower Northeast (205.8) Districts are higher than the City overall, while the Central Northeast (165.9) is lower than the City overall.²⁴

Although the percentage of Adults in Philadelphia County reporting being a current smoker decreased from 25.0% in 2011-2013, to 22.0% in 2015-2017, the percentage was still significantly higher than the State (18.0%).²⁵ While the Bronchus and Lung Cancer incidence rate per 100,000 in Philadelphia County has decreased from 2011 (81.5) to 2015 (75.8) the rate in 2015 was significantly higher when compared to the State (63.2) and the latest available U.S. rate in 2014 (50.8).²⁶

"I have seen an increase in obesity, heart disease and substance abuse in the 37 year that I have worked in this hospital."

~ Key Informant Survey Respondent

The Bronchus and Lung Cancer mortality rate for 2016 (50.9), although decreasing since 2011 (58.3), was still significantly higher than the State (40.9).²⁷

The Colorectal Cancer incidence rate in 2015 in Philadelphia County (45.3) was significantly higher when compared to the State (41.9) and the Healthy People 2020 Goal (39.9),²⁸ even though the rate has decreased since 2011 (51.3).²⁹

The Colorectal Cancer mortality rate in 2016 (19.4) was also significantly higher than the State (14.7) and the Healthy People 2020 Goal (14.5).³⁰ The rate for Women (17.0) was also significantly higher than the State (12.2).³¹

The Prostate Cancer incidence rate for Philadelphia County in 2015 (136.3) was significantly higher than the State (104.4), although it has been decreasing since 2011 (179.8).³²

The Prostate Cancer mortality rate has decreased from 36.1 in 2011 to 30.7 in 2016. However, the rate was still significantly higher than the State (19.2).³³

Cancer of the Liver and Bile Ducts Mortality rate for All Races in Philadelphia County (11.5) was significantly higher than the State (6.5). The County also has significantly higher rates for Males (18.1 vs. 9.8), Females (6.6 vs. 3.6) and the White population (8.3 vs. 5.7).³⁴

DIABETES

The 2012-2015 three-year percentage for Diabetes Prevalence in the City's Lower Northeast (18.4%) and North Delaware (17.3%) Districts are higher than the City of Philadelphia (15.4%) as a whole, while the percentage in the Central Northeast District (10.8%) is lower than the City overall.³⁵ The Black (18.8%) percentage for Diabetes Prevalence is also higher than the City overall for the same time period.³⁶

ASTHMA

The age-adjusted rate of hospital discharges with a primary diagnosis of Asthma per 10,000 children 18 years and under for the City's Districts in Jeanes Hospital's service area is available by zip code. Zip code 19124 in the City's Lower Northeast District (104.1) was also almost double the City of Philadelphia rate (59.5). Zip code 19135 (60.0) in the North Delaware District is also higher than the City rate. Zip codes 19111 in the Central Northeast District (36.3), 19149 that crosses the North Delaware and Central Northeast Districts (57.8), 19136 in the North Delaware District (35.3), and 19152 in the Central Northeast District (23.1) are lower than the City rate.³⁷

AREAS OF IMPROVEMENT

In 2011, the Breast Cancer mortality rate in Philadelphia County was 30.5 and was significantly higher than the State rate (21.4) that year and for the next three years. In 2016, the County rate dropped to 23.8, becoming more comparable to the State rate.³⁸

The Diabetes Mortality rate in 2011 was 26.9 in Philadelphia County and was significantly higher than the State rate. By 2016, the rate dropped to 21.4 and became comparable to the State (20.2).³⁹

In 2011, the percentage of students with Asthma conditions was 17.9% and by 2016 dropped to 12.1%.⁴⁰ The age-adjusted rate of hospital discharges with a primary diagnosis of Asthma for children 18 years old and under for the City of Philadelphia in 2015 (59.5) shows a decreasing trend since 2011 (98.8).⁴¹

ACCESS TO QUALITY HEALTH CARE

Access to comprehensive, quality health care is important for the achievement of health equity and for increasing the quality of life for everyone in the community. In the Jeanes Hospital service area, there are many individuals who cannot access health care. Secondary, Focus Group and Key Informant Survey data show the following health care access needs and issues:

- Health care costs;
- Transportation;
- Health literacy;
- Health education;
- High co-pays and high deductibles;
- Availability of providers (number of providers, convenient hours, wait times to schedule an appointment);
- Knowing what services are available and how to access these services, including navigation;
- Financial resources;
- Safe and affordable housing; homelessness;
- Lack of trust in the health system; and
- Language and cultural accessibility.

WHAT THE COMMUNITY IS SAYING

Only 13.0% of Focus Group participants rated the health status of the community as Very Good while 53.0% rated it as good. Over a third (34.0%) rated the community's health as Fair or Poor as shown in **Figure 14**. When asked to explain the rating, participants noted access issues attributed to lack of insurance and high copays and deductibles. Participants also noted that many people were on fixed incomes and have to choose between food and medicine.

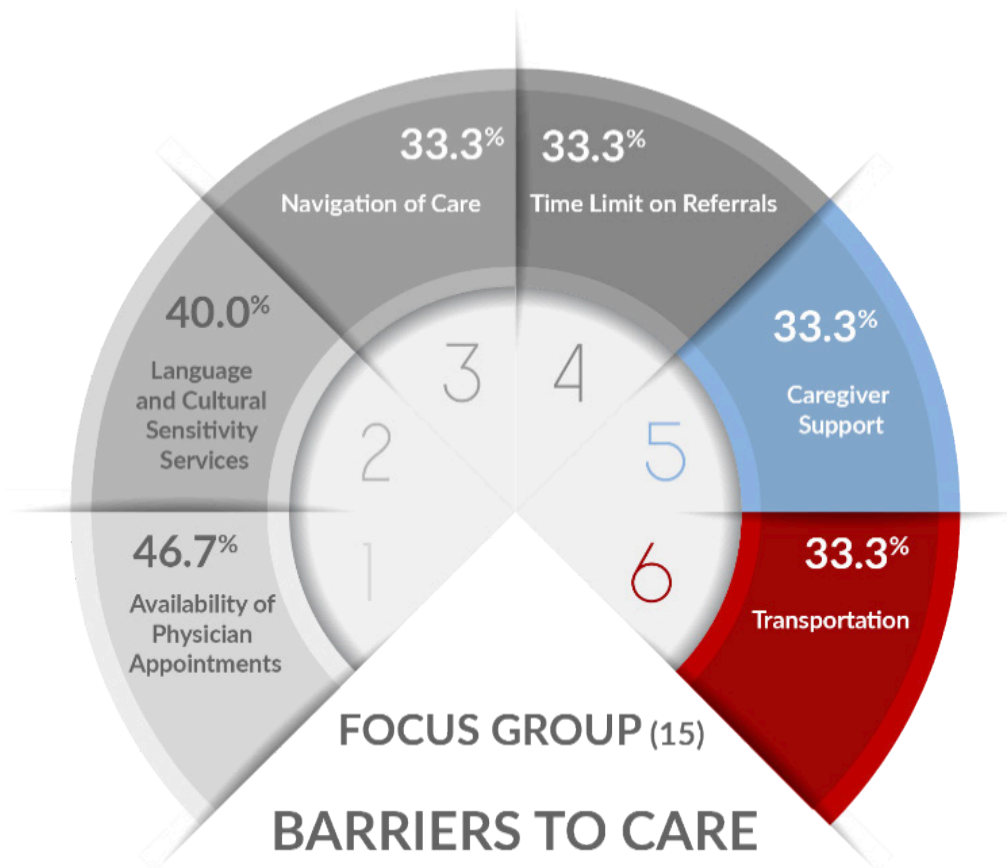

Figure 14: Focus Group Rating of Community Health Status

Source: 2018 Jeanes Hospital Focus Group, Strategy Solutions, Inc.

As shown in **Figure 15**, almost half (46.7%) of Focus Group participants indicated that Availability of Physician Appointments and Language and Cultural Sensitivity Services (40.0%) are a very serious problem in the community. A third of the participants (33.3%) rated Navigation of Care, Time Limit on Referrals, Caregiver Support and Transportation as very serious problems in the community.

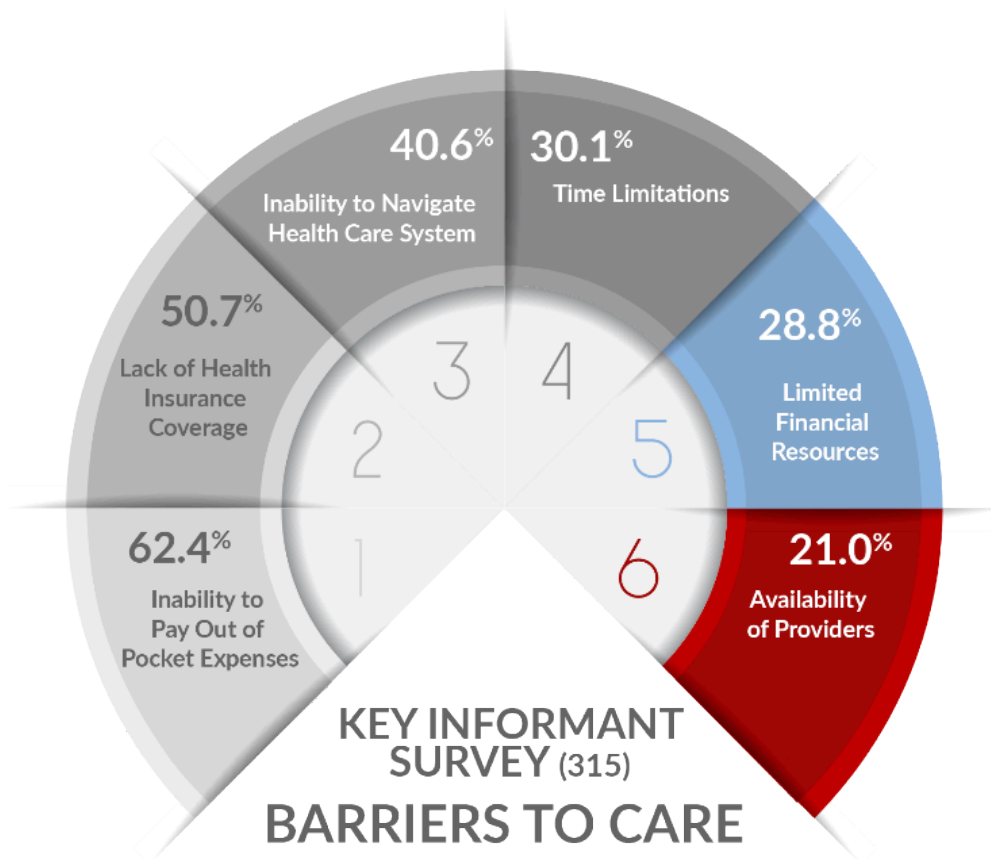

Figure 15: Focus Group Participants: Barriers to Care, N=15

Source: 2019 Focus Group, Strategy Solutions, Inc.

As shown in **Figure 16**, the majority (62.4%) of Key Informant Survey respondents identified inability to pay out of pocket expenses and half (50.7%) identified lack of insurance coverage as a barrier to care. Almost half (40.6%) also identified the inability to navigate the health care system as a barrier. Key Informant Survey respondents talked about the cost of care which includes medications, insurance, co-pays and deductibles. This group also stated that language and cultural barriers are often a barrier to care.

Figure 16: Key Informant Survey Participants: Barriers to Care, N=315

Source: 2018 Key Informant Survey, Strategy Solutions, Inc.

According to respondents of the Key Informant Survey, the top five (5) underserved populations include:

- Low Income/ Poor;
- Uninsured/ Underinsured;
- Homeless;
- Seniors/Aging/ Elderly; and
- Disabled.

Needed services identified by primary research participants related to access to care included:

- Counseling and advocacy services for seniors to assist with navigating health care services;
- Efforts to publicize the services in a way that can be understood by a diverse population;
- Arranged transportation to get to appointments;
- Health insurance counseling; and
- Communication resources for the elderly and immigrants.

OPPORTUNITIES FOR IMPROVEMENT

HEALTH AS FAIR OR POOR

A significantly higher percentage of Philadelphia County residents rated their health as poor or fair (21.0%) when compared to the State (17.0%).⁴²

More than a quarter of the City’s residents (28.4%) living in the Lower Northeast District rated their health as Fair or Poor based on the PHMC Household Survey 2012-2015. Almost a quarter (22.1%) of residents of the North Delaware District and 20.1% of Central Northeast District residents rated their health as Fair or Poor.⁴³

IMPACT OF POOR HEALTH

Philadelphia County residents reported a significantly higher percentage of Poor Physical or Mental Health Prevented Usual Activities in the Past Month (29.0%) versus the State (24.0%).⁴⁴

YEARS OF POTENTIAL LIFE LOST

Years of Potential Life Lost Before Age 75 is an age-adjusted rate per 100,000 population. It is based on the average years a person would have lived if he or she had not died before age 75. In the City of Philadelphia (9,521), the Lower Northeast (11,572) District has one of the highest rates of Years of Potential Lost Life in the City of Philadelphia.⁴⁵ The North Delaware (8,972) and Central Northeast (6,434) Districts have somewhat lower rates.⁴⁶

HEALTH INSURANCE/AFFORDABILITY

Affordability of health care services is a problem for many Philadelphia residents. The percentage of Adults age 18-64 who did not seek care due to cost in the Lower Northeast (17.2%) as well as the North Delaware (16.6%) District is higher than the City of Philadelphia (13.4%) as a whole.⁴⁷ At the City level, there was also a higher percentage of Hispanic (18.3%), Black (14.1%) and Asian (13.7%) Adults that did not seek care due to cost when compared to the City at large (13.4%).⁴⁸

A significantly higher percentage of Adults ages 18-64 in Philadelphia County report that they have No Health Insurance (14.0%), compared to the State (9.0%).⁴⁹

A substantial percentage of residents in Philadelphia County reported Need[ing] to See a Doctor But Could Not Due To Cost in the Past Year (15.0%), significantly higher than the State rate (11.0%).⁵⁰

HEALTH INSURANCE AND MEDICAID

For the years 2014/15, the percentages of Adults ages 18-64 with No Health Insurance for the City’s Lower Northeast District (13.0%) is higher than the City of Philadelphia overall (12.4%), while the Central Northeast (10.4%) and North Delaware (9.8%) Districts are lower than the City overall.⁵¹ The rate for Hispanics (24.6%) is almost double the City overall. For the same time period, Adults covered by Medicaid in the City’s Lower Northeast (15.6%), North Delaware (12.6%) and Central Northeast (6.7%) Districts are all lower than the overall City rate (22.1%).⁵² Black (32.4%) and Hispanic (23.5%) Adults who have Medicaid are also higher than the City Overall.⁵³

“Working in the confines of the city, we take care of a large population of homeless individuals. In my time here, I have personally witnessed this number intensifying.”

~ Key Informant Survey Respondent

PERSONAL CARE PROVIDER

Almost one in five (18.0%) of Philadelphia County residents indicated they have No Personal Health Care Provider, which was significantly higher than the State overall (14.0%).⁵⁴

SCREENINGS

Although overall, the percentage of Women age 50-74 receiving Mammograms in the past two years (2014/15) was 82.5%, the percentage of White Women receiving a Mammogram was only 76.2%.⁵⁵

The rate of new HIV diagnoses per 100,000 for the City of Philadelphia overall has decreased from 47.8 in 2012 to 31.5 in 2014.⁵⁶ The rates in the City's districts that are part of the Jeanes Hospital Service Area are lower than the City overall (Lower Northeast (27.9), Central Northeast (14.1) and North Delaware (28.8)).⁵⁷ When looking at new HIV diagnoses in relation to ethnicity and race, Hispanic (49.0) and Black residents' (48.0) rates are higher than the City overall as well.^{58,59}

AREAS OF IMPROVEMENT

SCREENINGS

The percentage of Adults reporting that they had a routine checkup in the past two years in 2015-2017 (87.0%) has increased from 2011-2013 (85.0%). This was slightly higher than the State percentage of 85.0%.⁶⁰

Since 2011, the percentage of Women in Philadelphia County receiving mammograms has increased from 54.1% to 62.2%, although the percentage was lower than the overall State percentage of 64.8%.⁶¹

The percentage of residents Ever Tested for HIV, Ages 18-64 (65.0%) has increased since 2011 (63.0%) and was significantly higher than the State (41.0%).⁶²

The percentage of Adults age 50-74 years reporting ever having had a colonoscopy or sigmoidoscopy has increased from 54.6% in 2002 to 72.6% in 2014/15.⁶³

MENTAL HEALTH PROVIDERS

The number of Mental Health Providers has increased in Philadelphia County as evidenced by the decrease in the provider/population ratio. The ratio was 524 people for each provider in 2015 and dropped to 436 people for each provider in 2018.⁶⁴

INSURANCE

Adults age 18-64 with No Health Insurance in the City Districts that are part of the Jeanes Hospital Service Area (Lower Northeast (13.0%), Central Northeast (10.4%) and North Delaware (9.8%)) are all lower than the City percentage overall (12.4%). For the City of Philadelphia overall, the percentage of uninsured has been decreasing from 18.5% in 2012 to 12.4% in 2014.⁶⁵

BARRIERS TO HEALTHCARE

Social Determinants of Health (SDoH) is a relatively new term in health care. According to the World Health Organization (WHO), SDoH are “the conditions in which people are born, grow, live, work and age. These circumstances are shaped by the distribution of money, power and resources at global, national and local levels.”⁶⁶ and often determine the access to and quality of medical care that individuals receive.

For the 2019 CHNA, Hospital leadership and the CHNA Steering Committee were interested in understanding barriers related to the social determinants of health preventing the community from obtaining medical services.

Specific barriers related to each of the topical areas of the report are listed in those sections.

Primary research respondents identified the following barriers to care overall:

- Lack of insurance;
- Scarcity of livable wages;
- Language and cultural barriers;
- Homelessness;
- Transportation;
- Gun violence;
- Inability to pay out of pocket expenses; and
- Navigating the health care system.

Resources needed to improve access to care identified include:

- Counseling and advocacy services to assist with navigating health care services especially for seniors that will follow up on changing needs;
- Effort to publicize the services available to the community;
- Arranged transportation to appointments;
- Budgeting and financial resources related to housing;
- Health insurance counseling; and
- Communication resources for the elderly and immigrants.

“It is an issue of access. People don’t have insurance, don’t know where to go for linkages to health (mental and physical). Not a critique of resources but a bridge to get there with insurance or finances. Also seeing high cost of co-pay and deductible.”

~ Focus Group Participant

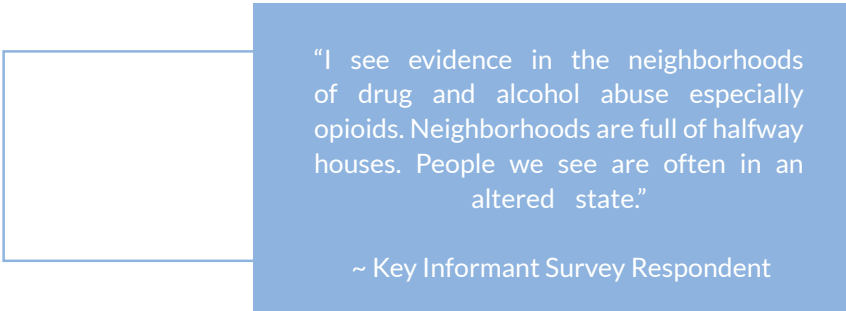

“I believe that many in the community struggle with financial resources to meet deductibles and copays. Also trying to determine type of care and how to access is confusing for elderly patients and the significant population who either do not speak English or have limited understanding of our health care system.”

~ Key Informant Survey Respondent

SUBSTANCE USE DISORDER/TOBACCO USE

Secondary data, Focus Group participants and Key Informant Survey respondents identified the following needs and issues related to substance use disorders:

- Substance abuse – adults and children;
- Alcohol and substance abuse – adults and children;
- Smoking/vaping – adults and children;
- Substance Use Disorder makes cancer care difficult; and
- Substance abuse among the HIV/AIDS population causes homelessness.

“I see evidence in the neighborhoods of drug and alcohol abuse especially opioids. Neighborhoods are full of halfway houses. People we see are often in an altered state.”

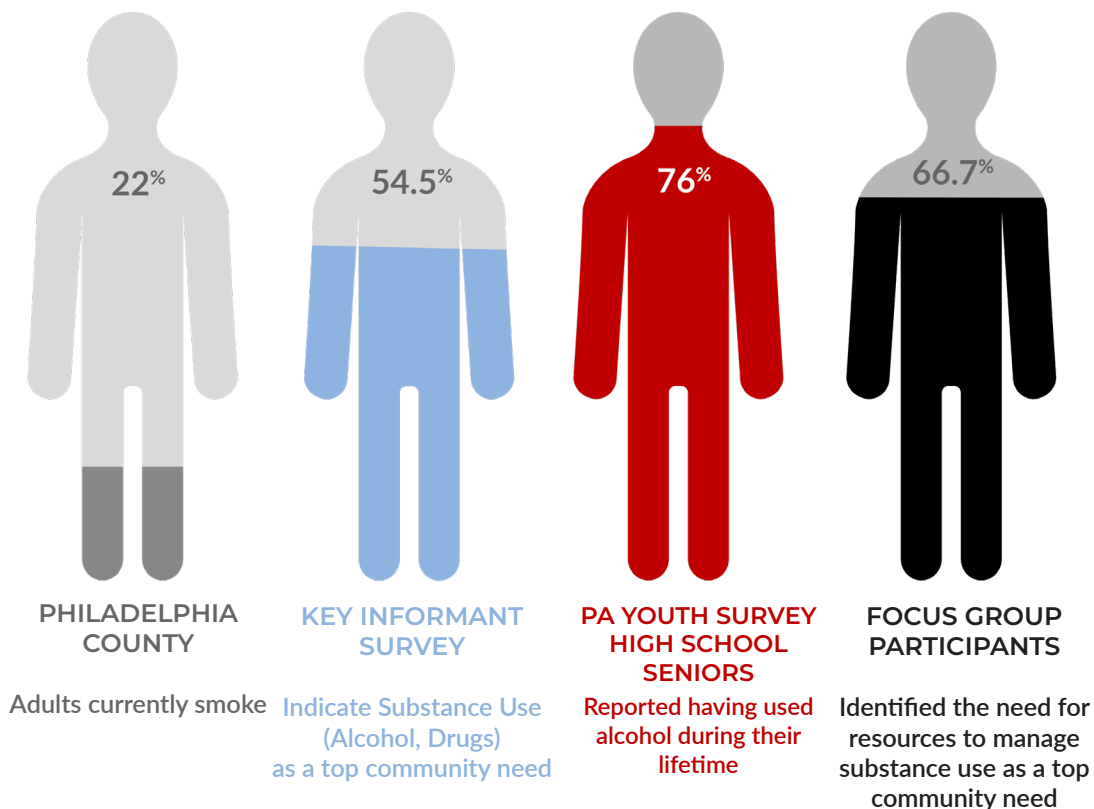

~ Key Informant Survey Respondent

WHAT THE COMMUNITY IS SAYING

Figure 17 shows that two-thirds (66.7%) of Focus Group participants identified “resources to manage substance use” as a top community need. Participants commented that problems related to substance use exist in the community and there is a lack of resources devoted to managing abuse issues and addictive behaviors. Focus Group participants also noted that the community is failing to associate addiction problems with substance use disorders and address the issues. The community lacks the appropriate number and range of substance abuse resources that it needs and is poorly managing the epidemic locally.

Over half (54.5%) of Key Informant Survey respondents indicated that Substance Use (Alcohol, Drugs) is a top community issue. Respondents noted that there is a substantial number of neighborhoods with many people who have substance use disorders.

Figure 17: Jeanes Hospital Key Informant Survey and Focus Group Respondents: Substance Use Disorder, 2018

Sources:

2015-2017 PA Department of Health BRFSS Data
 2018 Jeanes Hospital Key Informant Survey Respondents, Strategy Solutions, Inc.
 2017 PA Youth Survey, Philadelphia County
 2018 Jeanes Hospital Focus Group, Strategy Solutions, Inc.

Barriers to care as well as root causes that drive the increase in substance use that were identified by Focus Group participants and Key Informant Survey respondents included:

- Lack of insurance;
- Scarcity of livable wages;
- Homelessness;
- Transportation;
- Gun violence; and
- An inability to navigate the health care system.

Participants also noted that resources to address dual diagnoses (mental health and substance use) are lacking.

- Needed services identified by primary research participants related to substance use included:
- First Aid training including how to administer Narcan;
- Recovery homes, especially for youth;
- Education for children on the dangers of drugs;
- A support system for those struggling with opioids;
- An increase in the number of drug addiction treatment facilities; and
- Improved access to addiction controlling medications.

OPPORTUNITIES FOR IMPROVEMENT

TOBACCO

Although the percentage of Adults in Philadelphia County that report being a current smoker decreased from 25.0% (2011-2013) to 22.0% (2015-2017), the percentage was still significantly higher than the State (18.0%).⁶⁷

The prevalence of Adults Smoking in the City of Philadelphia has declined from 27.3% in 2008 to 22.4% in 2014/15, although Black Adults (25.8%) were higher and Asian Adults (9.1%) were two times lower than the City overall.⁶⁸ The Adult Smoking Prevalence percentages in the City's North Delaware (26.4%) and Upper Northeast (23.3%) Districts were higher than the City overall, while the Central Northeast District (18.1%) percentage was lower.⁶⁹

Although the percentage of Teen Tobacco Use and Cigarette Smoking Prevalence, 9th-12th Grade in the City of Philadelphia has been on a steady decline since 2001 (15.8%) to 2015 (7.2%), the percentages for White teens (34.8%) and Hispanic teens (31.0%) are higher than the City overall.⁷⁰

DRUG-INDUCED MORTALITY

The Drug-Induced Mortality rate in Philadelphia County (47.2) was significantly higher than the State rate (38.5).⁷¹ The rate almost doubled over the past six years from 28.3 in 2011 to 47.2 in 2016.⁷²

Opioid-Related Mortality in the City of Philadelphia has more than tripled since 2003 (14.0) to 40.3 in 2016. The rate among White Adults (65.3) was significantly higher, while the Hispanic rate (43.7) was slightly higher compared to the City overall.⁷³ The rate for Black (24.8) and Asian (7.0)⁷⁴ residents was also significantly lower. The Opioid-Related Mortality Rate for the City's North Delaware District (75.0) is much higher than the overall City rate, while the Lower Northeast (34.5) and Central Northeast (31.7) District rates are somewhat lower.⁷⁵

EXCESSIVE DRINKING

The percentage of Adults who reported Excessive Drinking has increased in Philadelphia County from 18.0% in 2011 to 22.1% in 2018.⁷⁶ This was slightly higher than the State percentage of 20.5%.⁷⁷ The percentage of Adults who reported Excessive Drinking for the City of Philadelphia remained constant between 2014 (19.2%) and 2015 (19.5%), although White (25.8%) and Hispanic Adults (22.1%) were higher than the City's overall percentage (18.7%) for 2012.⁷⁸

PRESCRIPTION PAIN RELIEVER USE

The percentage of students in Philadelphia County reporting Prescription Narcotics Use increased from 5.6% in 2013 to 7.3% in 2017.⁷⁹ The percentage was highest among high school seniors (9.9%) although the percentage among 10th grade students has increased from 5.6% in 2013 to 7.1% in 2017.⁸⁰

AREAS OF IMPROVEMENT

ALCOHOL IMPAIRED DRIVING MORTALITY

Alcohol Impaired Driving Deaths in Philadelphia County have decreased from 27.4% in 2014 to 22.5% in 2018. This was lower than the State (30.1%).⁸¹

YOUTH ALCOHOL USE

The percentage of students in Philadelphia County who report Lifetime Alcohol Use has decreased from 56.2% to 49.3%. Over three fourths of high school seniors (76.0%) report some Lifetime Alcohol Use.⁸¹

YOUTH TOBACCO USE

The percentage of students reporting lifetime use of cigarettes has decreased in Philadelphia County between 2013 (19.1%) to 14.5% in 2017.⁸³ The percentage of students using cigarettes in the past 30 days has also decreased from 8.9% in 2013 to 2.4% in 2017.⁸⁴

VAPING/E-CIGARETTE USE

Almost one in five (18.3%) Philadelphia County students in 2017 reported vaping/e-cigarette use in the past 30 days.⁸⁵

MENTAL HEALTH

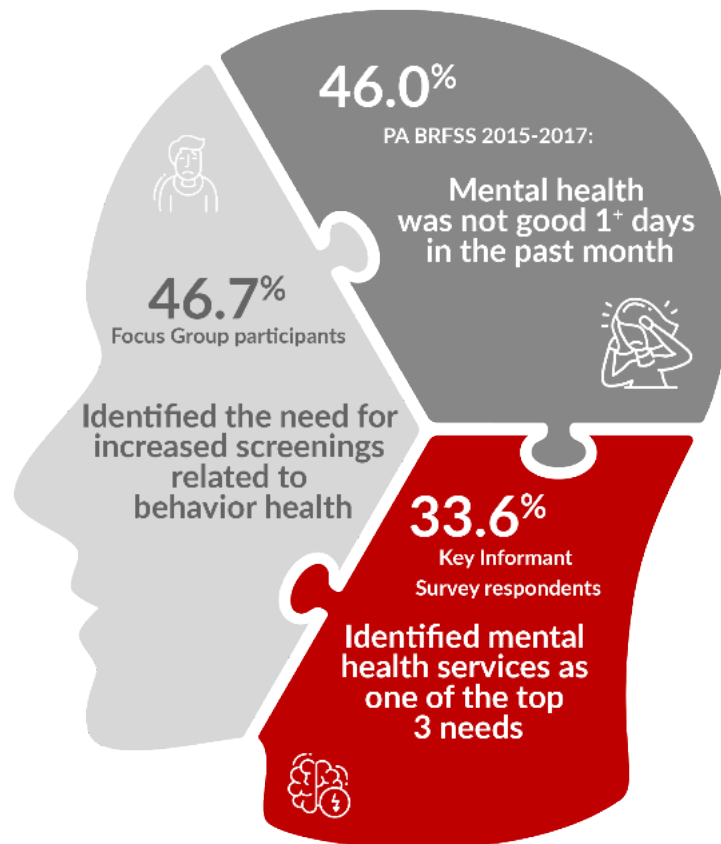

Secondary health data, Focus Group and Key Informant Survey data indicated the following mental health needs and issues in the Hospital's community:

- Lack of mental health providers;
- High Suicide rate;
- Lack of screening for risk indicators;
- Access to behavioral health treatment in mainstream hospitals;
- Lack of information available to people who need help;
- Lack of priority shown to mental health issues; and
- Lack of community outreach.

WHAT THE COMMUNITY IS SAYING

Figure 18 illustrates that slightly less than half (46.7%) of Focus Group participants identified the need for increased screenings related to behavior health. A third (33.6%) of Key Informant Survey respondents identified mental health services as one of the top three needs. Less than half (46.0%) of the PA BRFSS respondents for Philadelphia County said their mental health was not good 1 or more days in the past month.

Figure 18: Jeanes Hospital Key Informant Survey Respondents and Focus Group Participants: Mental Health, 2018

Sources:

2018 Jeanes Hospital Focus Group, Strategy Solutions, Inc.
 2018 Jeanes Hospital Key Informant Survey, Strategy Solutions, Inc.
 2015-2017 PA Department of Health, BRFSS

Almost one in five (18.3%) of the Key Informant Survey respondents indicated that Mental Health was a top health issue in the community. Almost a third of the respondents (30.0%) of the Key Informant Survey indicated that Mental Health services was the top key resource or service that was needed to improve access to health care.

Barriers identified by primary research participants related to mental health included:

- Lack of insurance;
- Scarcity of livable wages (that negatively impacts people’s mental health status and ability to access treatment);
- Language barriers;
- Stigma; and
- Inability to navigate the system.

OPPORTUNITIES FOR IMPROVEMENT

MENTAL HEALTH NOT GOOD

The percentage of Adults in Philadelphia County who reported their Mental Health Was Not Good 1+ Days in the Past Month (46.0%) was significantly higher than the State (38.0%).⁸⁶ The percentage has also increased slightly since 2011 (44.0%).⁸⁷

MENTAL HEALTH CONDITIONS

The percentage of Adults Diagnosed with a Mental Health Condition in Philadelphia County has increased from 10.5% in 2000 to 20.8% in 2014/15. The Hispanic percentage (29.6%) was almost fifty percent higher than the overall County (20.8%). The percentage for White Adults was comparable (23.0%), while for Black Adults was slightly lower (18.5%) than the County overall.

Less than one in four Adults in the City’s North Delaware District (19.6%), Central Northeast (16.1%) and Lower Northeast District (15.0%) were Adults Diagnosed with a Mental Health Condition for the time period 2012-2015; all three districts are lower than the City of Philadelphia overall (20.8%).⁹⁰

“We are seeing more mental health issues and substance abuse without as many resources to treat these types of patients.”

~ Key Informant Survey Respondent

AREAS OF IMPROVEMENT

SUICIDE

The Suicide Mortality Rate per 100,000 in Philadelphia County in 2016 (9.1) was significantly lower than the overall State rate of 14.6.⁹¹ The rate has also decreased slightly since 2011 (10.2).⁹²

The Suicide Mortality Rate in the City of Philadelphia for 2016 was 9.1, which has been decreasing since 2012 (11.4).⁹³ The rate for White Adults (14.7) was significantly higher than the State rate, while the Black rate (5.5) was significantly lower when compared to the City's overall rate.⁹⁴

The Suicide Mortality Rate in 2016 for residents in the North Delaware (15.3) and Central Northeast (12.3) Districts were higher while the Lower Northeast (5.5) District rate was lower than the City of Philadelphia overall rate (9.1).⁹⁵

TEENS CONSIDERING SUICIDE

Over the past 13 years, the percentage of students in 9th-12th grade in Philadelphia County who have seriously considered attempting suicide in the past 12 months has decreased from 16.6% in 2000 to 14.0% in 2015. The percentage among Hispanic students was higher (16.2%) than the overall percentage (14.0%) and lower among Black (11.9%) and Asian (9.8%) students.⁹⁶

“There is an increased need for screening for trauma, violence, suicide ideation – (we should be screening for) risk indicators for behavior health that have huge impact on physical health and vice versa.”

~ Focus Group Participant

HEALTHY ENVIRONMENT

Environmental quality refers to varied characteristics that relate to the natural environment such as air and water quality, pollution and noise, and weather as well as the potential effects these characteristics have on physical and mental health. In addition, environmental quality also refers to the socio-economic characteristics of a given community or area, including economic status, education, crime and geographic information. Secondary data identified a number of needs and issues related to healthy environment in the Hospital’s community and service area including:

- Gun violence/mortality;
- Crime infested neighborhoods
- Children living in poverty/poverty in general; and
- Lack of safe and affordable housing.

WHAT THE COMMUNITY IS SAYING

Focus Group participants indicated numerous social determinants of health that affect overall health including:

- Poverty;
- Scarcity of living wages;
- Housing;
- Gun violence;
- Homelessness;
- Low graduation rates;
- Lack of employment;
- Housing; and
- Transportation.

Participants commented that these reflect only a fraction of the many underlying issues causing health problems.

As shown in **Figure 19**, almost three-fourths of Focus Group participants (73.3%) indicated that safer housing was a top community need. A little less than one-half of the Focus Group participants (40.0%) indicated gun education as a top need.

“I have seen people come in and tell me they have no place to stay at night.”

~ Focus Group Participant

Figure 19: Jeanes Hospital Focus Group Participants: Healthy Environment, 2018

Sources:
2018 Jeanes Hospital Focus Group Participants, Strategy Solutions, Inc.
2000-2015 FBI Uniform Crime Reports

Other needs and issues identified by primary research participants related to a healthy environment included:

- Knowledge of safe gun practices including how to store them and when to get the proper storage equipment;
- Lack of a community center for members of the community to gather and socialize;
- Infectious disease;
- Bed bugs and scabies are commonly seen issues;
- Homelessness;
- High rate of mass shootings;
- Crime infested neighborhoods; and
- High poverty level.

Barriers identified by primary research participants related to a healthy environment included:

- Lack of insurance;
- Scarcity of living wages;
- Language barriers;
- Limited graduation rates;
- Lack of housing;
- Lack of employment opportunities;
- Homelessness;
- Gun violence; and
- Transportation.

Needed services identified by primary research participants include:

- Safer housing free of bed bugs and other home ailments;
- Assistance with paying utility bills;
- Assistance with bedbug infestations in the home; and
- Crime interventions to strengthen trust throughout the community.

OPPORTUNITIES FOR IMPROVEMENT

POVERTY

The percentage of Children Living in Poverty in Philadelphia County in 2018 (37.2%) has increased from 2011 (31.7%).⁹⁷ The percentage of Children Living in Single Parent Homes (59.8%) has also increased from 2011 (57.8%).⁹⁸

The percentage of Children Living in Poverty in the City of Philadelphia in 2015 (38.3%) has slightly increased since 2000 (31.6%).⁹⁹ The Hispanic (50.3%) and Black (45.9%) percentages are also higher than the City overall.¹⁰⁰ This may be related to the percentage of Children Living in Single Parent Homes in the City of Philadelphia in 2015 (60.2%) which has increased from 2013 (58.2%).¹⁰¹ The percentage in the City's Lower Northeast District (58.4%) is higher than the City in 2015 while the percentages in the North Delaware (42.9%) and Central Northeast (32.1%) Districts are lower.¹⁰²

EMPLOYMENT

The Unemployment rate for those 16 years and older in 2015 for the City's Lower Northeast (18.4%), North Delaware (14%) and Central Northeast (11.8%) Districts are all above the City's (10.9%).¹⁰³ The Unemployment rate for Black (15.2%) and Hispanic (14.5%) residents is also higher than the City's overall.¹⁰⁴

HOUSING

The percentage of Philadelphia County residents with Severe Housing Problems in 2018 was 24.3%, much higher than the State percentage of 15.5%.¹⁰⁵ For 2016, the Philadelphia Building Construction and Occupancy Code Violations per 1,000 Occupied Housing Units for the City in 2016 was 193.4, of which violations has been slowly increasing since 2009 (164.7).¹⁰⁶ The City's North Delaware (336.7) and Lower Northeast (258.5) Districts have higher rates than the City overall while the rate in the Central Northeast District is lower (107.1).¹⁰⁷

VIOLENCE

The Violent Crime rate for Philadelphia County in 2018 was 1094.2 per 100,000 population.¹⁰⁸ This was three times the State rate of 332.7. The Violent Crime rate in Philadelphia has decreased from 1,503 people in 2000 to 1,029 in 2015. Philadelphia has the highest Violent Crime rate of all major cities nationwide.¹⁰⁹

FIREARM MORTALITY

The Firearm Mortality Rate in 2016 (17.9) in Philadelphia County was also significantly higher than the State rate (11.9) and was almost twice the Healthy People 2020 goal of 9.3.^{110,111} The rate among Black Males was 62.7, significantly higher than the State rate for Black Males (49.4).¹¹²

HOMICIDE

The Homicide Mortality rate in the City of Philadelphia has fluctuated over the past thirteen years, but overall has decreased from 22.0 in 2003 to 17.8 in 2016. The rate was significantly higher for Black residents (31.6).

The Firearm Homicide rate has also fluctuated over the past thirteen years, but overall has decreased from 17.3 in 2003 to 14.9 in 2016.¹¹³ This rate was also significantly higher among Black residents (27.3). The City's Lower Northeast (13.8), North Delaware (6.0) and Central Northeast (2.4) Districts all have lower rates.¹¹⁴

For the school year 2014/15, the percentage of children, age 5 to 18 years with Child Obesity Prevalence for the planning districts has been reported by zip code. Therefore, looking at the City's North District, zip code 19140 (23.7%) is higher than the City of Philadelphia percentage of 20.6%.¹⁵⁵ The Lower North District zip codes 19132 (23.2%), 19133 (26.7%), 19121 (22.5%), and 19122 (21.5%) are all slightly higher than the City overall.¹⁵⁶ In the River Wards District, zip codes 19137 (25.6%), 19134 (21.2%) and 19125 (24.6%) are all slightly higher than the City overall as well.¹⁵⁷

AREAS OF IMPROVEMENT

VIOLENCE

The Violent Crime rate for the City of Philadelphia in 2015 was 1,029 per 100,000 population, which has been consistently decreasing since 2008 (1,441).¹¹⁵

YOUTH AND ADULT ASTHMA

In 2011, the percentage of students in Philadelphia County with Asthma conditions was 17.9% and by 2016 had increased to 18.6%.¹¹⁶

Since 2011 (17.0%), the percentage of Adults Who Have Ever Been Told They Have Asthma dropped slightly to 16.0% in 2015-2017, and the percentage was no longer significantly higher than the State (15.0%).¹¹⁷ The percentage of Adults Who Currently Have Asthma in 2015-2017 (12.0%) was also lower than 2011-2013 (13.0%) and no longer significantly higher than the State (10.0%).¹¹⁸

The overall Asthma Hospitalization Rate per 10,000 Children <18 (2013-2015) in the City of Philadelphia is 59.5, down from 73.6 in 2000. The rate is higher (67.4) for Black children and much lower (10.2) for White Children. However, portions of the Lower Northeast District had a rate of 104.1, nearly double the City rate overall.¹¹⁹

AIR POLLUTION

The average number of days per month with Air Pollution/Particulate Matter has decreased in Philadelphia County from 16.0 in 2011 to 11.2 in 2018.¹¹⁹ In the City of Philadelphia, the number of Days with Good Air Quality in 2016 (178) has fluctuated over time but has increased since 2000 (137), and the number of Days with Unhealthy Air Quality has decreased from 29 in 2000 to 9 in 2016.¹²¹

EMPLOYMENT

The Unemployment Rate in Philadelphia County has decreased over the past few years to 6.8% in 2018, although the rate was slightly higher than the State rate of 5.4%.¹²² The City of Philadelphia's Unemployment rate has also been decreasing from 10.9% in 2012 to 6.8% in 2016.¹²³ Additional detail on the unemployment rates within the service area are included by zip code in Table 2 in the Demographics section of this report.

HIGH SCHOOL GRADUATION RATES

The percentage of students graduating high school has increased in Philadelphia County from 59.0% in 2014 to 69.8% in 2018. While the local rate has increased, this was still lower than the State rate of 85.4% and the US rate of 84.0%.¹²⁴

The On-Time High School Graduation Rate for the City of Philadelphia increased from 55.2% in 2011 to 64.8% in 2015. The rate for Hispanic Students in 2014/15 is much lower at 53.3%.¹²⁵

PHYSICAL ACTIVITY & NUTRITION

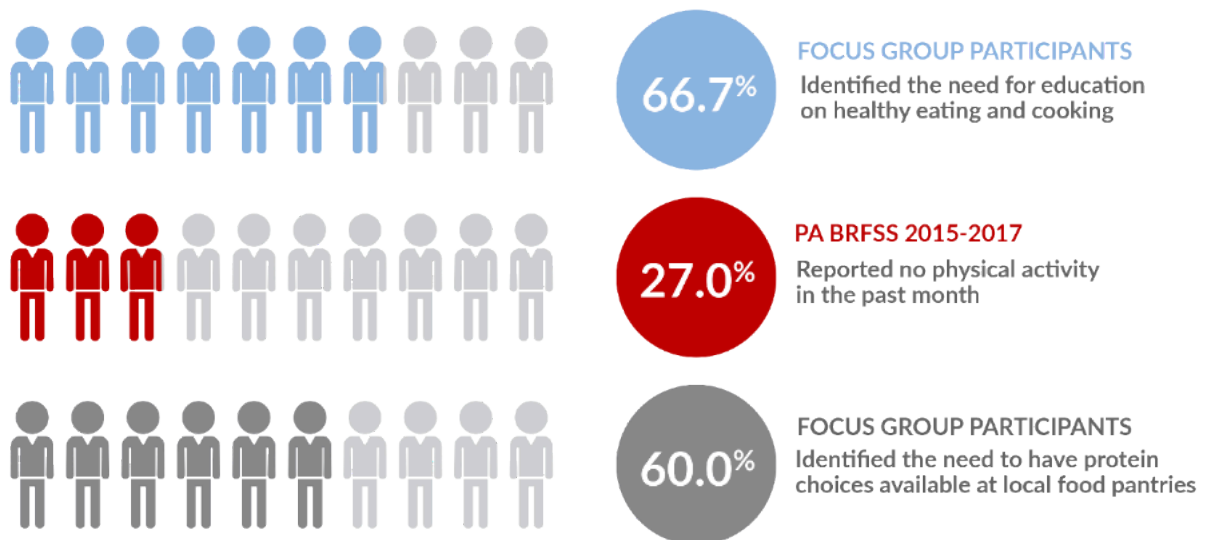

Good nutrition, physical activity, and a healthy body weight are essential parts of a person's overall health and well-being. Together, these can help decrease a person's risk of developing serious health conditions, such as high blood pressure, high cholesterol, diabetes, heart disease, stroke, and cancer. Secondary data, Focus Group participants and Key Informant Survey respondents identified the following community needs and issues related to physical activity and nutrition:

- Food insecurity/access to healthy foods/nutrition;
- Limited financial resources;
- Transportation; and
- Lack of physical activity/leisure time/green space.

WHAT THE COMMUNITY IS SAYING

As illustrated in **Figure 20**, two-thirds (66.7%) of the Focus Group participants identified the need for education on healthy eating and cooking. Slightly less than two-thirds (60.0%) of participants identified the need to have protein choices available at local food pantries. Focus Group participants indicated that many food banks do not stock the nutritional food items needed to maintain a healthy diet. Focus Group participants also noted the need for more safe spaces to exercise and green areas for gardening.

Figure 20: Jeanes Hospital Key Informant Survey and Focus Group Participants Insecurity and Physical Activity Responses, 2018

Sources:

2018 Fox Chase Cancer Focus Group, Strategy Solutions, Inc.

2015-2017PA Department of Health BRFSS

Key Informant Survey respondents identified high obesity rates as a top community issue along with food deserts, lack of local supermarkets with healthy food and lack of exercise opportunities.

Needed services identified by primary research participants related to physical activity and nutrition included:

- A program that provides nutritional education;
- Community gardens that provide education;
- Healthy protein options available at local food bank;
- Having a nutritionist on site to help make healthy food choices;
- Education in the schools regarding how to establish healthy eating habits; and
- Affordable produce available in neighborhoods.

OPPORTUNITIES FOR IMPROVEMENT

PHYSICAL ACTIVITY

Over a quarter (27.0%) of Philadelphia County Adults report that they have had No Leisure Time or Physical Activity in the past month.¹²⁶

FOOD INSECURITY

More than one in five (21.0%) of the Philadelphia County population has Food Insecurity which was much higher than the State (13.1%).¹²⁷

Between 2014 and 2018, the percentage of Philadelphia County students qualifying for Free or Reduced-Price Lunch increased from 74.9% to 95.4%, almost double the State percentage of 48.2%.¹²⁸

The percentage of Adults in the City of Philadelphia living in high-poverty areas with Low to No Walkable Access to Healthy Foods has decreased slightly from 24.1% in 2010 to 22.4% in 2014.¹²⁹ The percentage in the City of Philadelphia's Lower Northeast (25.5%) District is higher than the City overall, while the percentage in the North Delaware (20%) and the Central Northeast (8.7%) Districts are lower.¹³⁰

The percentage of City of Philadelphia residents reporting that it was difficult or Very Difficult to Find Fruit And Vegetables in Their Neighborhoods for 2014/15 overall was 7.9%, while the percentages among Hispanic (12.4%) and Black residents (10.7%) was higher.¹³¹

PHYSICAL ACTIVITY

The percentage of Adults in the City of Philadelphia who said they had Access to Nearby Parks or Outdoor Space has remained constant between 2012 (72.1%) and 2014/15 (73.1%), although Hispanic Adults (69.6%) were less likely to say they had access to Nearby Parks or Outdoor Space.¹³² Adults living in the City's Central Northeast (71.7%) and the Lower Northeast (70.6%) Districts were less likely to say that they had access when compared to the City overall (73.1%) while the North Delaware District (78.2%) was slightly higher than the City overall.¹³³

OBESITY

Since 2000, the prevalence of Obesity (percentage of Adults with Body Mass Index greater than or equal to 30kg/m² based on self-reported height and weight) in The City of Philadelphia increased from 25.2% to 33.3% in 2014-15.¹³⁴ The percentage for Black (40.1%) residents was substantially higher, while the percentage for Asian residents was much lower (9.8%) when compared to the City overall.¹³⁵ The percentage in the City's North Delaware District (36.1%) is higher than the City Overall (33.3%) while the Lower Northeast (33.2%) and Central Northeast (31.5%) District percentages are slightly lower.¹³⁶

AREAS OF IMPROVEMENT

None of the selected indicators met the criteria for inclusion in this section. See *Appendix A* for additional information on Physical Activity and Nutrition indicators.

"We give out bags of food but am starting to think there needs to be more variety to that. How can we provide people with fresh meat and produce?"

~ Focus Group Participant

HEALTHY WOMEN, MOTHERS, BABIES & CHILDREN

The well-being of children determines the health of the next generation and can help predict future public health challenges for families, communities, and the health care system. The healthy mothers, babies and children topic area addresses a wide range of conditions, health behaviors, and health systems indicators that affect the health, wellness, and quality of life for the entire community. Public health data identified the following issues related to healthy women, mothers, babies and children:

- Medicaid assistance;
- WIC assistance;
- Low birth rate;
- Non-smoking pregnancy;
- No prenatal care;
- Teen pregnancy; and
- Infant mortality.

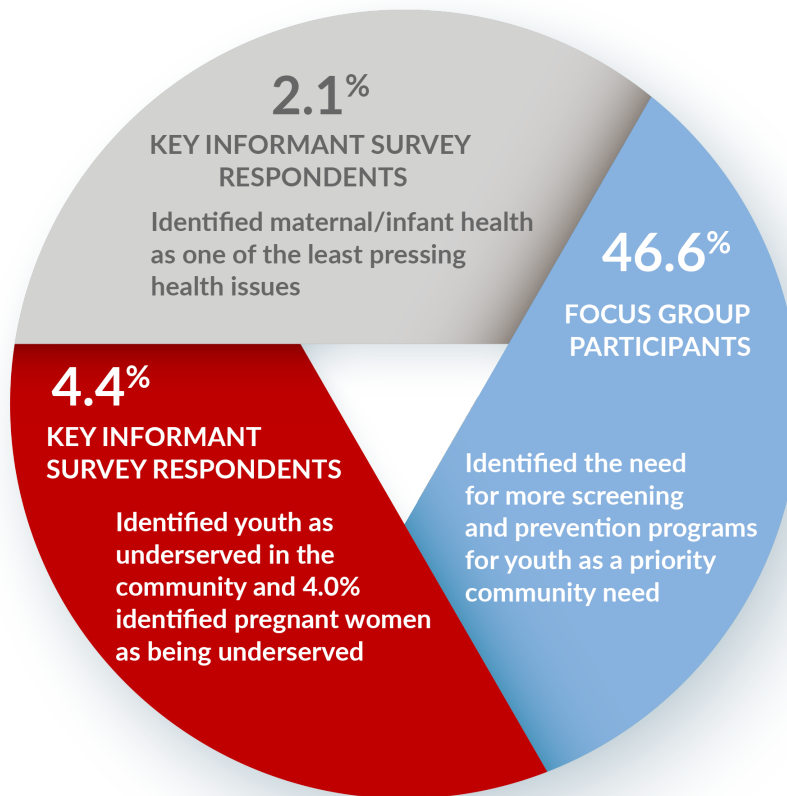

WHAT THE COMMUNITY IS SAYING

Figure 21 shows almost half of Focus Group participants (46.6%) identified the need for more screening and prevention programs for youth as a priority community need. Specific screenings that were suggested included:

- Adverse Childhood Experiences (ACEs);
- Trauma;
- Violence;
- Suicide; and
- Other risk indicators for behavioral health that have a big impact on physical health for women and children in particular.

Key Informant Survey respondents identified maternal/infant health as one of the least pressing health issues (2.1%). A low percentage of respondents identified youth (4.4%) and pregnant women (4.0%) as underserved members of the community. A small percentage (2.2%) of respondents also identified maternal/infant health as a top community issue.

OPPORTUNITIES FOR IMPROVEMENT

PRENATAL CARE

While the percentage of Mothers Receiving Prenatal Care in the First Trimester in Philadelphia County has increased since 2011 (54.3%) to 2016 (61.9%), the percentage has remained significantly lower compared to the State (73.8% in 2016).¹³⁷ Also, the percentage of Women Receiving Late or No Prenatal Care (5.2%) was significantly higher than the State (1.6%).

The percentage of Black women (16.4%) in 2014 in the City was higher compared to Hispanic (13.8%), Asian (10.9%), and White (8.3%) Women and the City of Philadelphia overall (13.3%).¹³⁸

In 2014, the percentage of Women who received prenatal care either in the third trimester or not at all for the City’s Lower Northeast (17%), and Upper Northeast (13.6%) Districts was higher than the City overall (13.3%), while the North Delaware (10.6%) District’s percent is lower.¹³⁹

MATERNAL SMOKING

The percentage of Non-Smoking Mothers During Pregnancy in Philadelphia County has been significantly higher than the State (88.5% in 2016) over the past five years.¹⁴⁰ The percentage has also increased from 89.4% in 2011 to 93.5% in 2016.¹⁴¹

The percentage of Non-Smoking Mothers Three Months Prior to Pregnancy in Philadelphia County has also been significantly higher when compared to the State (84.3% in 2016).¹⁴² This percentage has also increased from 85.6% in 2011 to 90.9% in 2016.¹⁴³

LOW BIRTH WEIGHT BABIES

The percentage of Low Birth Weight Babies in Philadelphia County has been significantly higher than the State (8.2% in 2016) for the past five years, although the percentage has decreased from 11.3% in 2011 to 10.8% in 2016.¹⁴⁴ The percentage for Black babies was 13.6%, Hispanic 9.5%, White 7.2% and Asian only 6.5%.¹⁴⁵ The City's Lower Northeast District (11.4%) is slightly higher than the City's percentage overall, while the North Delaware (8.8%) and Central Northeast (8.6%) Districts are lower.¹⁴⁶

INFANT MORTALITY

In 2014, the Infant Mortality Rate per 1,000 live-born infants under one year of age for the City of Philadelphia's Lower Northeast District (10.7) is slightly higher than the City's overall rate of 7.8, while the North Delaware (6.0) and Central Northeast (5.1) Districts are slightly lower.¹⁴⁷

WIC ASSISTANCE

The percentage of Mothers Reporting WIC assistance in Philadelphia County was significantly higher when compared to the State (35.0% in 2016) for the past five years, although the percentage has been decreasing from 61.2% in 2011 to 52.9% in 2016.¹⁴⁸ The percentage of Black, (63.6%), Hispanic (74.0%), and Asian (47.0%) in the County was also significantly higher than the State rates for each group (61.7%, 68.4%, and 29.2% respectively).¹⁴⁹

CHILDHOOD OBESITY

The percentage of students in grades K-6 who are considered obese in Philadelphia County has remained fairly consistent since 2011 (18.7%) and in 2016 (18.7%) was higher when compared to the State (16.7%) and the Healthy People 2020 Goal (15.7%).¹⁵⁰

The percentage of students in grades 7-12 considered obese in Philadelphia County has fluctuated slightly from 2011 (20.1%) to 2016 (20.0%) and continues to be higher than the State (19.1%) and the Healthy People 2020 Goal (16.1%).¹⁵¹

Although the Child Obesity Prevalence, 5-18 Years of Age for the City of Philadelphia for the year 2014/15 has remained somewhat constant from 2001 (21.7%) to 2015 (20.6%), Black Females (22.8%), White Males (21.2%), Hispanic Females (22.0%) and Males (25.7%) have higher percentages when compared to the City overall.¹⁵²

For the school year 2014/15, the percentage of children, age 5 to 18 years with Child Obesity Prevalence for the City's planning districts has been reported by zip code. Zip code 19124 in the Lower Northeast District (22.7%), and 19136 in the North Delaware District (23.2%) have rates that are higher than the City overall.¹⁵³

AREAS OF IMPROVEMENT

INFANT MORTALITY

Over the past seven years in Philadelphia County, the Infant Mortality rate per 1,000 live births has decreased from 11.4 in 2007 to 7.8 in 2014.¹⁵⁴ However, the rate among Black residents (12.2) was significantly higher than the overall rate, while the rates for White (3.8) residents was lower.¹⁵⁵ The Hispanic rate was 5.6. The City's Lower Northeast District (10.7) had a higher rate than the City overall, while the North Delaware (6.0) and Central Northeast (5.1) Districts had lower rates.¹⁵⁶

BREASTFEEDING

After being significantly lower than the State for several years, the percentage of Breastfeeding Mothers in Philadelphia County has increased over the past five years from 62.3% in 2011 to 80.9% in 2016.¹⁵⁷ The rate was statistically comparable to the State rate of 81.1%.¹⁵⁸

The percentage of Women Initiating Breastfeeding before hospital discharge in 2014 in the City of Philadelphia (77.3%) was lower for Black and Hispanic women (74.4% and 74.8% respectively), and higher for White (81.8%) and Asian women (85.3%).¹⁵⁹

TEEN PREGNANCY

The teen pregnancy rate per 1,000 females ages 15-17 in Philadelphia County has been decreasing from 55.7 in 2011 to 26.6 in 2016 in Philadelphia County, although it was still statistically higher than the State rate (10.6 in 2016).¹⁶⁰ The rate for ages 18-19 has been decreasing as well from 116.7 in 2011 to 69.8 in 2016. However, the rate remained above the State (38.1).¹⁶¹

The rate of Teen Births per 1,000 Teen Girls, 15-19 Years of Age in the City of Philadelphia has decreased from 59.1 in 2003 to 34.9 in 2014.¹⁶² The rate for Hispanic (58.9) and Black (43.1) teens is much higher than White (22.2) and Asian (8.0) teens. The rate in the City's Lower Northeast District (34.9) is equal to the City rate (34.9), while the City's North Delaware (31.9) and Central Northeast (19.8) District rates are lower than the City overall.¹⁶³

INFECTIOUS DISEASE

Pathogenic microorganisms, such as bacteria, viruses, parasites or fungi, cause infectious diseases; these diseases can be spread, directly or indirectly, from one person to another. These diseases can be grouped in three categories: diseases which cause high levels of mortality; diseases which place heavy burdens of disability on populations; and diseases which owing to the rapid and unexpected nature of their spread can have serious global repercussions.¹⁶⁴

WHAT THE COMMUNITY IS SAYING

Although not discussed at length by those participating in the primary research, the Focus Group participants identified the HIV/AIDS population, especially those with mental health and substance abuse, as an important community group in need because their issues often lead them stop receiving care and to become homeless.

OPPORTUNITIES FOR IMPROVEMENT

CHLAMYDIA

For the past six years, the Chlamydia rate per 100,000 population in Philadelphia County has been significantly higher than the State (445.4), although the rate has decreased from 2011 (1,332.3) to 1,275.7 in 2016. The current County rate was almost triple the State.¹⁶⁵

The Teen Chlamydia Rate per 100,000 Teens, 15-19 Years of Age for the City of Philadelphia has increased from 4,837 in 2015 to 5,050 in 2016.¹⁶⁶ The City's Lower Northeast District rate (4,946.5) is higher than the City's overall rate, in contrast to the North Delaware (3,329.0) and Central Northeast (1,913.2) District rates, which are lower than the City overall.¹⁶⁷

GONORRHEA

The Gonorrhea rate in Philadelphia County has been increasing from 440.0 in 2011 to 444.7 in 2016. This was three times higher than the State rate of 114.3.¹⁶⁹

NEW HIV CASES

The rate of newly diagnosed HIV cases in the Districts in the Jeanes Hospital Service Area (North Delaware (28.8), Lower Northeast (27.9), and Central Northeast (14.1)) are all lower than the City of Philadelphia rate (31.5) for the year 2016. The rates for Hispanic (49.0) and Black residents (48.0) are also higher than the City overall. Of note, the trend for the City overall has been decreasing (from 47.8 in 2012).¹⁷⁰

AREAS OF IMPROVEMENT

GONORRHEA

The Teen Gonorrhea Rate per 100,000 Teens, 15-19 Years of Age in the City of Philadelphia has been steadily decreasing since 2011 (1,966.0) to 1,168.0 in 2016. All of the City's District rates within the Jeanes Hospital service area, including Lower Northeast (1,091.9), North Delaware (712.3) and Central Northeast (390.9) Districts are lower than the City rate overall.¹⁷¹

EVER TESTED FOR HIV

The percentage of Adults ages 18-64 in Philadelphia County who Have Ever Been Tested for HIV has increased from 2011 (63.0%) to 65.0% in 2016.¹⁷² This was significantly higher than the State (41.0%).¹⁷³

For the City of Philadelphia, the percentage of Adults Never Tested for HIV, 18-39 Years of Age, has increased slightly between 2012 (23.2%) and 2014/15 (25.6%).¹⁷⁴ Asian (53.5%) and White (32.1%) Adults age 18-39 are more likely to Have Never Been Tested for HIV as compared to Hispanic (20.4%) and Black (15.0%) Adults as well as for the City's population overall (25.6%).¹⁷⁵

PNEUMONIA VACCINE

From 2011-2013 (66.0%) to 2013-2015 (64.0%), the percentage of Adults Age 65 or Older Who Have Ever Had a Pneumonia Vaccine was significantly lower than the State.¹⁷⁶ Since 2011-2013 (66.0%), the percentage increased to 70.0% (2015-2017) and was no longer significantly lower than the State (74.0%).¹⁷⁷

PRIORITIZATION

On March 7, 2019, the Jeanes Hospital Steering Committee met to review primary and secondary data collected and discussed the health needs and issues present across the Hospital's service area. During this meeting, 28 needs and issues were identified based on health, social, economic and other health disparities found in the data (differences in sub-populations, comparison to state, national or Healthy People 2020 goals, negative trends, or growing incidence). The individual needs and issues were categorized into themes related to the topic areas outlined in this CHNA including:

- Access to Healthcare;
- Chronic Disease;
- Mental Health;
- Substance Use Disorder/Tobacco Use;
- Physical Activity and Nutrition;
- Healthy Environment;
- Healthy Women, Mothers, Babies and Children; and
- Communicable Diseases.

Following the meeting, the Steering Committee completed a prioritization exercise using an online survey tool to rate all identified needs on a 1 to 10 scale for each of the selected criteria listed in **Table 3**.

Table 3: Prioritization Criteria

Item	Definition	Scoring		
		Low (1)	Medium (5)	High (10)
Magnitude of the Problem	The degree to which the problem leads to death, disability, or impaired quality of life and/or could be an epidemic based on the rate or % of population that is impacted by the issue	Low numbers of people affected; no risk for an epidemic	Moderate numbers/% of people affected and/or moderate risk	High numbers/% of people affected and/or risk for epidemic
Impact on Other Health Outcomes	The extent to which the issue impacts health outcomes and/or is a driver of other conditions	Little impact on health outcomes or other conditions	Some impact on health outcomes or other conditions	Great impact on health outcomes and other conditions
Capacity (systems and resources to implement evidence-based solutions)	This would include the capacity to and ease of implementing evidence-based solutions	There is little or no capacity (systems and resources) to implement evidence-based solutions	Some capacity (system and resources) exist to implement evidence-based solutions	There is solid capacity (system and resources) to implement evidence-based solutions in this area

Source: Jeanes Hospital Prioritization Exercise, 2019, Strategy Solutions, Inc.

Following the Steering Committee’s completion of the prioritization exercise, the consulting team analyzed all response scores and ranked results based on the overall composite score (highest to lowest) calculated by summing scores for each of the three criteria described above. The top ten identified needs based on the overall composite score are listed in **Table 4**. See *Appendix G* for the list of categorized needs and issues along with the entire prioritization results.

Table 4: Top 10 Ranked Needs of the Service Area as Ranked by the Jeanes Hospital Steering Committee

	Magnitude (M)	Impact (I)	Capacity (C)	TOTAL M+I+C	Ranking
Tobacco Use: Cigarette Smoking Among Adults	4.7	4.8	3.4	12.9	1
Chronic Disease: Cancer (including all screenings)	4.2	4.4	3.5	12.1	2
Chronic Disease: Obesity (all ages)	4.6	4.8	2.7	12.1	3
Mental Health/Substance Use Disorder: Illegal Drug/Prescription Drug Abuse/Addiction	4.4	4.8	2.8	12.0	4
Chronic Disease: Diabetes	4.0	4.5	3.4	11.9	5
Chronic Disease: Cardiovascular Disease/Heart Attack	4.3	4.4	3.0	11.7	6
Access to Health Care: Poverty	4.5	4.7	2.3	11.5	7
Chronic Disease: High Blood Pressure	3.9	4.2	3.3	11.4	8
Communicable Diseases: Influenza/Pneumonia	3.4	3.9	4.0	11.3	9
Mental Health/Substance Use Disorder: Poor Mental Health/Depression	4.3	4.6	2.3	11.2	10

Source: Jeanes Hospital Prioritization Exercise, 2019, Strategy Solutions, Inc.

On April 12, 2019, members of Jeanes Hospital's Steering Committee met to discuss the prioritization results and identified four (4) areas of focus as a Hospital in order to address the immediate community's health issues and care needs:

- Chronic disease management;
- Access to healthcare;
- Mental health access and education; and
- Substance use disorder treatment and education.

These four general areas are in-line with the priority areas identified and addressed in the Hospital's 2016 CHNA.

Over the next few months, Jeanes Hospital will be developing a new Implementation Strategy based on its 2019 CHNA. Through a consensus-building process that includes clinical and administrative Hospital staff, Jeanes will confirm and provide more details around its priorities. In so doing, the Hospital will consider root causes of issues, internal resources, resources of affiliated members of the Temple Health family, academic resources of Temple University, external community resources, the community's ability to respond to these issues, and the public health consequences of not responding to an issue.

Through use of the Philadelphia Department of Health's data and educational resources, Jeanes Hospital will continue to work with the City of Philadelphia toward the achievement of mutual goals. Jeanes Hospital will also align its efforts with the Temple Center for Population Health to help achieve the goals of the United States Department of Health and Human Services' three-part aim of achieving better care for patients, better health for our communities, and lower costs through health care system improvement.

REVIEW AND APPROVAL

The 2019 CHNA was presented and approved by the Jeanes Hospital Board of Directors on May 16, 2019. The Jeanes Hospital 2019 CHNA is posted on the Jeanes Hospital website (www.templehealth.org/locations/jeanes-hospital/about/community-health). To request a printed copy contact: communityhealth@spprd.templehealth.org.

⁹ Healthy People is a set of goals and objectives with 10-year targets designed to guide national health promotion and disease prevention efforts to improve the health of all people in the United States. Healthy People reflects the idea that setting objectives and providing science-based benchmarks to track and monitor progress can motivate and focus action. Its comprehensive set of objectives and targets is used to measure progress for health issues in specific populations and serves as (1) a foundation for prevention and wellness activities across various sectors and within the federal government, and (2) a model for measurement at the State and local levels.

Type II Diabetes, Students (School Year End)	0.09%	0.09%	*	0.09%	0.08%	0.08%	-	+			0.05%	0.04%	*	0.03%	0.03%	0.03%	-	+			0.06%			
Lyme Disease Rate per 100,000	10.7	8.5	9.3	6.7	11.9	9.5	-	-			53.6	30.7	37.9	47.0	48.3	73.7	+	-			89.5			
Alzheimer's Disease Mortality Rate per 100,000	11.4	13.1	9.1	9.1	13.5	13.3	+	-	-		16.5	14.3	14.1	12.2	14.2	18.4	+	-	-		21.6	25.4		
HEALTHY ENVIRONMENT																								
Student Health Asthma (School Year End)	17.9%	18.7%	19.2%	11.2%	19.7%	18.6%	+	+			10.6%	12.0%	13.1%	12.4%	12.6%	12.2%	+	+			12.1%			

*: For the Diabetes reports for students in the state, in 2012-2013 the report had just a blank column for those with type II diabetes

ND = Not Displayed. Age-adjusted rates will not be shown for counts < 20 due to unreliability of such calculations based on small numbers. For similar reasons all other rates, ratios, or percentages will not be shown for counts < 10. If the population is less than 300 then the frequency count and rate will be suppressed.

Note: Unknowns excluded in calculations. A percent that appears in red for a region denotes a significantly higher value compared to the state's corresponding percent. A percent in blue denotes a significantly lower value conclusions."

2016-year for those rates

2015-year for those rates

*: For the Diabetes reports for students in the state, in 2012-2013 the report had just a blank column for those with type II diabetes

ND = Not Displayed. Age-adjusted rates will not be shown for counts < 20 due to unreliability of such calculations based on small numbers. For similar reasons all other rates, ratios, or percentages will not be shown for counts < 10. If the population is less than 300 then the frequency count and rate will be suppressed.

Note: Unknowns excluded in calculations. A percent that appears in red for a region denotes a significantly higher value compared to the state's corresponding percent. A percent in blue denotes a significantly lower value interpretations, or conclusions."

Appendix C

Jeanes Hospital Focus Group Guide

Community Health Needs Assessment

Temple University Health System **Jeanes Hospital** FOCUS GROUP FACILITATION GUIDE

PURPOSE: GATHER COMMUNITY INPUT AND FEEDBACK ON COMMUNITY HEALTH STATUS AND HEALTH NEEDS, ACCESS TO SERVICES, AND POTENTIAL SOLUTIONS.

FEEDBACK USED TO REPORT RESULTS OF THE JEANES HOSPITAL 2019 COMMUNITY HEALTH NEEDS ASSESSMENT

This Focus Group is designed to last 1.5-2 hours and is broken into 5 sections:

- A. Introduction [5-10 minutes]**
- B. Overall Community Health Status [5 minutes]**
- C. Community Health Needs [35 minutes]**
- D. Access to Services [20 minutes]**
- E. Potential Solutions [20 minutes]**

A. Introduction [5-10 minutes depending on group size]

This guide assists Strategy Solutions, Inc. Personnel with the facilitation of the Community Health Focus Groups.

Please use this document for guidance, adjusting according to your audience, i.e., going into more explanation or depth, modifying a word, etc. when necessary.

Key Definitions

OptionFinder: Digital audience response polling system used to build participants' responses into a list and to vote on select questions.

Open Ended Discussion: Open dialogue discussion facilitated by SSI personnel. Participant input is not built into OptionFinder but recorded by the SSI personnel acting as the note taker during the session.

Equipment/Set Up

Equipment Needed: Projector, screen and podium (provided by host, podium only needed for groups 10+), OptionFinder voting control pads (provided by SSI). The software is on SSI laptops and must be run off the laptops.

SSI representative will work with hospital contact coordinating Focus Group prior to the Focus Group to ensure the following a projector, screen, room, chairs, etc. is available.

Room Set Up: U-shape with participants sitting in U chair formation, 2 facilitators should sit/stand at the front of the group.

A notetaker will also be in the room to record the open-ended discussions [an SSI employee will be the note taker].

Focus Group Process Talking Points

1. Hospital Representative
 - a. Welcomes group
 - b. Emphasizes importance of participants' involvement and value they bring to needs assessment process
 - c. Introduces SSI Personnel
 - d. Leaves Focus Group, so people can answer freely
2. SSI Representative
 - a. Welcomes group
 - b. Explains purpose of CHNA (IRS Requirement)
 - c. Explains this is part of primary data collection
 - d. Explains data will be used in the needs assessment and implementation strategy process

FOCUS GROUP GUIDE

- e. Reiterates importance of group's honest and open feedback
- f. Asks everyone to take a brief moment to introduce themselves and identify the agency they represent [remind that in the interest of time, introduction should take less than a minute]
- g. Explains OptionFinder audience response polling system and how Focus Group will be conducted using this software [both with the ranking and open dialogue discussions]
 - Inform participants that you will be building some of their question responses into the OptionFinder which they may also be asked to rate the level of identified community problems, potential solutions and who may be best suited to address.
 - Note some discussion will be recorded by the notetaker and not built into OptionFinder.
- h. Asks participants in interest of time (1-1/2 - 2 hours for the Focus Group) to limit feedback to 2 minutes so everyone is heard and all questions are completed.
- i. Review Agenda [on the welcome slide of the OptionFinder software program]
- j. Ask for any questions prior to beginning Focus Group

3. Facilitator begins Focus Group by having participants use OptionFinder to select which group best represents them:
 - a. Not-For Profit Community Agency
 - b. For Profit Business
 - c. Education
 - d. Healthcare
 - e. Government
 - f. Faith Based Organization
 - g. Community Member/Volunteer
 - h. Other

B. Overall Community Health Status [5 Minutes]

1. Overall, how would you rate the health status of your community? **[Facilitator Note: Prompt participants to think about the populations served by their agency or business].** Would you say, in general, that your community's health status is **[OPTIONFINDER VOTING]**:
 - (5) Excellent
 - (4) Very Good
 - (3) Good
 - (2) Fair or
 - (1) Poor

[Facilitator Note: Show results from OptionFinder vote]

2. Why do you say that? **[OPEN-ENDED DISCUSSION]**
3. What do you think would improve the health of the community? **[OPEN-ENDED DISCUSSION]**

C. Community Health Needs [35 Minutes]

1. Based on your experience in your community, what do you think is the single biggest community health need? **[BUILD LIST INTO OPTIONFINDER]**

Facilitator Notes:

Explain you are going to build the information participants share into a list of responses within the OptionFinder. Once the response list is built, participants are asked to vote on how much of a problem they think each is using the OptionFinder responses below

Prompt for more information after each response

2. Why do you say that? **[OPEN-ENDED DISCUSSION]**

Facilitator Note: *Once participants have built the list of health needs ask them to pick up their keypads and ask the following:*

3. How much of a problem do you think each is in this community?

[OPTIONFINDER VOTING]

(3) Very Serious Problem

(2) Somewhat of a Problem

(1) Not a Problem

(0) Don't Know **[Facilitator Note:** *tell Respondents to respond "0" they will need to hit the "*" key]*

4. What social and economic factors, such as housing, employment, etc. are negatively impacting the health of our community? **[BUILD LIST INTO OPTIONFINDER]**

Facilitator Notes:

Explain you are going to build information participants share into a list of responses within the OptionFinder. Once the response list is built, participants are asked to vote on how much of a problem they think each is using the OptionFinder responses below]

Once participants have built the list of factors ask them to pick up their keypads and ask the following:

5. How much of a problem do you think each factor is in the community?

[OPTIONFINDER VOTING]

(3) Very Serious Problem

(2) Somewhat of a Problem

(1) Not a Problem

(0) Don't Know **[Facilitator Note:** *tell Respondents to respond "0" they will need to hit the "*" key]*

6. What, if anything, is your organization doing to identify and address these social and economic factors? **[OPEN-ENDED DISCUSSION]**

D. Access to Services [20 Minutes]

1. What are the most needed programs/services in the community? [**BUILD INTO OPTIONFINDER**]

Facilitator Notes:

Explain you are going to build information participants share into a list of responses within the OptionFinder. Once the response list is built, participants are asked to vote on the extent they think each is currently available in the community using the OptionFinder responses below]

Once participants have built the list of factors ask them to pick up their keypads and ask the following:

2. To what extent are these programs/services available in the community? [**OPTIONFINDER VOTING**]
 - (1) This program/service is not available in the community
 - (2) This program/service is available in the community but is not adequately addressing the need (i.e. not enough providers, missing program components, limited acceptance of insurance, not available to all populations, etc..)
 - (3) This program/service is available in the community and is adequately addressing the need
 - (0) Don't Know [**Facilitator Note:** Tell Respondents to respond "0" they will need to hit the "*" key]
3. How important is each of these to focus on over the next 3 years? [**OPTIONFINDER VOTING**]
 - (1) Not Important
 - (2) ...
 - (3) Somewhat Important
 - (4) ...
 - (5) Extremely Important
4. Who do you think should take the lead on each? [OPTIONFINDER]
 - (0) The System should take the lead on this
 - (1) The hospital should take the lead on this
 - (2) The hospital should collaborate with another community agency and co-lead this [**Facilitator Note:** Explain a community agency could include a nonprofit, faith based, educational or governmental entity in your community]
 - (3) A community agency should take the lead on this

[Go through each of the leads to ask the following questions:]

- What does this lead organization look like?
 - Does anyone have a contact?
 - Would you be willing to take the lead (if present)?
5. What are the reasons current or past solutions have not worked in the community? **[OPEN-ENDED DISCUSSION]**
5. How well is **Jeanes Hospital** addressing these services or programs? **[OPEN-ENDED DISCUSSION]**
6. What barriers are there to these programs/services? **[OPEN-ENDED DISCUSSION]**
7. What advice would you give those of us who are working on this community assessment? **[OPEN-ENDED DISCUSSION]**

Appendix D
Jeanes Hospital Key Informant Survey

KEY INFORMANT SURVEY

Jeanes Hospital - Key Informant Survey

The Community Health Needs Assessment (CHNA) process is strengthened by soliciting feedback from a variety of different community members. The information gathered is extremely valuable. We would like to invite you to participate in the following key informant survey to help us identify pressing health issues in our community. The survey should only take a few minutes to complete and the information you provide will be anonymous. We ask that you please complete the key informant survey by December 28, 2018. The information gathered from this survey will be used to identify health needs in the community and as a basis for the implementation strategy action plan.

Thank you in advance for participating in our CHNA process!

1. Please select your primary community affiliation:

- | | |
|---|---|
| <input type="checkbox"/> Non-Profit/Social Service Organization | <input type="checkbox"/> Government/Housing/Transportation Sector |
| <input type="checkbox"/> Health Care/Public Health Organization | <input type="checkbox"/> Mental/Behavioral Health Organization |
| <input type="checkbox"/> Education/Youth Services | <input type="checkbox"/> Faith-Based Organization |
| <input type="checkbox"/> Community Member | <input type="checkbox"/> Cultural Organization |
| <input type="checkbox"/> Business Sector | <input type="checkbox"/> Jeanes Hospital Staff/Employee |
| <input type="checkbox"/> Other (please specify) | |

KEY INFORMANT SURVEY

Jeanes Hospital - Key Informant Survey

2. What are the top health issues you see in your community? Please choose the top 3 health issues from the list below.

	1	2	3
Access to Care/Uninsured	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Cancer	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Diabetes	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Heart Disease	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Lesbian, Gay, Bi-Sexual, Transgender, Questioning (LGBTQ) Health	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Maternal/Infant Health	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Mental Health	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Overweight/Obesity	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Sexually Transmitted Diseases	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Stroke	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Substance Abuse/Alcohol Abuse	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Other (please specify below)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

3. Other, please specify:

4. Please share your reasons for selecting these three health issues:

KEY INFORMANT SURVEY

Jeanes Hospital - Key Informant Survey

5. Please rate your level of agreement with the following statements:

	Strongly Disagree	Disagree	Neither Agree nor Disagree	Agree	Strongly Agree	Don't Know Enough to Respond
Primary Care: Residents in the area are able to access a primary care provider when needed (Family Doctor, Pediatrician, General Practitioner)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Specialty Care: Residents in the area are able to access a medical specialist when needed (Cardiologist, Dermatologist, Neurologist, etc.)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Medicaid/Medical Assistance: There is a sufficient number of providers accepting Medicaid/Medical Assistance in the area	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Bi-lingual Providers: There is a sufficient number of bi-lingual providers in the area	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Mental Health/Behavioral Health Providers: There is a sufficient number of mental/behavioral health providers in the area	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Transportation: Transportation for medical appointments is available to area residents when needed	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Mental Health Services: There is a sufficient number and range of mental health services in the area	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

KEY INFORMANT SURVEY

	Strongly Disagree	Disagree	Neither Agree nor Disagree	Agree	Strongly Agree	Don't Know Enough to Respond
<u>Access Mental Health Services:</u> Community members know how to access local mental health services	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<u>Substance Use Services:</u> There is a sufficient number and range of substance abuse resources in the area.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<u>Opioid Epidemic:</u> The local community is doing well managing the nationwide opioid epidemic	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

KEY INFORMANT SURVEY

Jeanes Hospital - Key Informant Survey

6. What are the most significant social and economic factors that keep people in the community from accessing health care? Please pick the top 3 factors from the list below.

	1	2	3
Availability of Providers/Medical Appointments	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Inability to Navigate Health Care System	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Inability to Pay Out of Pocket Expenses (Co-pays, Prescriptions, etc.)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Lack of Child Care	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Lack of Employment	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Lack of Health Insurance Coverage	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Lack of Housing	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Lack of Transportation	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Lack of Trust	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Language/Cultural Barriers	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Limited Educational Attainment	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Limited Financial Resources	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Time Limitations (Long Wait Times, Limited Office Hours, Time off Work)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
None/No Barriers	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Other (please specify below)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

7. Other, please specify:

KEY INFORMANT SURVEY

8. Please share your reasons for selecting these three barriers.

KEY INFORMANT SURVEY

Jeanes Hospital - Key Informant Survey

9. Which populations do you think are underserved? Please check the Top 3 populations you think are underserved.

- | | |
|--|---|
| <input type="checkbox"/> Black/African American | <input type="checkbox"/> Low-Income/Poor |
| <input type="checkbox"/> Children/Youth | <input type="checkbox"/> Pregnant Women |
| <input type="checkbox"/> Disabled | <input type="checkbox"/> Seniors/Aging/Elderly |
| <input type="checkbox"/> Hispanic/Latino | <input type="checkbox"/> Uninsured/Underinsured |
| <input type="checkbox"/> Homeless | <input type="checkbox"/> Young Adults |
| <input type="checkbox"/> Immigrant/Refugee | <input type="checkbox"/> None |
| <input type="checkbox"/> Lesbian, Gay, Bi-sexual, Transgender, Questioning (LGBTQ) | |
| <input type="checkbox"/> Other (please specify) | |

KEY INFORMANT SURVEY

Jeanes Hospital - Key Informant Survey

10. In general, where do you think most uninsured and underinsured individuals living in the area go when they are in need of medical care?

- Doctor's Office/Primary Care Physician
- Walk-In/Urgent Care Center
- Health Clinic/Federally Qualified Health Clinic (free or sliding scale clinic)
- Don't Know
- Hospital Emergency Department
- Other (please specify)

11. Please share any additional information/comments regarding uninsured/underinsured individuals and/or underserved populations:

KEY INFORMANT SURVEY

Jeanes Hospital - Key Informant Survey

12. Please identify the top 3 key resources or services you feel are needed to improve access to health care for residents in the community:

	1	2	3
Bi-lingual Services	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Free/Low Cost Medical Care	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Health Education/Information/Outreach	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Health Screenings	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Medical Specialists	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Mental Health Services	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Prescription Assistance	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Primary Care Providers	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Substance Abuse Services	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Transportation	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
None	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Other (please specify)

KEY INFORMANT SURVEY

Jeanes Hospital - Key Informant Survey

13. In your opinion, what is being done **well** in the community in terms of health and quality of life?

14. What recommendations do you have to improve health and quality of life in the community?

15. Please feel free to share any other comments you have:

Thank you for participating!

Appendix E
Hospital Resource Listing

Jeanes Hospital Resources and Services

The following are listed on the Jeanes Hospital website as of May, 2019 as services available:

Acupuncture Program	Burn Center	Dermatology
Addiction Medicine	Cancer Care	Diabetes Prevention Program
Advanced Heart Failure, Circulatory Support & Transplantation Program (Heart & Vascular Institute)	Cardiac Sarcoidosis Program (Heart & Vascular Institute)	Diabetes Program
Airway Disorders Program (Lung Center)	Cardio-Oncology Program (Heart & Vascular Institute)	Digestive Disease Center
Allergies Program (Lung Center)	Cardiology (Heart & Vascular Institute)	Ear, Nose & Throat Services (Head & Neck Institute)
Allergy & Sinus Center (Head & Neck Institute)	Cardiomyopathy & Cardiac Genetics Program (Heart & Vascular Institute)	Electrophysiology (Heart & Vascular Institute)
Anesthesiology	Cardiovascular Imaging (Heart & Vascular Institute)	Emergency Medicine
Aortic Disease Program (Heart & Vascular Institute)	Cardiovascular Surgery (Heart & Vascular Institute)	Endocrinology, Diabetes & Metabolism
Arrhythmia Program (Heart & Vascular Institute)	Chronic Bronchitis Program (Lung Center)	Epilepsy Program (Neurosciences Center)
Bariatric Program	Chronic Cough Program (Lung Center)	Esophageal Disorders Program (Digestive Disease Center)
Bloodless Care Program	Clinical Genetics (Fox Chase Cancer Center)	Family Medicine
Bone Marrow Transplant Program (Fox Chase Cancer Center)	Colorectal Surgery Program (Digestive Disease Center)	Foot & Ankle Surgery (Orthopaedics & Sports Medicine Program)
Brain & Spinal Tumor Program (Fox Chase Cancer Center)	Congenital Heart Disease Program (Heart & Vascular Institute)	Fox Chase Cancer Center
Brain & Spinal Tumor Program (Temple)	COPD Program (Lung Cancer)	Fox Chase Cancer Center at Temple University Hospital
Breast Cancer Program (Fox Chase Cancer Center)	Coronary Artery Disease Program *Heart & Vascular Institute)	Fox Chase Cancer Center Pharmacy
Breast Cancer Program (Temple)	Crisis Response Center	Gastroenterology
Bronchiectasis Program (Lung Center)	Critical Care (Lung Center)	Gastroenterology & Hepatology (Digestive Disease Center)
		Gastrointestinal Cancer Program (Fox Chase Cancer Center)

Gastrointestinal Cancer Program (Temple)	Internal Medicine	Melanoma & Skin Cancer Program (Fox Chase Cancer Center)
Genitourinary Cancer Program (Fox Chase Cancer Center)	Interstitial Lung Disease Program (Lung Center)	Mitral Valve Disease Program (Heart & Vascular Institute)
Gynecologic Cancer Program (Fox Chase Cancer Center)	Interventional Cardiology (Heart & Vascular Institute)	Motility Disorders Program (Digestive Disease Center)
Gynecologic Cancer Program (Temple)	Interventional Pulmonology Program (Lung Center)	Movement Disorders Program (Neurosciences Center)
Gynecology	Interventional Radiology	Nephrology
Hand & Upper Extremity Surgery (Orthopaedics & Sports Medicine Program)	Jeanes Hospital Pharmacy	Neurology (Neurosciences Center)
Head & Neck Cancer Program (Fox Chase Cancer Center)	Joint Replacement (Orthopaedics & Sports Medicine Program)	Neuromuscular Disease Program (Neurosciences Center)
Head & Neck Cancer Program (Temple)	Kidney Transplant (Transplant Program)	Neurosciences Center
Head & Neck Institute	Limb Salvage Center (Heart & Vascular Institute)	Neurosurgery (Neurosciences Center)
Hearing & Balance Center (Head & Neck Institute)	Liver Transplant (Transplant Program)	Nutrition
Heart & Vascular Institute	Lung Cancer Program (Fox Chase Cancer Center)	OB/GYN & Reproductive Endocrinology
Heart Transplant (Heart & Vascular Institute)	Lung Cancer Program (Temple)	Obstetrics
Hematologic Cancer Program (Fox Chase Cancer Center)	Lung Cancer Screening Program (Fox Chase Cancer Center)	Occupational Health (Temple)
Hematology	Lung Cancer Screening Program (Lung Cancer)	Occupational Lung Disease Program (Lung Center)
Hepatology	Lung Center	Oncology
HIV Program	Lung Nodule Clinic (Lung Center)	Ophthalmology
Hospital Medicine	Lung Transplant Program (Lung Center)	Oral & Maxillofacial Surgery
Infant Intensive Care Nursery	Maternity Care	Orthopaedic Surgery
Infectious Diseases	MDA/ALS Center of Hope (Neurosciences Center)	Orthopaedic Trauma (Orthopaedics & Sports Medicine Program)
Infertility/Reproductive Endocrinology	Medical Oncology	Orthopaedics & Sports Medicine Program
Inflammatory Bowel Disease Program (Digestive Disease Center)		Otolaryngology/ENT
		Pain Management
		Palliative Care

Pancreas Transplant (Transplant Program)
 Pancreatic Cancer Institute at Fox Chase Cancer Center
 Pathology & Laboratory Medicine
 Pediatrics
 Peripheral Arterial Disease Program (Heart & Vascular Institute)
 Peripheral Venous Disease Program (Heart & Vascular Institute)
 Pharmacy
 Physical Medicine & Rehabilitation
 Physical Therapy (Orthopaedics & Sports Medicine Program)
 Plastic Surgery
 Podiatry
 Population Health
 Preventive Cardiology & Integrative Heart Health Program (Heart & Vascular Institute)
 Primary Care
 Psychiatry
 Pulmonary Embolism Response Team (Lung Center)
 Pulmonary Embolus Program (Heart & Vascular Institute)
 Pulmonary Hypertension Program (Lung Center)
 Pulmonary Hypertension, Right Heart Failure & CTEPH/PTE Program (Heart & Vascular Institute)

Pulmonology
 Pulmonology Program (Lung Center)
 Radiation Oncology
 Radiology
 Reproductive Endocrinology
 Rheumatology

Table 19 outlines Jeanes Hospital's utilization for Ambulatory Care Sensitive Conditions in the Emergency Department only based on primary diagnosis code for 2016, 2017 and the first six months of 2018.

Table 19: Ambulatory Care Sensitive Conditions- Emergency Department Only (Primary DX Code)

ACUTE CONDITIONS	2016	2017	2018 (6 Months)
Cellulitis of head [any part, except face]	1		
Cellulitis of other sites	4	2	7
Cellulitis of unspecified finger	70	64	2
Cellulitis of unspecified toe	4	8	1
Acute lymphangitis of neck			1
Acute pharyngitis, unspecified	46	124	158
Acute tonsillitis, unspecified	227	191	3
Acute upper respiratory infection, unspecified	323	501	202
Cellulitis of buttock	26	17	4
Cellulitis of face	20	19	12
Cellulitis of neck	4	3	1
Cellulitis of trunk, unspecified	5	10	
Cellulitis of unspecified part of limb	108	123	1
Cellulitis, unspecified	326	302	48
Chronic pharyngitis		2	
Female pelvic inflammatory disease, unspecified	19	22	13
Hypoglycemia, unspecified	15	14	17
Local infection of the skin and subcutaneous tissue, unspecified	68	56	19
Noninfective gastroenteritis and colitis, unspecified		8	13
Other local infections of the skin and subcutaneous tissue	1	2	
Other specified female pelvic inflammatory diseases			2
Other specified noninfective gastroenteritis and colitis	206	202	2
Otitis media, unspecified, unspecified ear	167	171	
Pneumonia due to other specified infectious organisms		6	3
Post traumatic seizures		1	1
Pyoderma		2	2
Pyogenic granuloma		1	
Salpingitis and oophoritis, unspecified		1	
Simple febrile convulsions	1	4	

AMBULATORY CARE SENSITIVE CONDITIONS

ACUTE CONDITIONS	2016	2017	2018 (6 Months)
Suppurative otitis media, unspecified, unspecified ear	1	3	
Unspecified bacterial pneumonia	64	39	
Unspecified convulsions	82	98	33
Urinary tract infection, site not specified	457	577	347

Table 20 outlines Jeanes Hospital’s utilization for Acute Dental conditions based on primary diagnosis code for 2016, 2017 and the first six months of 2018.

Table 20: Acute Dental Conditions

ACUTE CONDITIONS	2016	2017	2018 (6 Months)
Acute gingivitis, non	3	1	
Acute gingivitis, plaque induced	1		
Aggressive periodontitis, unspecified		1	
Cellulitis and abscess of mouth	23	23	6
Chronic gingivitis, plaque induced	4	4	
Chronic periodontitis localized	1		
Cracked tooth		6	7
Dental caries on pit and fissure surface limited to enamel		1	
Dental caries, unspecified	54	79	11
Dental root caries		7	7
Disease of hard tissues of teeth	2	1	
Diseases of lips	1	2	1
Disorder of teeth and supporting structures, unspecified	99	99	48
Erosion of teeth			1
Gingival recession			1
Iron deficiency anemia, unspecified	14	7	
Open restoration of margins of tooth		1	
Other forms of stomatitis		3	1
Other lesions of oral mucosa	13	23	19
Other oral mucositis (ulcerative)	3	4	
Other periodontal diseases	1	1	
Other specified disorders of teeth and supporting structures	1		
Partial loss of teeth due to trauma, unspecified class	1		
Periapical abscess with sinus	6	9	1
Periapical abscess without sinus	45	55	2
Recurrent oral aphthae	6	3	3
Retained dental root		1	1
Unspecified lesions of oral mucosa		1	3

AMBULATORY CARE SENSITIVE CONDITIONS

ACUTE CONDITIONS	2016	2017	2018 (6 Months)
Varicella without complication	2	1	
Whooping cough, unspecified species without pneumonia	2

Table 21 outlines Jeanes Hospital’s utilization for Acute Ambulatory Care Sensitive conditions based on primary diagnosis code for 2016, 2017 and the first six months of 2018.

Table 21: Acute Primary Care Sensitive Conditions

ACUTE CONDITIONS	2016	2017	2018 (6 Months)
Acute diastolic (congestive) heart failure		3	
Acute pulmonary edema	1	1	
Chronic obstructive pulmonary disease w (acute) exacerbation	50	91	9
Cough variant asthma		4	12
Acute bronchitis, unspecified	259	242	5
Acute coronary thrombosis not resulting in myocardial infarction		1	
Acute on chronic combined systolic and diastolic heart failure			1
Acute on chronic systolic (congestive) heart failure		1	1
Angina pectoris, unspecified	2		
Bronchiectasis with (acute) exacerbation	1	2	
Chronic obstructive pulmonary disease w acute lower respiratory infarction	2	2	
Chronic obstructive pulmonary disease, unspecified	18	27	
Emphysema, unspecified		2	
Epilepsy, unsp, not intractable, with status epilepticus	1	4	
Epilepsy, unsp, not intractable, without status epilepticus	2	1	
Epilepsy, unspecified, intractable, with status epilepticus		1	1
Essential (primary) hypertension	183	243	135
Exercise induced bronchospasm		1	
Gen idiopathic epilepsy, not intractable, w/o stat epi	21	20	
Heart failure, unspecified	1		1
Left ventricular failure	1		
Local	2	1	1
Mild intermittent asthma with (acute) exacerbation		23	51
Mild intermittent asthma, uncomplicated		3	4
Mixed simple and mucopurulent chronic bronchitis		1	1
Mucopurulent chronic bronchitis	4	3	
Other asthma	42	42	

AMBULATORY CARE SENSITIVE CONDITIONS

ACUTE CONDITIONS	2016	2017	2018 (6 Months)
Other epilepsy, not intractable, without status epilepticus			1
Other forms of angina pectoris		1	
Simple chronic bronchitis	2	6	3
Type 1 diabetes mellitus with hyperglycemia (combination)	5	7	2
Type 1 diabetes mellitus with ketoacidosis without coma	3		
Type 1 diabetes mellitus without complications	1	4	
Type 2 diabetes mellitus with foot ulcer	3		
Type 2 diabetes mellitus with hyperglycemia (combination)	3	7	8
Type 2 diabetes mellitus with hypoglycemia without coma	2	1	
Type 2 diabetes mellitus without complications	5	8	
Unspecified asthma with (acute) exacerbation	272	378	80
Unspecified asthma with status asthmaticus	2	1	
Unspecified asthma, uncomplicated	16	11	
Unspecified chronic bronchitis		1	1
Unstable angina	1		1

Appendix H Prioritization Exercise Results

PRIORITIZATION EXERCISE RESULTS

Table 22 identifies the identified needs in alphabetical order by topic area that were used in the prioritization exercise.

TABLE 22: 2019 IDENTIFIED NEEDS IN ALPHABETICAL ORDER

Access to Health Care: Aging Population Health Needs
Access to Health Care: Health Insurance Issues (copays/deductibles/affordability)
Access to Health Care: Lack of Education/Health Literacy
Access to Health Care: Lack of PCPs/Specialists
Access to Health Care: Lack of Transportation
Access to Health Care: Poverty
Chronic Disease: Cancer (including all screenings)
Chronic Disease: Cardiovascular Disease/Heart Attack
Chronic Disease: Diabetes
Chronic Disease: Obesity (all ages)
Chronic Disease: High Blood Pressure
Communicable Diseases: Adult Immunizations
Communicable Diseases: Child Immunizations
Communicable Diseases: Influenza/Pneumonia
Healthy and Safe Environment: Affordable and Adequate Housing
Healthy and Safe Environment: Asthma
Healthy and Safe Environment: Disconnected Youth
Healthy and Safe Environment: Lack of Community Fluoridated Water/Fresh, Available Drinking Water
Healthy and Safe Environment: Lack of Safe Roads and Sidewalks
Healthy Women, Infants, Children: Affordable/Access to Early Childhood Care and Quality After School Programs
Healthy Women, Infants, Children: Teen Pregnancy
Healthy Women, Infants, Children: Childhood Obesity
Mental Health/Substance Use Disorder: Illegal Drug/Prescription Drug Abuse/Addiction
Mental Health/Substance Use Disorder: Lack of Mental Health Providers
Mental Health/Substance Use Disorder: Alcohol Abuse - Adults
Mental Health/Substance Use Disorder: Alcohol Impaired Driving Deaths
Mental Health/Substance Use Disorder: High Risk Youth (6th Grade)
Mental Health/Substance Use Disorder: Insufficient Sleep
Mental Health/Substance Use Disorder: Lack of Addiction Services
Mental Health/Substance Use Disorder: Poor Mental Health/Depression
Mental Health/Substance Use Disorder: Suicide
Mental Health/Substance Use Disorder: Trauma Informed Care and ACES
Physical Activity/Nutrition: Physical Inactivity/Access to Recreational Opportunities
Physical Activity/Nutrition: Food Insecurity/Access to Healthy Foods
Tobacco Use: Cigarette Smoking Among Adults

PRIORITIZATION EXERCISE RESULTS

Table 23 identifies the results of the prioritization in rank order.

TABLE 23: 2019 PRIORITIES IN RANK ORDER

	Magnitude (M)	Impact (I)	Capacity (C)	TOTAL M+I+C	Ranking
Chronic Disease: Cardiovascular Disease (heart disease, cholesterol, etc.)	7.6	8.6	7.5	23.8	1
Chronic Disease: Diabetes	7.8	8.9	7.0	23.7	2
Chronic Disease: Overweight/Obesity	8.5	8.9	6.0	23.4	3
Chronic Disease: Education on Disease Management	8.3	8.8	5.5	22.7	4
Chronic Disease: Cancer	6.9	8.5	7.0	22.4	5
Chronic Disease: Cerebrovascular Disease	6.6	8.5	7.1	22.1	6
Access to Quality Health Services: Know What is Available and How to Access/Navigate the Services (Access/Mental Health/Substance Abuse), Including Discharge Information and Assisting Seniors	8.4	8.2	5.4	22.0	7
Substance Use Disorder: Substance Abuse/Alcohol Abuse and Deaths - Adults and Youth	9.1	8.6	3.2	20.9	8
Mental Health: Lack of Mental Health Providers	8.7	8.6	3.4	20.7	9
Access to Quality Health Services: Health Insurance Issues: High Deductibles and Copays/Affordability/Uninsured and Underinsured/Health Care Costs/Medication Costs	7.8	8.5	4.4	20.7	10
Access to Quality Health Services: Availability of Providers and Specialists - Number of Providers, Convenient Hours, Wait Times	7.1	8.2	5.4	20.7	11
Access to Quality Health Services: Language and Cultural Accessibility, Including Need for Translators	6.8	8.0	5.7	20.5	12
Mental Health: Access to Behavioral Health Treatment in Mainstream Hospitals	8.7	8.6	3.3	20.5	13
Mental Health: Mental/Behavioral Health Issues,	7.8	8.5	3.6	19.9	14

PRIORITIZATION EXERCISE RESULTS

	Magnitude (M)	Impact (I)	Capacity (C)	TOTAL M+I+C	Ranking
Including Suicide/Screenings/Stigma					
Physical Activity/Nutrition: Food Insecurity/Access to Healthy Foods/Nutrition/More Healthy Options at Food Banks	7.3	7.7	4.6	19.7	15
Substance Use Disorder: First Aid Training Around Narcan	7.3	8.3	4.1	19.6	16
Mental Health: Lack of Inpatient Beds	7.8	7.8	3.9	19.5	17
Physical Activity/Nutrition: Lack of Physical Exercise/Leisure Time	7.1	7.3	5.0	19.4	18
Access to Quality Health Services: Caregiver Support Services	7.3	7.6	4.0	18.9	19
Substance Use Disorder: Smoking and Vaping - Adults and Youth	7.3	8.1	3.4	18.9	20
Access to Quality Health Services: Program Funding	7.0	7.3	4.0	18.3	21
Healthy Environment: Those Living in Poverty/Poverty in General	7.3	7.9	3.0	18.2	22
Access to Quality Health Services: Transportation	6.4	7.3	4.1	17.8	23
Access to Quality Health Services: Community Resources/Health Centers	6.1	6.8	4.5	17.4	24
Substance Use Disorder: Recovery Homes for All Ages	7.1	7.5	2.8	17.3	25
Healthy Environment: Lack of Safe and Affordable Housing/Homelessness	6.7	7.6	3.0	17.3	26
Healthy Environment: Gun Violence/Mortality	6.3	7.5	3.0	16.7	27
Access to Quality Health Services: Community Partnerships	5.8	6.2	4.5	16.4	28
