JEANES HOSPITAL

2016 COMMUNITY HEALTH NEEDS ASSESSMENT

I. INTRODUCTION TO THE ASSESSMENT

The **purpose** of the needs assessment is to **identify and prioritize community health needs** so that the hospital can develop strategies and implementation plans that benefit the public as well as satisfy the requirements of the Affordable Care Act.

ABOUT JEANES HOSPITAL

Jeanes Hospital was founded in 1928 by a bequest in the will of Philadelphia Quaker leader Anna T. Jeanes. Now more than eight decades later, Jeanes Hospital is a member of the Temple University Health System. Jeanes Hospital's mission is to be the destination for all who need ambulatory, inpatient acute, surgical and home care in Northeast Philadelphia and surrounding areas, by combining the compassionate nature of a Quaker-founded community hospital with the advanced capabilities of an academic medical center.

Jeanes Hospital has 146 licensed beds and is also home to The Fox Chase Cancer Center–Temple University Hospital Bone Marrow Transplant (BMT) Program. Last year, Jeanes Hospital discharged nearly 7,000 inpatients, cared for over 74,000 outpatients, and handled nearly 38,000 emergency department visits. Jeanes Home Health division also conducted over 20,000 visits to patients in their homes by health care professionals.

As an additional enhancement, Temple Health recently engaged BAYADA Home Health Care, a nationally renowned home health care provider, to provide management services for Jeanes Home Health – an arrangement that will ensure the seamless continuation of necessary home health care services after hospital discharge.

Jeanes Hospital's key clinical services include:

- High-acuity surgical services – cardiothoracic surgery, neurosurgery, vascular surgery, joint replacement surgery, spine surgery, weight-loss surgery, minimally-invasive general surgery, head and neck surgery, gynecologic surgery and urologic surgery.
- Medical services – emergency medicine, intensive care, primary stroke center, primary care, occupational medicine, orthopedics, gastroenterology, nephrology, endocrinology, advanced wound care, Temple Heart and Vascular Institute, Temple Head and Neck Institute, and Temple Neurosciences Center.
- Procedures and tests – cardiac catheterization, electrophysiology, stress echocardiogram, diagnostic imaging, MRI scan, CT scan, interventional radiology, digital mammography, endoscopy, pain management and hyperbaric oxygen therapy.

Jeanes Hospital also devotes budgetary resources and skilled personnel to provide health screenings, vaccinations and a variety of health education opportunities to its community. These initiatives build community coalitions for healthy weight management, more barrier-free access to health screenings, and a focus on culturally competent care – which helps put Jeanes Hospital's resources where they are most needed in its service area.

Jeanes Hospital aligns its population health efforts closely with its affiliated Temple Center for Population Health, LLC (TCHP). Established in 2014, the TCHP promotes and supports the population health efforts of our communities. We align our efforts with the goals of the United States Department of Health and Human Services' three-part aim of achieving better care for patients, better health for our communities, and lower costs through health care system improvement.

The TCHP mission is to attain a sustainable model of health care delivery through clinical and business integration, community engagement, and academic distinction to promote healthy populations. The TCHP includes an extensive network of Patient Centered Medical Homes; chronic disease management programs for high risk populations utilizing nurse navigators; an extensive inpatient and outpatient community health worker program, peer coaching, and a central access center utilized for appointment scheduling and acute care follow-up. The TCHP ambulatory performance improvement platform has been established to provide the infrastructure on which outpatient clinics can continue to achieve better care, smarter spending and healthier communities. The TCHP collaborates with TUH to assure smooth transitions of care, access to community resources and management of value-based purchasing.

In addition to Jeanes Hospital, other hospital members of the Temple University Health System include Temple University Hospital, the American Oncologic Hospital, also known as the hospital of the Fox Chase Cancer Center, the Institute for Cancer Research, and the Fox Chase Cancer Center Medical Group, the Temple University Physicians faculty practice plan, Temple Physicians, Inc, our network of community based physicians, and Temple Health System Transport, our ground and air ambulance company.

PURPOSE

This report summarizes the results of an assessment of the health status and unmet health care needs of residents of the Jeanes Hospital service area.

The purpose of this needs assessment is to identify and prioritize community health needs so that the hospital can develop strategies and implementation plans that benefit the public, as well as satisfy the requirements of the Affordable Care Act.

The needs assessment was conducted by Public Health Management Corporation, PHMC), a private non-profit public health institute.

This Assessment section includes:

- a definition of the community assessed in the report;
- a description of the previous needs assessment; and
- the qualifications of PHMC to conduct the assessment.

This section is followed by: II. Process and Methods; III. Community Demographics; IV. Health of the Community; V. Access to Care; VI. Health Behaviors; VII. Special Populations; VIII. Existing Resources; and IX. Social Determinants of Health and Unmet Needs. Tables are included in the Appendices.

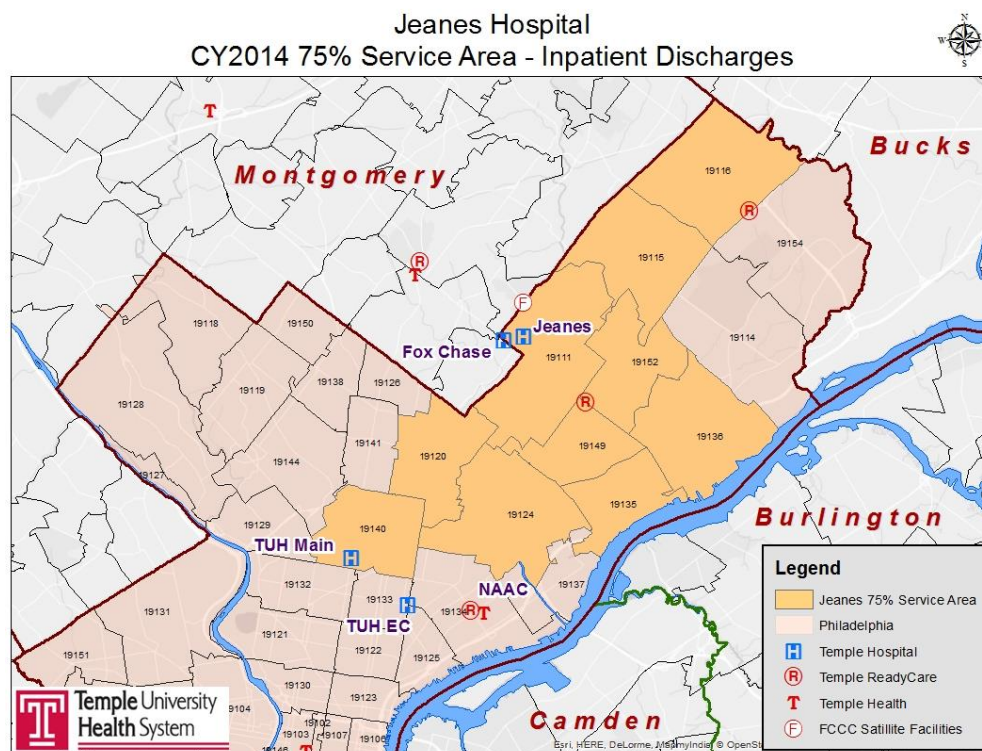

COMMUNITY DEFINITION

The community (2015 Pop. 491,316) for purposes of this needs assessment was defined as the Zip codes where **75% of Jeanes Hospital inpatient admissions derive.**

For the purposes of this needs assessment, the Jeanes Hospital service area includes the Zip codes in the City of Philadelphia shown below (Table 1).

Table 1. Jeanes Hospital Service Area

19111	19124	19149
19115	19135	19152
19116	19136	
19120	19140	

In 2013, Jeanes Hospital conducted a community health needs assessment of its service area. The essential findings from the 2013 needs assessment, and its impact, are summarized below.

PREVIOUS NEEDS ASSESSMENT

In 2013, Jeanes Hospital, through Temple Health, completed a community health needs assessment (CHNA) to identify and prioritize the hospital community's unmet health needs. The community's unmet healthcare needs were identified based on the analysis of the data and community input.

The following unmet needs were identified:

- Access to primary and preventive care for adults and children, particularly those individuals living in poverty and those who are uninsured or underinsured; and
- Access to dental care, prescription coverage for adults and children, and behavioral and mental health services for women and older adults.

Priority unmet needs in this area also include increased educational programs to address:

- Cultural and language barriers particularly among non-English speakers, including Asians and Latinos;
- Navigating the complex health care system, particularly for older adults;
- Chronic disease management including heart disease, mental health, and cancer management for all residents;
- Overweight and obesity prevention, interventions, and programs for children and adults; and
- Increased access to OB/GYN services.

As indicated in the 2013 CHNA, many of these unmet needs were already being addressed in the service area by Temple University Hospital and Fox Chase, as well as by other healthcare providers, government, and local non-profits. In addition, some were not within the mission of Jeanes Hospital.

Through a consensus-building process that included leaders of Jeanes Hospital and its affiliates Fox Chase Cancer Center and Temple University Hospital, each of the hospitals determined which areas it would focus on as they develop initiatives to address unmet needs. Jeanes Hospital considered whether an issue is the root cause of other problems; its internal resources and the internal resources of affiliated Temple University Hospital, external resources available in the community, academic resources of Temple University, the community's ability to respond to the issues, and the consequences of not responding to an issue. Jeanes Hospital determined that in some cases it could not address certain unmet needs as an area of high priority due to limited resources. In

these cases, however, Jeanes Hospital indicated that it would continue to work in appropriate partnership with other community based organizations and government agencies, as well as with Temple University Health System affiliates, to strengthen access to these programs and enhance the health and quality of living in the communities they serve.

The needs were then prioritized to select those issues on which Jeanes Hospital would focus:

- Priority #1: Leverage the combined capabilities of several obesity-related initiatives in the Jeanes Hospital community and in Temple Health, to develop tools and solutions to raise awareness of the dangers of obesity and overweight body mass index (BMI).
- Priority #2: Reduce barriers that impede access to basic disease screenings that help identify cancer and chronic disease in adults, such as Pap smear, mammogram and prostate cancer screening.
- Priority #3: Strengthen practices for providing culturally competent care.

These priorities were used to form Jeanes Hospital's community benefit plan, which was approved by the Board of Directors.

COMMUNITY BENEFIT IMPLEMENTATION PLAN

Jeanes Hospital Summary of Progress for the Period July 1, 2014 through June 30, 2015

Based on its CHNA of April 2013, Jeanes Hospital established the following priority areas to improve the health of its communities: (1) address the dangers of obesity and overweight BMI; (2) strengthen early detection of cancer and chronic disease; and (3) strengthen practices for providing culturally competent care. Summarized below are the outcomes we achieved in these areas.

- Address the dangers of obesity and elevated BMI. In furtherance this goal, the following outcomes were achieved.
 - Establishment of a Farmers Market which was recognized by the City of Philadelphia - Dept. of Public Health and the Mayor's Office of Sustainability with the *Good Food is Good Healthcare* award.
<http://pubweb.fccc.edu/connect/?p=19868>
 - Started a Weight Watchers group after engaging with the work site community.
 - Posting of dietary information about food choices in the Jeanes cafeteria and Café, which is utilized by employees and visitors.

- Reached over 660 persons through our community classroom educational series.
 - Became a distribution site for Temple University's Center for Obesity Research and Education (CORE) informational and recruitment materials.
- Strengthen early detection of cancer and chronic disease. In furtherance of this goal, the following outcomes were achieved:
 - Increased focus in outreach efforts on opportunities for community to access free screenings for hearing, vision, blood pressure and stroke.
 - Strengthened collaboration with Fox Chase Cancer Center with regard to cancer screening and prevention initiatives, including initiatives connected with Prostate Cancer.
 - Planned for first annual senior health fair and initiatives to bring the community into Jeanes hospital as well as other initiatives to bring the Jeanes Hospital Community Classroom beyond the hospital walls and into the community.
- Strengthen practices for providing culturally competent care. In furtherance of this goal, the following outcomes were achieved in collaboration with Temple University Health System's Office of Cultural and Linguistic Services:
- Presentation of our Cultural Competency Symposium to over 130 staff and physicians of Temple Health, concentrating on health disparities among African Americans. Also provided educational materials to participants on the cultural issues of this population.
- Conducted assessment surveys with staff about the use of interpreters for our limited English proficient patients and the hard of hearing/deaf patients.
- Conducted medical records reviews of documentation about the use of interpreters.
- Obtained additional equipment for hard of hearing patients.

PUBLIC HEALTH MANAGEMENT CORPORATION QUALIFICATIONS

PHMC uses best practices **to improve community health** through direct service, partnership, innovation, policy, research, technical assistance, and a prepared workforce.

PHMC is a 501(c)(3) non-profit corporation that was founded in 1972 to address problems in the organization and delivery of health and social services. PHMC is a

public health institute that creates and sustains healthier communities and envisions a healthy community for all.

In 2013, PHMC completed 28 CHNAs for Southeastern Pennsylvania non-profit hospitals, and has been assessing the health needs of the community since 1972. For a comprehensive list of completed assessments, see Appendix A.

- PHMC's Community Health Data Base is uniquely qualified to provide comprehensive services to not-for-profit hospitals. It is the only public health institute in Pennsylvania, has many years' experience collaborating with health care stakeholders, and can facilitate the participation of these diverse groups as required by the Affordable Care Act.
- PHMC staff are public health experts who have provided many services over the past twenty years for hospitals, health departments, foundations, and other non-profits.
- Currently, PHMC is conducting CHNAs for the following hospitals and health systems in SEPA:
 - Crozer Keystone Health System
 - Doylestown Hospital
 - Einstein Healthcare Network
 - Grand View Health
 - Holy Redeemer Hospital
 - Main Line Health
 - Mercy Health Systems
 - St. Mary Medical Center
 - Temple University Health System
 - The Children's Hospital of Philadelphia
 - University of Pennsylvania Health System

PHMC's qualifications also include developing and maintaining the Southeastern Pennsylvania Community Health Data Base (www.CHDBdata.org).

- The CHDB provides an unmatched set of information on local community health needs that can be used to develop focused findings supported by reliable data. These data can also be used in developing priorities and rationales for strategic plans that are ACA compliant.

The biennial Southeastern Pennsylvania (SEPA) Household Health Survey collects information on more than 13,000 residents (children, adults, and seniors) living in the five-county SEPA region. The survey is the longest running community health survey in the United States, as well as one of the largest regional surveys of its kind.

Francine Axler and Lisa R. Kleiner are the co-directors of this CHNA.

Francine Axler, Executive Director, Community Health Data Base. Since 1989, Francine has been actively involved in the field of public health and health promotion, specifically in the collection and dissemination of health status, health behaviors, and utilization of health services data for residents of Southeastern Pennsylvania. Francine is particularly focused on teaching health and human service providers how to utilize community level health data to develop needed, effective and targeted health promotion programs for vulnerable populations. Francine directs PHMC's Community Health Data Base. She has a degree in sociology and a graduate degree in public health education.

Lisa Kleiner, Manager of Operations, Community Health Data Base. For the past twenty-eight years, Lisa has worked on a broad range of evaluation, research, and technical assistance projects. Lisa has conducted and coordinated over 50 population and community needs assessments focusing on older adults, racial/cultural minorities, persons with behavioral health needs, homeless families, maternal and child health and other at-risk groups and communities. In addition to this expertise, Lisa has provided training and technical assistance to over 200 organizations to enable them to build their capacity to define and measure program outcomes and impact, tailoring the technical assistance to the specific needs of the organization and staff. Lisa has a law degree and a graduate degree in social work.

II. PROCESS AND METHODS

PHMC applied the following five steps in conducting the needs assessment process for 2016:

1. defining the community;
2. identifying existing primary and secondary data and data needs;
3. collecting primary and secondary data;
4. analyzing data; and
5. preparing a written narrative report.

To assist Jeanes Hospital in further targeting community health needs, PHMC provided additional hospital and geographic specific data in the Appendices to this report. The data acquisition and analysis, community representatives, and information gaps are described in more detail below.

DATA ACQUISITION AND ANALYSIS

Both primary and secondary and quantitative and qualitative data were obtained and analyzed for this needs assessment.

- Obtaining information from multiple sources, known as triangulation, helps provide context for information and allows researchers to identify results, which are consistent across more than one data source.

Quantitative information. We obtained this information from the following sources:

- 2013 American Community Survey;
- 2015 and 2020 Nielsen-Claritas Pop-Facts;
- Pennsylvania Health Department vital statistics on births, deaths, communicable diseases, and cancer incidence (2008-2012 and 2009-2012); and
- PHMC's 2015 Southeastern Pennsylvania Household Health Survey.

These data were analyzed for the hospitals' service area using the Statistical Program for Social Sciences (SPSS).

Frequency distributions were produced for variables for multiple years of data so trends over time could be identified and described.

In addition, for Household Health Survey measures, tests of significance were conducted comparing the service area to the Household Health Survey for Southeastern Pennsylvania to objectively identify and prioritize unmet needs.

In addition, quantitative data for each service area from the Household Health Survey was compared to health objectives for the United States from Healthy People (HP) 2020, and to data collected for Pennsylvania from the Center for Communicable Diseases' 2014 Behavioral Risk Factor Surveillance Survey.

Qualitative information. PHMC also collaborated with Jeanes Hospital to identify individuals living and/or working in the communities in the hospital's service area who could provide input on the needs assessment as community members, public health experts, and as leaders or persons with knowledge of underserved racial minorities, low income residents, and/or the chronically ill. Jeanes Hospital and PHMC worked together to obtain meeting venues, contact potential participants, and encourage attendance.

- Meeting participants were not compensated.
- Participants who could not attend were invited to send written comments, and these were incorporated into the report.
- Input from the community meeting participants, including county and local health department officials and public health experts, was used to further identify and prioritize unmet needs, local problems with access to care, and populations with special health care needs.

Qualitative information from the community meetings was analyzed by identifying and coding themes common to participants, and also themes that were unique.

- This information was organized into major topic areas related to health status, access to care, special populations, and unmet needs.

These data sources are described in more detail in the next section.

The information from this needs assessment will be used by the hospital to develop a community health implementation plan.

.

PHMC SOUTHEASTERN PENNSYLVANIA HOUSEHOLD HEALTH SURVEY

A total of **1,287 interviews were conducted with adults** residing in the hospital's service area, including 332 adults age 60 and over and 425 households with a selected child under the age of 18.

Jeanes Hospital received input on the needs of the community, including the medically underserved, low-income, and minority populations from PHMC's 2015 Southeastern Pennsylvania Household Health Survey. The survey questionnaire examines health status and utilization of, and access to, health care among adults and children in the five-county area of Bucks, Chester, Delaware, Montgomery and Philadelphia Counties.

- The survey was conducted through telephone interviews with people 18 years of age and older living in 10,018 households in Southeastern Pennsylvania. Of this total SEPA sample of 10,018 adults, 1,287 adult survey respondents lived in the Jeanes Hospital service area and participated in the survey. These 1,287 households also included 332 adults age 60 and over and 425 households with at least one child under the age of 18.
- A total of 2,009 cell phone interviews were conducted with adults in the five county area. Cell phone respondents received the same survey questionnaire as landline respondents.

The survey includes many questions that have been administered and tested in national and local health surveys:

- National Center for Health Statistics (NCHS) for the National Health Interview Survey (NHIS);
- The Behavioral Risk Factor Surveillance Survey (BRFSS);
- The California Women's Health Survey;
- The Social Capital Community Benchmark Survey (Kennedy School of Government, Harvard University); and
- The Survey on Childhood Obesity (Kaiser Family Foundation/San Jose Mercury News).

Households in each of the five southeastern Pennsylvania counties were selected to guarantee representation from all geographic areas and from all population subgroups. When needed, the interviews were conducted in Spanish.

The survey was administered for PHMC by Abt/SRBI, Inc. a research firm in New York City, between December 2014 and March 2015.

The final sample of interviews is representative of the population in each of the five counties so that the results can be generalized to the populations of these counties. Within each selected household with more than one eligible adult, the Last Birthday Method was used to select the adult who last had a birthday as the respondent for the interview (with the exception of the cell phone sample).

- In households with children, the child under age 18 who most recently had a birthday was selected as the subject of the child interview.
- The survey incorporates over-samples of people ages 60-74 and 75 and older to provide a sufficient number of interviews for separate analyses of the responses of people in these subgroups.

Information from the survey was analyzed for the community as a whole and for the uninsured, medically underserved, poor, ethnic and racial minorities, children, and older adults. The results of the survey were taken into account in identifying the size and location of these medically underserved populations, their unmet health care needs, and any barriers they encounter to accessing services. Priorities among these needs were established by comparing the results of the 2015 HHS to HP 2020 benchmarks, existing resources, and the hospital's existing programs and mission.

U.S. CENSUS

This report includes data on the characteristics of the hospital's service area residents and residents of Philadelphia for the years 2013, 2015 and 2020. Data from the 2010 U.S. Census, estimates from the 2013 and 2015 American Community Survey, and the Nielsen-Claritas Pop-Facts Database projections for 2020 were also used. The Nielsen-Claritas Pop-Facts Database uses an internal methodology to calculate and project sociodemographic and socioeconomic characteristics for non-census years, relying on the U.S. Census, the Current Population Survey, and the American Community Survey.

VITAL STATISTICS

The most recent information on births, birth outcomes, deaths, cancer, and reportable diseases and conditions for residents of Jeanes Hospital's service area and Philadelphia was obtained from the Pennsylvania Department of Health, Bureau of Health Statistics and Research.

- Four year (2009-2012) annualized average rates for natality and five year (2008-2012) annualized average rates for mortality and cancer incidence were calculated by PHMC.
- Mortality rates were age-adjusted using the Direct Method and the 2000 U.S. standard million population.

The denominators for all 2008-2012 and 2009-2012 vital statistics rates for the county and state were interpolated from the 2010 U.S. Census and the 2015 American Community Survey. The number of women ages 15-44 and ages 15-17 was also interpolated from the 2010 US Census and 2015 American Community Survey.

2015 COUNTY HEALTH RANKINGS AND ROADMAPS

The *County Health Rankings* measure the health of nearly all counties in the nation and rank them within states. The *Rankings* are compiled using county-level measures from a variety of national and state data sources. These measures are standardized and combined using scientifically-informed weights.

COMMUNITY MEETINGS AND INTERVIEWS

The hospital solicited and took into account input from persons or organizations that represent the broad interests of the community it serves, including:

- Local city and county health departments from each of the five counties in SEPA;
- Members and/or representatives of medically underserved, low-income, and minority populations; and
- Written comments received on the most recent service and Implementation Strategy.

Jeanes Hospital solicited and took into account input from persons or organizations that represent the broad interests of the community it serves. In general, input was received on the unmet health care needs, existing health care resources, and special needs of minority and medically underserved populations. The community meeting was facilitated by PHMC and guided by a set of written questions that focused on participants' perceptions of the most important physical and behavioral health problems in the area, programs that successfully address these issues, gaps in services, barriers to care, vulnerable and underserved populations, and how to best reach individuals in the community.

This input was solicited from 20 service area community representatives of the medically underserved, low-income, and minority populations in the service area and from the Deputy Health Commissioner of the Philadelphia Department of Public Health (PDPH). Potential participants for the meetings were identified by Jeanes Hospital staff working with PHMC, and invited by mail or electronic mail to attend the meeting.

- The input was received from the community meeting held on November 19, 2015 at Jeanes Hospital and from an interview with the Deputy Health Commissioner of the PDPH on September 8, 2015.

- Anyone who could not attend was invited to send written comments at any time.

The community members attending the meeting represented the organizations listed below, which included local government, public health experts, and members and representatives of medically underserved, low-income, and minority populations.

Organizations representing medically underserved, low income and minority populations:

- Jeanes Hospital (2)
- Jeanes Hospital, Business Development
- Community Care Center (2)
- Burholme Emergency Medical Services
- Jeanes Hospital Board of Directors (2)
- Philadelphia Protestant Home
- Take Back Your Neighborhood (2)
- Mature Adults Program, Prince of Peace (4)
- Northeast Victim Service
- Rhawnhurst-Bustleton Ambulance Association
- Memorial Presbyterian Church of Fox Chase, Food for Hope Pantry (2)

The input from this meeting is summarized in each section of this report, as pertinent.

INFORMATION GAPS

Quantitative information for socioeconomic and demographic information, vital statistics, and health data was available at the Zip code level for the service area. To fill potential gaps in information, these data were supplemented by detailed information about the service area obtained from community meetings.

III.COMMUNITY DEMOGRAPHICS

The population of the Jeanes Hospital service area is 491,316. It was 553,604 in 2013, and is predicted to increase to 500,664 in 2020. This represents a 2% increase in population.

AGE

In the Jeanes Hospital service area, 18-44 year olds make up 38% of the population (210,068). The size of this age group is predicted to decline from 38% to 37% by 2020. The 18-44 year old group in Philadelphia as a whole makes up a larger percentage of the population (41%) and is also predicted to decline from 41% to 42% by 2020.

- One-quarter (26%) of the Jeanes service area residents (representing 144,667 residents) are children between the ages of 0-17. This percentage has not changed since 2013 and is predicted to hold steady into 2020.
 - The 0-17 age group (26%) represents a larger percentage of the population in the Jeanes Hospital service area than in Philadelphia, where this group only makes up 20% of the population.
- One-quarter (24%) of the Jeanes Hospital service area residents are age of 45-65 (132,884). This percentage has not changed since 2013
- The 65+ population (65,985) makes up 12% of the overall population, and is the only age group in the Jeanes Hospital service area which is predicted to increase in size from 12% to 14% by 2020.

Figure 1. Age Distribution of the Population, 2015

Source: Nielsen-Claritas Pop-Facts Database and 2010 U.S. Census

RACE/ETHNICITY

Jeanes Hospital's service area is culturally, racially, ethnically, and linguistically diverse. One-third of Jeanes Hospital residents (36%) are White. Twenty-eight percent of the population is Black, 26% Latino, 8% Asian and 3% identify as another race. This pattern is different than the pattern in Philadelphia overall where 41% of the population is Black, 36% White, 14% Latino, 7% Asian and 3% another race.

- The percentage of White residents in the Jeanes Hospital service area is predicted to decrease from 36% to 33% by 2020. This is the only racial and ethnic group in the Jeanes Hospital area that is predicted to decrease during this time period.
- The percentage of Latino residents in the Jeanes Hospital service area is predicted to increase from 26% to 28% by 2020, which mirrors the pattern predicted for Philadelphia as a whole.

Figure 2. Race and Ethnicity, 2015

Source: Nielsen-Claritas Pop-Facts Database and 2010 U.S. Census

LANGUAGE SPOKEN AT HOME

Two-thirds of residents of the Jeanes Hospital service area (66%) speak English at home. Nineteen percent speak Spanish, 6% speak an Asian Language, and 10% speak another language.

- The Jeanes Hospital service area has nearly twice as many adults who speak Spanish at home (19%) than Philadelphia as a whole (10%). It also has 2% more residents who speak an Asian language and 4% more residents who speak a non-English language than Philadelphia overall.

Fewer residents of the Jeanes Hospital service area speak English at home (66%) than in Philadelphia as a whole (79%).

SOCIOECONOMIC INDICATORS

EDUCATION

The majority of the Jeanes Hospital service area adults age 25+ are high school graduates (63%); and additional 14% have a college degree or more. Twenty-three percent of residents did not graduate from high school.

- The educational attainment of residents in the area has remained fairly stable over time.
- The Jeanes Hospital service area has a greater percentage of high school graduates (63%) than Philadelphia as a whole (57%).
 - There are a smaller proportion of residents with a college degree or higher (14%) in the Jeanes Hospital service area than in Philadelphia (24%).
 - The Jeanes service area (23%) has a larger proportion of residents without a High School degree than Philadelphia (20%).

Figure 3. Educational Attainment, 2015

Source: Nielsen-Claritas Pop-Facts Database and 2010 U.S. Census

EMPLOYMENT

The majority of residents in the Jeanes Hospital service area are employed (82%). However, 18% are unemployed. Unemployment has remained stable since 2013 and is predicted to stay at the current levels through 2020. Unemployment is slightly higher in the Jeanes Hospital service area (18%) than in Philadelphia as a whole (16%).

Figure 4. Unemployment, 2013, 2015, and 2020

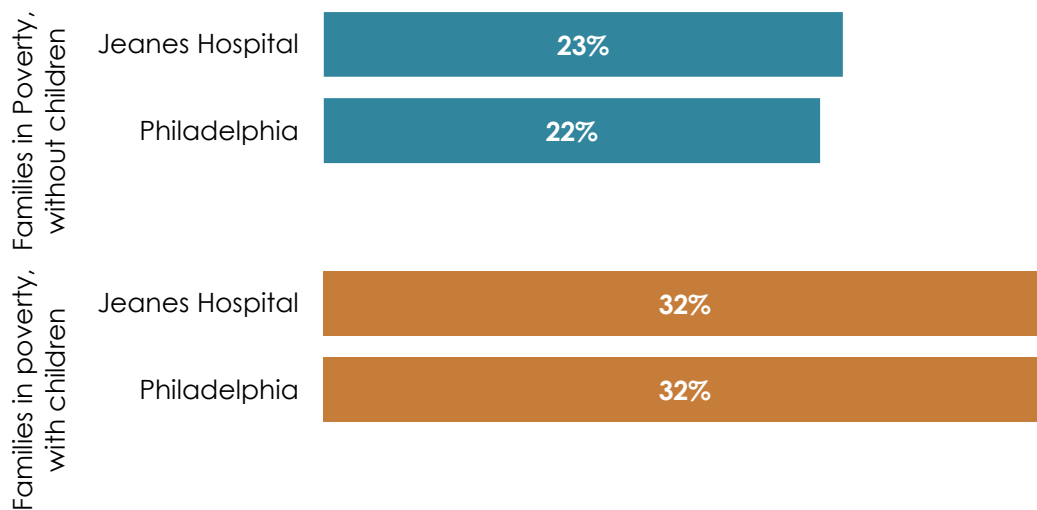

Source: Nielsen-Claritas Pop-Facts Database and 2010 U.S. Census

POVERTY

The majority of families in the Jeanes service area (55%) live in households with annual incomes below the federal poverty line. Almost one in three families (32%) with children and almost one in four families (23%) without children in the Jeanes Hospital service area are living in poverty. This rate is predicted to remain the same into 2020. Poverty rates are similar in the Jeanes Hospital service area to rates in Philadelphia as a whole, where 32% of families with children and 22% of families without children live in poverty.

Figure 5. Families in Poverty, 2015

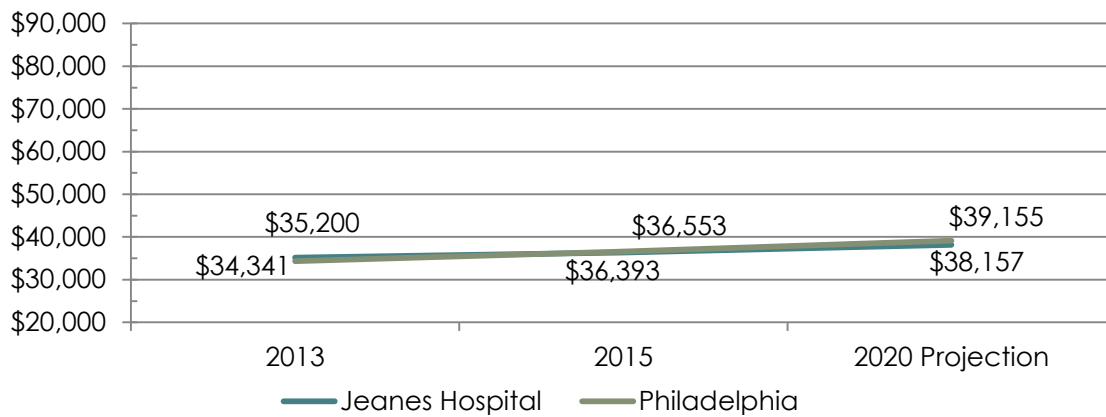

Source: Nielsen-Claritas Pop-Facts Database and 2010 U.S. Census

MEDIAN HOUSEHOLD INCOME

The median household income in the Jeanes Hospital service area is \$36,393. This represents a minimal increase from 2013 when it was \$35,200. It is predicted to grow to \$38,157 by 2020.

- The median household income in the Jeanes Hospital service area is similar to the median household income in Philadelphia (\$36,553).

Figure 6. Median Household Income, 2013, 2015, and 2020.

Source: Nielsen-Claritas Pop-Facts Database and 2010 U.S. Census

HOME OWNERSHIP

The majority (60%) of Jeanes Hospital service area residents owns their homes, and 40% of residents rent. Home ownership rates in the Jeanes Hospital service area are higher than in Philadelphia overall, where 46% of residents rent and 54% are home owners.

Figure 7. Homeownership, 2015

Source: Nielsen-Claritas Pop-Facts Database and 2010 U.S. Census

IV. HEALTH OF THE COMMUNITY

The health of a community can be assessed by comparing birth outcomes, self-reported health status and health conditions, communicable disease rates, self-reported health concerns and perceptions, and mortality rates to statewide indicators and HP 2020 goals for the nation. This section examines information for the Jeanes Hospital service area.

BIRTH OUTCOMES

FERTILITY

There are 8,782 births annually to women living in the Jeanes Hospital service area. This represents a fertility rate of 74 births per 1,000 women age 15-44. This fertility rate is higher than the rate in Philadelphia (64) and the rate in the overall Southeastern Pennsylvania (SEPA) region (60).

Figure 8. Fertility Rates for Women Age 15-44, 2009-2012

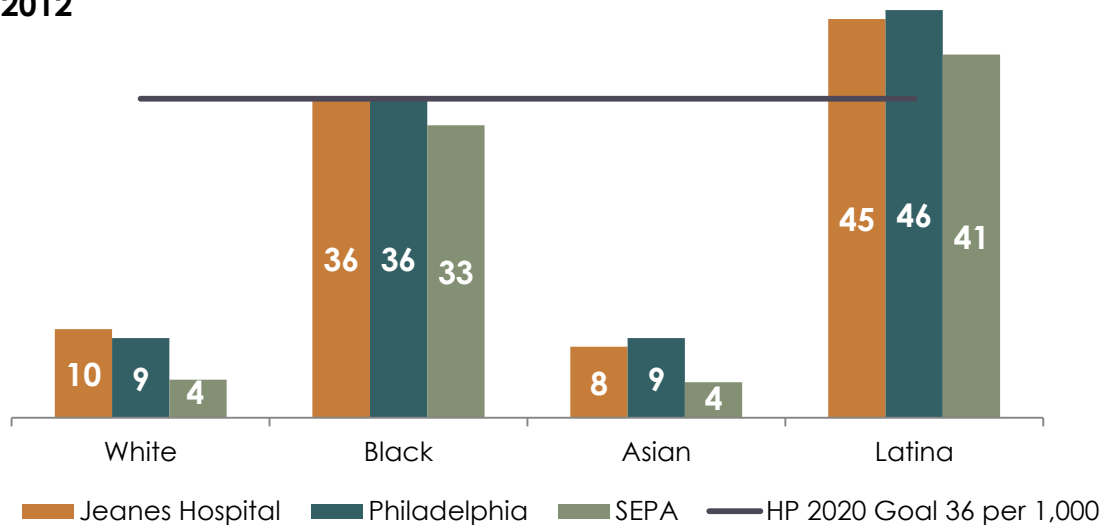

Sources: Pennsylvania Department of Health, Bureau of Health Statistics and Research. 2010 U.S. Census. Calculations prepared by PHMC.

- Latina women have the highest fertility rate in the Jeanes Hospital service area (87: 2,651), followed by Black women (74: 2,873) and Asian women (63: 587). White women (52) have the lowest fertility rate in the Jeanes Hospital service area.

- Every racial and ethnic group in the Jeanes Hospital service area has a higher fertility rate than their counterparts in Philadelphia overall and the SEPA region.

Infants born to teenagers have been associated with a number of negative birth outcomes, including prematurity and low birth weight, making it an important outcome to track. In the Jeanes Hospital service area, the fertility rate of adolescent women age 15-17 is 30 per 1,000 live births, representing 387 births annually.

Figure 9. Fertility Rate per 1,000 Women Aged 15-17, 2009-2012

Sources: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC

The fertility rate of 15-17 year olds in the Jeanes Hospital service area (30) meets the HP 2020 goal of 36 per 1,000. It is similar to the rate in Philadelphia as a whole (31), however, it is almost double the rate in the SEPA region overall (16).

- Latina women age 15-17 and Black adolescent women have the highest fertility rates for this age group in the Jeanes Hospital service area (45 and 36, respectively). The fertility rates for Latina and Black adolescent women in the Jeanes Hospital service area are similar to, or slightly lower than, overall rates in Philadelphia, but higher than rates in the SEPA region overall.
- Although Asian (8) and White (10) women have the lowest fertility rates for 15-17 year olds in the Jeanes Hospital service area, these rates are double the rates for these same racial groups in the SEPA region overall (Asian (4) and White (4))

LOW BIRTH WEIGHT

Low birth weight infants (<2,500 grams or less than 5lb 8 oz) are at greater risk for dying within the first year of life than infants of normal birth weight.

In the Jeanes Hospital service area, there is an average of 104 low birth weight infants per 1,000 live births every year, representing 916 infants. This rate exceeds the HP 2020 goal (78 per 1,000). The Jeanes Hospital service area low birth weight rate is slightly lower than the Philadelphia (109) rate, but is higher than the SEPA rate(91).

Figure 10. Rates of Low Birth Weight Births, 2009-2012

Sources: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

- Black infants in the Jeanes Hospital service area are more likely to be born with low birth weight (141) than all other racial and ethnic groups, followed by Latino/a (95) and Asian (83) infants. White infants have a low birth weight rate of 74.
 - The low birth weight rates for Black and White infants in the Jeanes Hospital service area are the higher than rates for black and white low birth weight births in Philadelphia and SEPA overall.
- Only White infants in the Jeanes Hospital service area (74) meet the HP 2020 goal for low birth weight (78).

PREMATURE BIRTHS

There is an average of 988 premature births (less than 37 weeks gestation) to women living in the Jeanes Hospital service area, representing 11% of all live births. This meets the HP 2020 goal for premature births (11%).

This percentage is similar to Philadelphia (12%, representing 2,670 births), and similar to the percentage in the SEPA region overall (10% representing 5,058 births)

- Black infants in the Jeanes Hospital service area (14%) have the highest rate of prematurity while Asian infants have the lowest (8%).

Figure 11. Percentage of Premature Births, 2009-2012

Sources: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

PRENATAL CARE

Receiving prenatal care during the first trimester of pregnancy can help ensure that health concerns are identified and addressed in a timely manner. A little less than one-half (45%) of women in the Jeanes Hospital service area initiate prenatal care after the first trimester or have no prenatal care. This is more than double the HP 2020 goal of 22.1%. This service area percentage (45%) is similar to the percentage in Philadelphia (46%) and higher than the percentage in the SEPA region overall (36%).

- The percentage of Black women (51%) in the service area receiving late or no prenatal care is higher than the percentage of White women (34%).
- Latina (50%) and Asian women (40%) in the Jeanes Hospital service area are slightly less likely to receive late or no prenatal care than Black women.
- Women in the Jeanes Hospital service area in none of the racial or ethnic subgroups meet the HP 2020 goal of 22.1%.

Figure 12. Late or No Prenatal Care, 2009-2012

Sources: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

MORTALITY

INFANT MORTALITY

Every year, an average of 76 infants in the Jeanes Hospital service area dies before their first birthday. The service area infant mortality rate is 9 infant deaths per 1,000 live births. This rate does not meet the HP 2020 goal of 6 infant deaths per 1,000 live births. This rate is similar to the rate in Philadelphia (9) and higher than the rate in the overall SEPA region (7).

- Black infants (15) are three times more likely to die in the first year of life as Asian infants (4), and twice as likely to die as Latino/o infants (7).
 - The Black infant mortality rate (15) in the Jeanes Hospital service area is similar to the Black infant mortality rate in Philadelphia (13) and the SEPA region as a whole (13).
 - Only the Asian infant mortality rate in the Jeanes Hospital area (4) meets the HP 2020 goal (6).

Figure 13. Infant Mortality Rates, 2009-2012

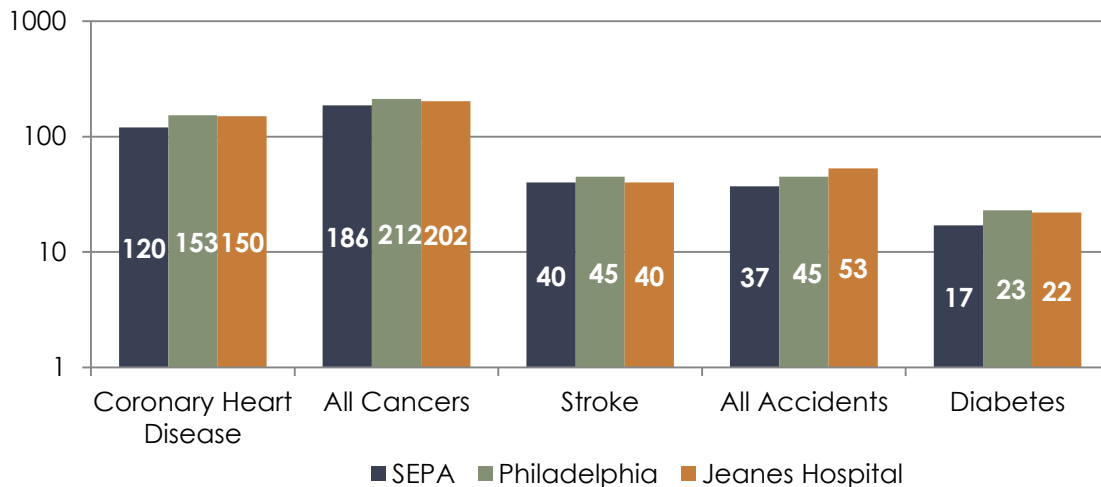

Sources: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

MORTALITY

The overall age-adjusted mortality rate in the Jeanes Hospital service area is 861 deaths per 100,000, representing 4,685 deaths. This is lower than the Philadelphia mortality rate, which is 893 per 100,000 (representing 14,009 deaths), but higher than the overall SEPA rate (756 per 100,000 (representing 34,900 deaths)).

Figure 14. Mortality Rates for Top Five Causes of Death, 2009-2012

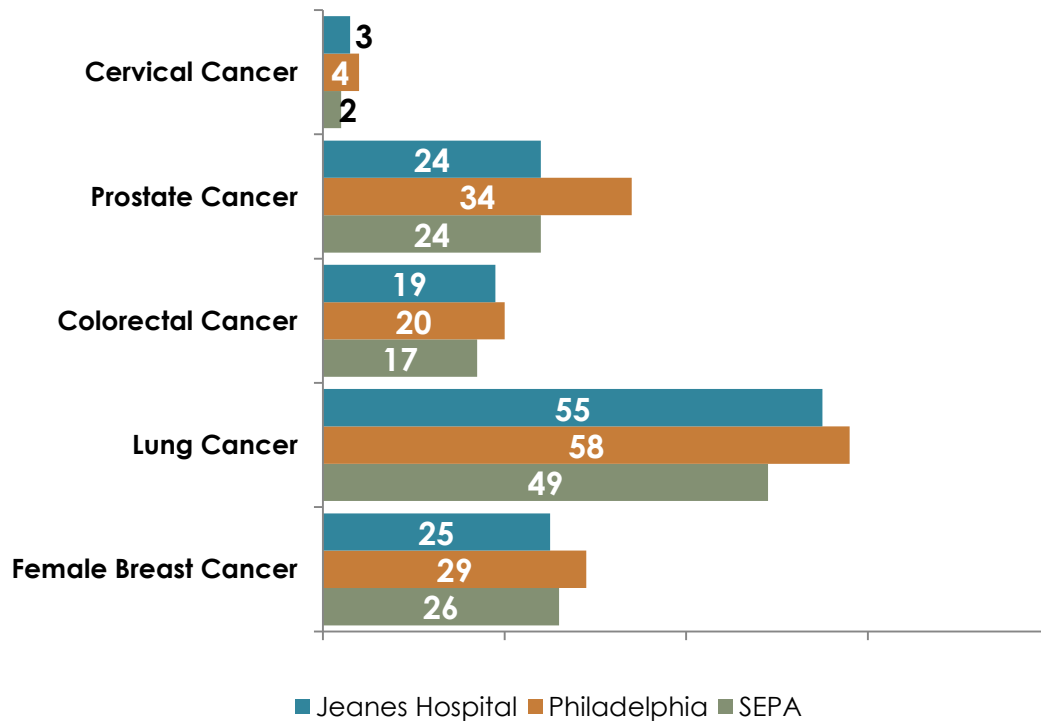

Sources: Pennsylvania Department of Health, Bureau of Health Statistics and Research and 2010 U.S. Census. Calculations prepared by PHMC

Cancer is the leading cause of death in the Jeanes Hospital service area (202; representing 1,057 deaths). This does not meet the HP 2020 goal of 16. The other leading causes of death in the Jeanes Hospital service area are Coronary Heart Disease (150: 827), Accidents (53; 284), Stroke (40: 224), Diabetes (22: 118), Homicide (15: 84), Suicide (11: 58) and HIV/AIDS (5: 27).

- The mortality rate for accidents in the Jeanes Hospital service area (53) is higher than the rate in Philadelphia (45) and the SEPA region overall (37).

Figure 15. Cancer Mortality Rates for Selected Sites, 2009-2012

Sources: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

Lung cancer has the highest site specific cancer mortality rate in the service area (55: 284), followed by Female Breast (25: 76), Prostate (24: 48) and Colorectal Cancer (19: 102).

- Every cancer rate in the Jeanes Hospital service area is lower than the related rate in Philadelphia overall.

MORBIDITY

HIV AND AIDS

The prevalence of individuals who are living with HIV or AIDS in Philadelphia (46 per 100,000) is the highest in the region. This represents 2,100 persons in Philadelphia. The rate in Montgomery County is far lower, at 6 per 100,000, representing 155 persons.

- HIV/AIDS rates are highest in Philadelphia (46) and Delaware (16) Counties and lower in Chester (6) and Montgomery Counties (6).
- The overall rate of people living with HIV and AIDS in Pennsylvania is 11, representing 4,320 people.

Figure 16. Currently Living with HIV/AIDS per 100,000, 2014

Sources: Pennsylvania Department of Health, HIV/AIDS Investigations-Bureau of Epidemiology and American Community Survey.

COMMUNICABLE DISEASE

Philadelphia has the second highest rate (31 per 100,000) of Hepatitis B in the SEPA region. The Hepatitis B rate in Delaware County (35 per 100,000) is the highest in the region. The rate in Montgomery County is 21 per 100,000, and Chester County has the lowest rate (8 per 100,000).

Chlamydia rates in Philadelphia are the highest in the region (1,317 per 100,000) and more than double the next highest County rate, which is Delaware (458 per 100,000). The rate in Montgomery County is 221 per 100,000.

Gonorrhea rates in Philadelphia are the highest in the region (447 per 100,000), followed by Delaware County (115 per 100,000). The rate in Montgomery County is 41 per 100,000.

Syphilis rates continue to be highest in Philadelphia (16). This rate is 8 times higher than the next highest rate in Delaware County (2). Montgomery County has the same rate as Delaware County (2).

Philadelphia has the highest Chicken Pox rate in the region (14); the second highest rate is in Bucks County (10) followed by Montgomery County (7).

Figure 17. Communicable Disease Incidence per 100,000, 2013-2014

Source: Pennsylvania Department of Health, Bureau of Health Statistics and Research, EpiQMS

HEALTH STATUS

As stated by representatives at PDPH: "The most serious problems from a PDPH perspective are: 1) the health of women and infants; 2) safe sex and reproductive health for teenagers; 3) chronic disease, including cases such as smoking, poor diet, and lack of physical activity; and 4) indoor and outdoor environmental issues that impact health."

A **majority** of adults in the service area describe their health as excellent, very good or good

SELF-REPORTED HEALTH STATUS

Self-reported health status is one of the best indicators of population health. This measure has consistently shown to correlate very strongly with mortality rates.¹

Three-quarters of service area adults (75%) are in excellent, very good, or good health.

- This is a lower percentage of adults than in Philadelphia (78%) or across SEPA, where 84% describe their health as excellent, very good, or good.
- One quarter of adults in the Jeanes Hospital service area (25%) is in fair or poor health; this represents 107,800 adults.

Figure 18. Health Status of Adults 18+, 2015

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

¹ Idler EL, Benyamini Y. Self-Rated Health and Mortality: A Review of Twenty-Seven Community Studies. *Journal of Health and Social Behavior*.1997; 21-37.

Eight percent of children (12,000) are in fair or poor health, which is comparable to Philadelphia (7%) and higher than across SEPA, where five percent of children are in fair or poor health.

Figure 19. Children 0-17 in Fair or Poor Health, 2015

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

Across the Jeanes Hospital service area, about 37,300 older adults age 60+ are in fair or poor health (39%), which is worse than the surrounding area. In Philadelphia, 29% of older adults are in fair or poor health, as are 21% of older adults across the SEPA region.

Figure 20. Health Status of Older Adults 60+, 2015

Source: PHMC's 2012 and 2015 Southeastern Pennsylvania Household Health Surveys

ACTIVITIES OF DAILY LIVING

Instrumental Activities of Daily Living (IADLs)

IADLs are activities related to living independently, such as using the telephone, shopping, cleaning, cooking, paying bills, and taking medication

Activities of Daily Living (ADLs)

IADLs are activities related self-care, such as eating, dressing, grooming, walking indoors, bathing, and getting in and out of bed.

One in three older adults in the service area, 31%, or about 30,400, have at least one limitation in the Instrumental Activities of Daily Living (IADLs).

- This is comparable to Philadelphia as a whole and higher than across SEPA, where 24% of older adults report at least one of these limitations.

About 15,000 adults 60+, 16%, have at least one limitation in the Activities of Daily Living (ADLs). Throughout SEPA, the proportion of older adults with at least one ADL limitation is 12%.

Figure 21. ADL and IADL Limitations, Older Adults 60+, 2015

Source: PHMC's 2012 and 2015 Southeastern Pennsylvania Household Health Surveys

SPECIFIC HEALTH CONDITIONS

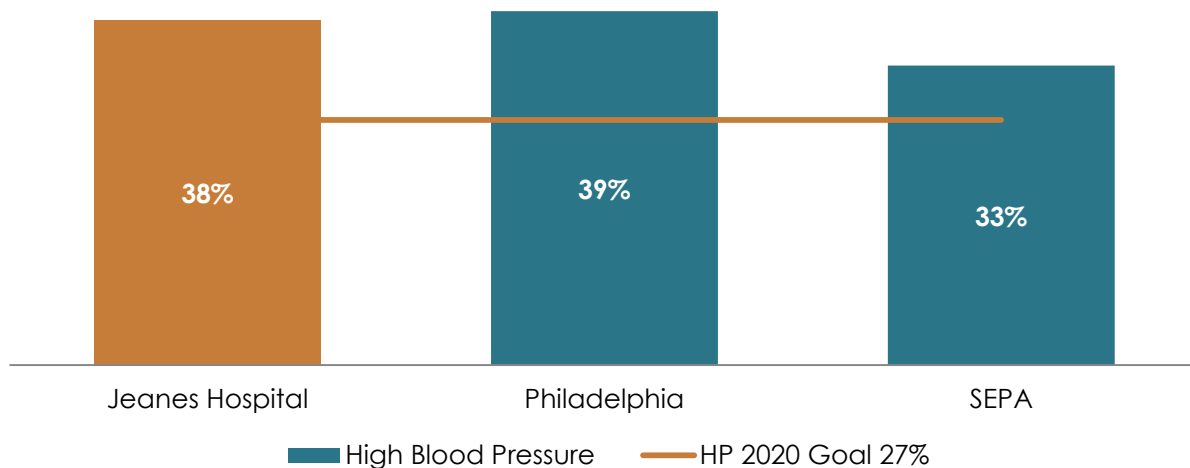

High blood pressure, diabetes, asthma, cancer, and mental health conditions are chronic illnesses that require ongoing care.

HYPERTENSION

One-third of all adults (18+) in the Jeanes Hospital service area (33%, or 155,200 adults) have been diagnosed with high blood pressure.

- This does not meet the HP 2020 goal of 27%.
- Among adults with high blood pressure in the service area, 8% report not taking all or nearly all of their medication all of the time.
- Two-thirds of older adults age 65+ in the service area (66%) have high blood pressure.

Figure 22. High Blood Pressure, Adults 18+, 2015

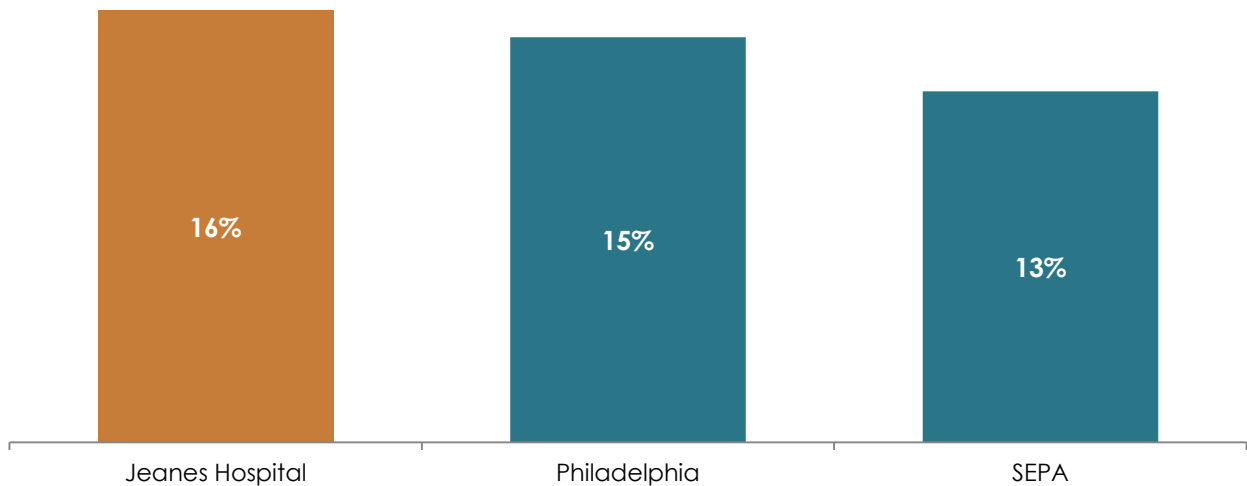

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

DIABETES

About 66,100 adults in the Jeanes Hospital service area, 16%, have been diagnosed with diabetes.

- This is comparable to Philadelphia as a whole, 15%, and higher than SEPA overall (13%).
- Three in ten older adults age 60+ in the service area (31%) have diabetes; this represents 29,800 older adults.

Figure 23. Diabetes, Adults 18+ , 2015

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

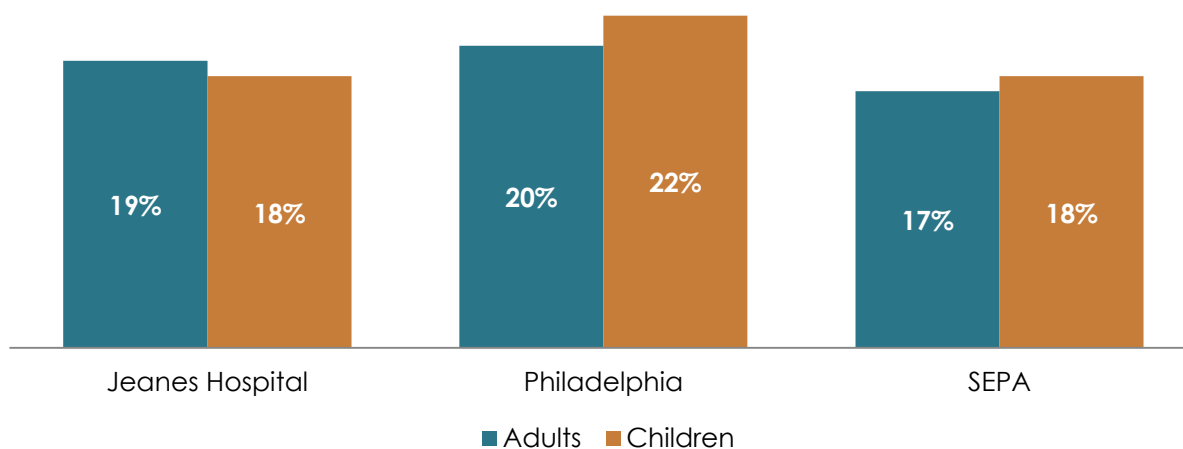

ASTHMA

Nearly one in five adults in the Jeanes Hospital service area (19% or about 78,300) has been diagnosed with asthma.

Nearly one in five children (18%) has been diagnosed with asthma; this represents 25,700 children in the service area, and is lower than Philadelphia (22%) and comparable to childhood asthma rates across the SEPA region (18%).

"Asthma is aggravated by living conditions and therefore the asthma may not improve depending on where the child is living."

Figure 24. Asthma, Adults 18+ and Children 0-17, 2015

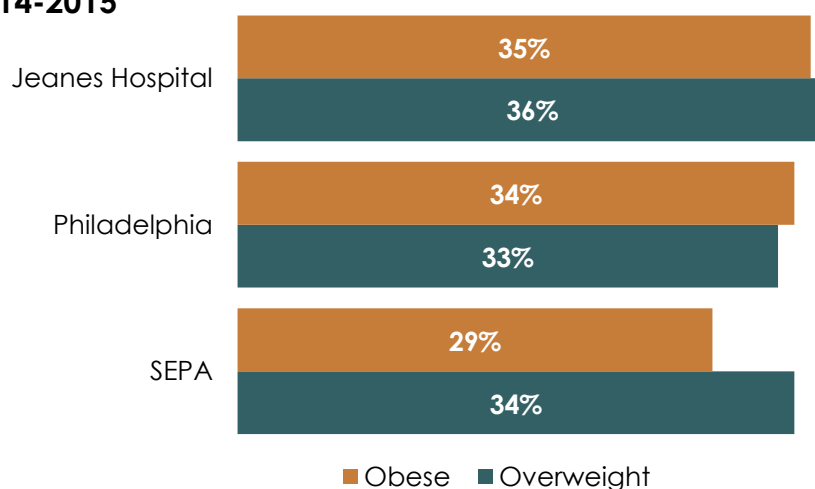

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

OVERWEIGHT AND OBESITY

Overweight and obesity are strongly correlated with high blood pressure, diabetes, cancer, heart disease, and asthma.

- More than one in three service area adults age 20 and over (35%) are obese, and a similar proportion are overweight (36%).
 - This represents approximately 285,500 adults who are overweight or obese in the Jeanes Hospital service area.

Figure 25. Obese and Overweight Adults (20+), 2014-2015

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

- About 30,800 children in the service area (36%) are classified as obese, and 20% are overweight.

Figure 26. Obese and Overweight Children (0-17), 2015

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

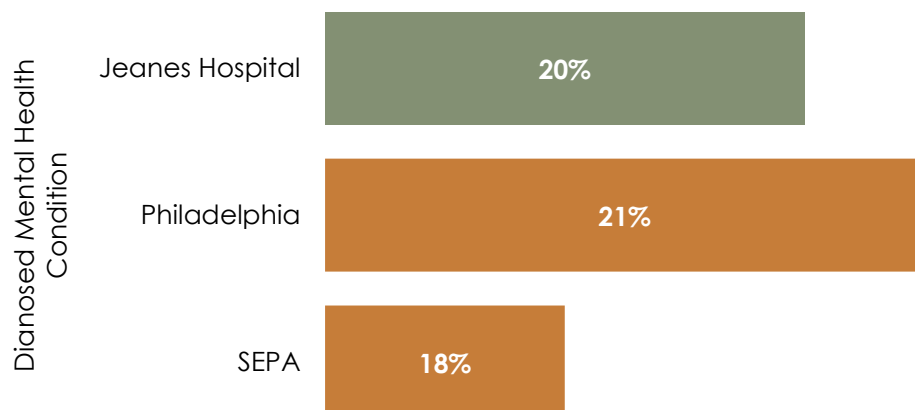

MENTAL AND BEHAVIORAL HEALTH

One in five adults in the service area (20%, or approximately 82,000) has been diagnosed with a mental health condition.

- Of those with a mental health condition, more than one-third (37%) are not receiving treatment for the condition.

- Community meeting attendees mentioned difficulty obtaining mental and behavioral health services. They felt that people with mental health issues may not want help or know that they need help, and there are not enough adequate resources to send them to, especially psychiatrists. Mental illness and substance abuse can be long lasting (chronic). Treatment is very complex and families may not be viable enough financially to afford the cost.

Figure 27. Mental Health Status of Adults 18+, 2015

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

About 21,600 older adults in the service area (24%) have four or more signs of depression on the CES-D 10 Item Depression Scale.

About 6% of older adults in the Jeanes Hospital service area, 7,300, report speaking to friends or relatives less than once a week. This may be an indicator of social isolation, and reflects a percentage comparable to the surrounding county and region.

"Another segment of the population are basically shut-ins for whatever reason, mental health, physical health. They don't get to go to senior groups for whatever reason so they don't connect with those kinds of resources and those folks. You have to go directly to [them] if they aren't going to reach out themselves. And that is one by one by one."

Figure 28. Depression in Older Adults 60+, 2015

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

V. ACCESS TO CARE

Having a regular source of care is important. People who have a regular source of care are more likely to seek care when they are sick compared with those who do not. This allows people to receive earlier, less expensive treatment, get well sooner, and prevents costly complications and longer illnesses.

ECONOMIC BARRIERS

"We see some Medicaid patients that just sign up and do not have prescriptions in place yet, so they may be discharged and not able to purchase the scrips 'til the insurance kicks in, and that could be a couple weeks before that kicks in and they're not taking that medication."

With or without health insurance, 54,600 adults in the service area were unable to get needed care in the past year due to cost.

- 13% of adults reported that there was a time in the past year when they needed health care, but did not receive it due to the cost.
- About 62,500 adults in the Jeanes Hospital service area (15%) were prescribed a medication in the past year but did not fill the prescription due to cost.

Figure 29. Cost Barriers to Care, Adults, 2015

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

HEALTH INSURANCE STATUS

Having health insurance and a regular place to go when sick is important in ensuring continuity of care over time. The service area does not meet the HP 2020 goal of 100% health insurance coverage.

The majority of adults in the service area (89%) have health insurance coverage. However, a sizable percentage of adults aged 18-64 do not have any private or public health insurance; 11% of adults aged 18-64 in the service area are uninsured, representing 36,900 uninsured adults.

- This is comparable to Philadelphia (12%) and higher than across SEPA (9%).

Figure 30. No Health Insurance, Adults 18-64, 2015

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

More than one in five adults in the service area (22% or 86,700 adults) does not have prescription drug coverage. This is comparable to Philadelphia (22%) but higher than SEPA (16%).

Figure 31. No Prescription Drug Insurance, Adults, 2015

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

PRIMARY CARE

Having a regular source of care is important since people who have a regular source of care are more likely to seek care when they are sick compared with those who do not. In the Jeanes Hospital service area, 15% of adults (about 62,400) do not have a regular source of primary care they can consult if they are ill or have a question about their health.

- Approximately 9,300 children in the service area (7%) do not have a regular source of care.

Attendees at community meetings noted long wait times at clinics as a barrier to primary healthcare. In addition, they said:

“Access to transportation for medical follow-ups is a big issue”

“Bilingual physicians; we have many patients who are Latino who don't have an ability to speak to a physician in their own language and don't speak English, and then of course there are insurance challenges at the same time, trying to find a physician who is bilingual, who will take Medicaid. We have a large segment of our population that that applies to.”

Figure 32. No Regular Source of Care, Adults, 2015

Source: PHMC’s 2015 Southeastern Pennsylvania Household Health Survey

PREVENTIVE CARE

Regular health screenings can help identify health problems before they start. Early detection can improve chances for treatment and cure and help individuals to live longer, healthier lives.

In the Jeanes Hospital service area, 12% of adults did not visit a health care provider in the past year; this percentage represents 48,800 adults.

Figure 33. Healthcare Provider Visits, Adults, 2015

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

RECOMMENDED SCREENINGS

Community meeting attendees described screening programs that are offered in the evenings, which can be problematic for seniors who don't drive at night. In addition, they noted that many community members don't understand the importance of these tests.

The following screenings have been recommended as preventive health care for adults. As described below, many in the service area are not accessing these services.

DENTAL VISIT

More than four in ten adults in the service area (42% or about 171,400) did not have a dental visit during the past year.

- This is comparable to Philadelphia, where 41% of adults went without a dental visit in the past year, and higher than the SEPA region as a whole, where 32% of adults did not have a dental visit.

One in five children in the service area (21% or about 30,400) did not have a dental visit during the past year.

Figure 33. No Dental Care Visit in Past Year, Adults, 2015

BLOOD PRESSURE

About 47,000 adults in the service area (12%) did not have a blood pressure test in the past year.

- This is slightly higher than Philadelphia (10%) and the SEPA region as a whole (9%).

COLONOSCOPY

Regular screenings beginning at age 50 are recommended to prevent colorectal cancer.

More than one in three adults 50 years of age and older in the service area (35%) did not have a colonoscopy in the past ten years.

- Screening rates in the Jeanes Hospital service area are lower than in the surrounding area.
- Across the SEPA region, 30% went unscreened, as did 30% in Philadelphia.

PAP SMEAR TEST

Approximately 30,100 women aged 21 to 65 in the service area (17%) did not receive a Pap smear in the past three years. This represents a higher proportion of women unscreened than in Philadelphia (13%) or the SEPA region (13%).

MAMMOGRAM

The American College of Radiology (ACR) and Society of Breast Imaging (SBI) continue to recommend that women get yearly mammograms starting at age 40. The Healthy People 2020 goal for screening mammography is 81.1% of age appropriate women screened. This service area does not meet this goal. In the Jeanes Hospital service area, only 62% of women age 40 and over received a mammogram in the past year; 38% of women age 40+ were unscreened. This represents 57,300 women in the service area. These rates are similar to Philadelphia (35%) and SEPA (38%).

Figure 34. Women's Preventive Screenings, 2015

PSA OR RECTAL EXAMS FOR PROSTATE CANCER

More than one-half of men aged 45 years and older in the Jeanes Hospital service area (55%) did not have a screening for prostate cancer in the past year. This is comparable to Philadelphia (55%), and higher than the proportion of men unscreened across SEPA (49%).

VI. HEALTH BEHAVIORS

NUTRITION

According to the USDA's MyPlate food guidelines, adults should eat 4-5 servings of fruits and vegetables daily.²

In the Jeanes Hospital service area, 86% of adults do not reach this recommended goal.

- This is lower than in Philadelphia (82%) and SEPA as a whole (77%).

Fast foods are often high in unhealthy calories, saturated fats, sugar, and salt. More than four in ten adults in the service area (41%, or about 166,500) reported eating fast food in the past week.

Many families in the service area are not getting adequate nutrition, as noted by community meeting attendees discussing the role of education on healthy cooking and eating.

EXERCISE

The U.S. Department of Health and Human Services' 2008 Physical Activity Guidelines for Americans recommends that adults (ages 18-64) get 2.5 hours of moderate aerobic physical activity each week.³

About three in ten adults in the service area (29%) do not participate in any exercise, and more than one-half (53%) exercise fewer than three times each week.

- Across SEPA, 22% of adults do not exercise.
- The percentage of adults who exercise fewer than three times each week in the Jeanes Hospital service area is higher than the surrounding area.

²The U.S. Departments of Agriculture, (2011). Dietary Guidelines Consumer Brochure. Retrieved online on October 23, 2012 at <http://www.choosemyplate.gov/food-groups/downloads/MyPlate/DG2010Brochure.pdf>

³U.S. Department of Health and Human Services. 2008 Physical Activity Guidelines for Americans, 2008.

TOBACCO USE

The percentage of adults who smoke in the service area **does not meet** the HP 2020 goal of 12%. The percentage of smokers who have tried to quit in the past year **does not meet** the HP 2020 goal of 80%.

In the Jeanes Hospital service area, 22% of adults smoke cigarettes. This represents approximately 95,700 adults.

- This is higher than the surrounding area: 16% of Philadelphia adults and 16% of all adults across SEPA smoke cigarettes.

Within the service area, 65% of smokers have tried to quit during the past year.

- This is higher than in Philadelphia (61%) and SEPA as a whole (59%), but does not meet the HP 2020 goal of 80% of smokers trying to quit.

Figure 35. Adult Smokers, 2015

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

VII. SPECIAL POPULATIONS

One of the goals of this needs assessment was to identify health needs of special populations across the Jeanes Hospital service area. This section focuses on selected health status and access to care needs of special populations in the service area.

OLDER ADULTS

The community meeting identified older adults as a population with specific needs and challenges related to health care. Similar to the region overall, the entire population in the Jeanes Hospital service area is aging: currently, 12% of the population are age 65 or older, with the proportion of older adults expected to increase to 14% of the population by 2020, representing more than 76,000 adults age 65 and older.

Older adults in the Jeanes Hospital service area are more likely than other older adults in SEPA to experience poor health generally, as well as certain chronic health conditions.

- Nearly two in five (39%) older adults in the service area are in fair/poor health.
- About one in six (16%) older adults experience limitations with at least one activity of daily living (such as eating, bathing, or walking).
- One in three (31%) have limitations in the instrumental activities of daily living, such as cleaning, shopping, using the telephone, or managing medications.
- Two out of three (66%) older adults have high blood pressure; a majority (57%) have arthritis; one in three (31%) have diabetes, and one in four (24%) have signs of depression.

Older adults in this service area are more likely to report using supportive services and have plans to leave their home sooner than residents of other areas in SEPA.

- More than one in ten older adults (11%) paid for care in their home in the past year.
- Nearly one in ten (9%) needs transportation services.
- Nearly one in three (30%) plans to remain in their current home for five years or less.

Older adults may have more trouble accessing health information relevant to understanding the need for screenings, treatment regimens, or navigating the health care system in general, as compared to younger people, according to the community meeting attendees:

- Community meeting attendees emphasized that much information is only available online, and that older adults often do not have access to the internet or do not understand how to find these resources. Hard copies of educational materials and other resources are needed to reach this population.
- In addition, community members discussed the possibility that age-related cognitive challenges may affect the ability of some older adults to navigate health care systems, and manage their medical conditions.

Transportation challenges were noted as a significant barrier for this population by community meeting participants.

- Public transportation in the service area can be slow, dangerous, require multiple transfers, and/or physically challenging for some older adults.
- Services for people with limited mobility are often not reliable.
- Even older adults who drive are reluctant to drive in the area when it is dark out, or at times when there is a lot of traffic.

RACIAL AND ETHNIC DISPARITIES

Community members discussed concerns about racial and ethnic disparities in access to care in the Jeanes Hospital service area. In this area, no one racial/ethnic group is a majority.

- A little more than one in three residents of the service area (36%) is White; this proportion is decreasing and will be 33% by 2020.
- About one in four residents (28%) is Black; one in four (26%) is Latino/Hispanic; 8% are Asian and 3% are other ethnicities.

The Latino and Asian populations in this service area are increasing. Some themes emerged that were common to multiple communities:

- Language barriers:
 - Some racial and ethnic communities experience language barriers when trying to access information, screenings, or care for cancer. Although two-thirds (66%) of the population in the service area speaks English at home, many residents speak Spanish (19%); Asian languages (6%) or other languages (10%) at home.
 - In addition to language barriers, providing written materials in the language that is spoken by the community may not be enough for all communities, because many have low levels of reading comprehension in their own language.
- Immigrant groups:
 - Legal status:

- Even those who have a green card or other legal immigration status sometimes do not have access to insurance.
- Undocumented populations often fear that engaging in the medical system in any way will result in deportation, which means they often do not access screenings, diagnostic services, or care until they become very ill.
- Lack of familiarity with the medical system: Although the medical system is complex for many people to access, immigrants who are unfamiliar with everything about the US medical care system may not know where to start when obtaining needed care.

LOW INCOME POPULATIONS

Many households in the Jeanes Hospital service area struggle financially. The median income in 2015 was just over \$36,000.

- About one in five people in the work force in the service area (18%) are unemployed.
- Nearly one in three (32%) households with children has an income under the poverty line, as does nearly one in four (23%) households without children.

Financial barriers to care are significantly more common in the service area than in other parts of SEPA.

- Among adults, 11% are uninsured. About one in five (22%) do not have any prescription insurance.
- One in seven (15%) adults and about one in fifteen children (7%) does not have a regular source of care.
- Among adults, one in eight (12%) did not visit a health care provider in the past year at all.
- One in eight (13%) adults did not receive needed care in the past year due to the cost. Community meeting attendees also discussed how the cost of transportation or taking off work can deter adults from seeking both routine and urgent care.
- About one in seven adults (15%) did not fill a needed prescription due to cost; community members indicate that not filling prescriptions, filling selectively, or not taking prescriptions as prescribed may be even more common than this.

Community meeting attendees also discussed non-financial barriers to routine medical care among those who have limited incomes.

- Some community members felt that a physician's willingness to talk to patients "like people" depended on the patient's income level.

- Going outside the neighborhood is not only costly, but stressful and time-consuming when using public transportation.
- Some believe that there is no reason to get screenings when treatment will not really be available to them because they are uninsured or underinsured.

Access to dental care in this population was of serious concern for community members:

- Two out of five adults (42%) and one in five (21%) children did not visit a dentist in the past year, significantly more than in other areas of SEPA.
- Community members state that the main barrier to dental care in this population is cost.

Access to healthy food is also an issue for low income adults and children in the service area:

- A large majority of both adult (86%) and child (75%) service area residents ate fewer than four servings of fruit and vegetables in a typical day.
- One in seven adults in the service area (15%) cut out a meal in the past month due to financial reasons, more than twice as many as in SEPA overall.

Community meeting attendees also discussed concerns about mental health among lower income populations.

- In the service area, one in five residents (20%) were diagnosed with a mental health condition, significantly more than other parts of SEPA.
- Community members linked mental health issues to physical health conditions common in the population, including diabetes, high blood pressure, and heart disease.

VIII. EXISTING RESOURCES

EXISTING HEALTH CARE RESOURCES

The existing health and social services in the service area, and for Southeastern Pennsylvania as a whole, were inventoried for this report. Information on health and social services was obtained by internet searches and from the Yellow Pages. Health services included: acute care general hospitals; inpatient psychiatric hospitals and long-term psychiatric facilities; and rehabilitation hospitals. Skilled and intermediate care nursing facilities were not included. Health services also included community health centers and clinics, urgent care centers, and state, city, and county health department service locations. Existing social services which were inventoried included: food pantries, WIC centers, farmer's markets, and soup kitchens; community outpatient mental health and mental retardation services; senior services; social work services; homeless and domestic violence shelters; and YMCA's. These existing health care and social service resources are shown in Appendix F.

IX. SOCIAL DETERMINANTS OF HEALTH AND UNMET NEEDS

The World Health Organization (WHO) defines the Social Determinants of Health as “the conditions in which people are born, grow, live, work and age...which are mostly responsible for health inequities.” This definition is seconded by HP 2020, which defines the social determinants of health as, “the conditions in the places where people live, learn, work, and play which affect a wide range of health risks and outcomes.”

Much of the unmet need in the Jeanes Hospital service area relates to key social determinants of health, such as:

- Housing access;
- Work conditions;
- Poverty;
- The built environment, which influences healthy food access and physical activity; and
- Health care access.

To help think about how best to address the social determinants of health, HP 2020 developed a place-based organizing framework reflecting five key areas of the social determinants of health:

- Economic Stability;
- Education;
- Social and Community Context;
- Health and Health Care; and
- Neighborhood and Built Environment.

These five areas can be applied to future interventions that need to be prioritized in the Jeanes Hospital service area, since all of the health outcomes that need to be improved are driven by the social determinants of health listed above.

The unmet health care needs for the Jeanes Hospital service area were identified and prioritized by comparing the health status, access to care, health behaviors, and utilization of services for residents of the service area to results for the county and state and the HP 2020 goals for the nation. The current needs assessment, conducted by PHMC, builds upon previously identified unmet health needs using more recent data to review the following health needs and priorities.

In addition, for Household Health Survey variables, statistical tests of significance were conducted to identify and help to prioritize unmet needs. Lastly, input from the

community meeting participants was also used to further identify and prioritize unmet needs, local problems with access to care, and populations with special health care needs. The following are the major findings of this assessment. (For Significance Tables, see Appendix E).

The three following priority areas were identified: (1) Obesity and overweight BMI; (2) Barriers that impede access to basic disease screenings and (3) Culturally competent care.

HEALTH STATUS

While the overwhelming majority of adults and children in the service area are in excellent, very good, or good health (75% of adults and 92% of children), many adults and children suffer from chronic illness that could be prevented or alleviated through early identification and consistent primary care.

CHRONIC ILLNESS

Cancer, high blood pressure, diabetes, asthma, are chronic illnesses that require ongoing care. Cancer is the leading cause of death in the service area (202; representing 1,057 deaths). This does not meet the HP 2020 goal of 161. Among all cancers, lung cancer has the highest site specific cancer mortality rate (55: 284), followed by female breast (25: 76), prostate (24: 48) and colorectal cancer (19: 102).

The other four leading causes of death are Coronary Heart Disease (150: 827), Accidents (53: 284), Stroke (40: 224), and Diabetes (22: 118).

High blood pressure, overweight and obesity, and diabetes are all chronic conditions that have been associated with coronary heart disease, asthma, stroke, and several types of cancer.

One-third of adults in the Jeanes Hospital service area (33%, or 155,200 adults) have been diagnosed with high blood pressure. This does not meet the Healthy People 2020 goal of 27%. Among adults with high blood pressure in the service area, nearly one in twelve (8%) report not taking all or nearly all of their medication all of the time.

In addition, about 66,100 adults in the Jeanes Hospital service area, 16%, have been diagnosed with diabetes, a percentage that is higher than SEPA overall (13%). In addition, one-third of older adults age 60+ (33%) have diabetes.

Nearly one in five children (18%) and 19% of adults have been diagnosed with asthma; this represents 25,700 children in the service area. This is lower than Philadelphia overall (22%) and comparable to childhood asthma rates across the SEPA region (18%).

More than one in three service area adults age 20 and over (35%) are obese, and a similar proportion are overweight (36%). This represents approximately 285,500 adults who are overweight or obese in the Jeanes Hospital service area. About 30,800 children in the service area (36%) are classified as obese, and 20% are overweight.

One in five adults in the service area (20%, or approximately 82,000) has been diagnosed with a mental health condition. Of those with a mental health condition, more than one-third (37%) are not receiving treatment for the condition. Community meeting attendees said that mental health is a major access to care issue.

HEALTH BEHAVIORS

In the Jeanes Hospital service area, 86% of adults do not reach the recommended goal of eating 4-5 vegetables or fruit each day. This is worse than in Philadelphia (82%) and SEPA as a whole (77%). In addition, more than four in ten adults in the service area (41% or about 166,500) reported eating fast food in the past week.

About three in ten adults in the service area (29%) do not participate in any exercise, and more than one-half (53%) exercise fewer than three times each week. This does not follow the U.S. Department of Health and Human Services' 2008 Physical Activity Guidelines for Americans.

Cigarette smoking is associated with many health conditions, including heart disease, the second leading cause of death in the service area. In addition, smoking is one of the most frequent causes of lung cancer, which is, among all cancers, the leading cause of death from cancer in the service area.

The percentage of adults who smoke in the service area (22%) does not meet the HP 2020 goal of 12%. The percentage of smokers who have tried to quit in the past year (65%) does not meet the HP 2020 goal of 80%.

ACCESS TO CARE

The service area does not meet the HP 2020 goals of 100% of residents with health insurance coverage.

While the majority of adults (89%) in the service area have health insurance coverage, a sizable percentage of adults aged 18-64 do not have any private or public health insurance. One in nine (11%) adults aged 18-64 in the service area is uninsured, representing 36,900 uninsured adults. This is comparable to Philadelphia (12%) and higher than across SEPA (9%). About one in four (22%) do not have any prescription insurance.

In the Jeanes Hospital service area, 15% of adults (about 62,400) and 9,300 children do not have a regular source of primary care they can consult if they are ill or have a question about their health.

Regular health screenings can help identify health problems before they start. Early detection can improve chances for treatment and cure and help individuals to live longer, healthier lives. However, more than four in ten adults in the service area (42% or about 171,400) and 21% of children (representing 30,400 children) did not have a dental visit during the past year.

Screenings for specific health conditions, such as colon, breast, and prostate cancer can result in earlier treatment, which can lower mortality rates. However, many residents of the Jeanes Hospital service area are not being screened.

- More than one in three adults 50 years of age and older in the service area (35%) did not have a colonoscopy in the past ten years. Screening rates in the Jeanes Hospital service area are lower than in the surrounding area.
- Yearly mammograms are recommended for women age 40 and over. About 57,300 women age 40 and over in the service area (38%) did not have a mammogram in the past year. This is higher than Philadelphia (35% unscreened), and SEPA (38% unscreened).
- More than one-half of men aged 45 years and older in the Jeanes Hospital service area (55%) did not have a screening for prostate cancer in the past year. This is comparable to Philadelphia (55%), and higher than the proportion of unscreened men across SEPA (49%).

NEEDS SUMMARY

For most of the SEPA Household Health Survey indicators, the findings for the service area were statistically the same as the region as a whole. However, a sizable amount

of indicators were statistically worse than the region as a whole and could be prioritized for improvement. These areas are:

- Percentage of adults (18+) ever diagnosed with high blood pressure
- Percentage of adults (18+) ever diagnosed with diabetes
- Percentage of adults (18+) ever diagnosed with asthma
- Percentage of adults (20+) and children who are overweight
- Percentage of adults (20+) and children who are obese
- Percentage of adults (18+) ever diagnosed with a mental health condition
- Percentage of adults (18+) and children with no regular source of care
- Percentage of adults (18+) who did not receive needed care due to cost
- Percentage of adults (18+) that did not fill a prescription due to cost
- Percentage of adults (18-64) currently uninsured
- Percentage of adults and children who did not have a dental visit
- Percentage of adults (50+) who did not have a colonoscopy in the past ten years
- Percentage of women (21-65) who did not have a Pap test in the past three years
- Percentage of adults (18+) who consume <4 servings of fruit and vegetables/day
- Percentage of adults (18+) who exercise regularly
- Percentage of older adults (18+) who smoke cigarettes

Analysis of the quantitative and qualitative data collected shows that the unmet health care needs of the residents of this service area include the following prioritized needs:

- Access to primary health care for low income adults and children. In particular, across the continuum of care for chronic disease management.
- Access to mental health and substance abuse treatment.
- Access to preventive health care and routine health screenings. In particular, cancer screenings for women and dental care for adults and children.
- Availability of high quality, affordable care, particularly for those individuals living in or near poverty, and who are uninsured or underinsured.
- Increased smoking cessation/ support resources.

Priority unmet needs in this area also include increased educational programs to address:

- Heart disease, and cancer management for all residents, with a special focus on causative health behaviors and other factors;
- Access to low cost health insurance;
- Health education about healthy lifestyles and disease management; and
- Smoking cessation counseling.

As stated by some PDPH representatives: "Better collaboration between public health and clinical health care on childhood asthma, childhood obesity, and women's reproductive health is an important area."

Many of these unmet needs are already being addressed in the CHNA area by the hospital, other health care providers, government, and local non-profits. The mission of Jeanes Hospital is to maintain and enhance the quality of life for individuals in the communities it serves.

APPENDIX A: PHMC'S COMMUNITY AND POPULATION ASSESSMENTS

A list of community and population assessments PHMC has completed includes:

- 28 Community Health Needs Assessments for DVHC Member Hospitals, 2012
- Berks County Community Health Needs Assessment, 2012
- Philadelphia Health Care Trust Needs Assessment, 2011
- School District of Philadelphia Head Start Needs Assessment, 2010
- Jewish Federation of Greater Philadelphia Older Adult Needs Assessment, 2010
- Main Line Area Older Adults Needs Assessment, 2010
- William Penn Foundation Youth Development Initiative Population Studies, 2006, 2008, 2010
- National Nursing Centers Consortium Northeast Philadelphia Needs Assessment, 2009
- Latino Youth Needs Assessment, 2009
- National Children's Study Montgomery County Vanguard Center Needs Assessment, 2008
- Planned Parenthood of Bucks County LGBTQ Needs Assessment, 2007
- Project HOME North Philadelphia Needs Assessment, 2006
- Children's Hospital of Philadelphia Early Head Start Needs Assessment, 2003 and 2006

APPENDIX C: VITAL STATISTICS TABLES

KEY

 Blue shading indicates HP 2020 Goal is not been met.

Bar graphs in right column represent changes in the values of the indicators.

Table 1. Average Annualized Fertility Rates for Women 15-44 Years by Race and Ethnicity, 2009-2012, in Jeanes Hospital's Service Area

	Jeanes Hospital	Philadelphia County	SEPA	
	Rate per 1,000 Number	Rate per 1,000 Number	Rate per 1,000 Number	
All Women 15-44	74.0 8,782	63.8 23,033	59.9 49,720	
Race/Ethnicity*				
White	52.0 2,541	42.8 6,238	50.0 25,570	
Black	74.1 2,873	72.1 10,969	69.9 14,412	
Asian	62.7 587	51.0 1,411	58.7 3,380	
Other	103.7 2,251	93.4 3,353	87.6 4,848	
Latina	87.2 2,651	84.6 3,965	84.7 6,106	
Non-Latina	67.5 5,963	58.6 18,435	56.3 42,708	

Notes:

The fertility rate is calculated per 1,000 women 15-44 years of age.

White, Black, Asian and Other races include Latinas.

*Unknown race and ethnicity appear only for the total.

Source: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

Table 2. Average Annualized Fertility Rates for Women 15-17 Years by Race and Ethnicity, 2009-2012, in Jeanes Hospital's Service Area

	Jeanes Hospital	Philadelphia County	SEPA	
	Rate per 1,000 Number	Rate per 1,000 Number	Rate per 1,000 Number	
All Women 15-17	30.1 387	30.7 944	15.7 1,299	
Race/Ethnicity*				
White	9.7 46	9.2 76	4.3 209	
Black	36.0 167	36.1 615	33.1 769	
Asian	7.6 7	9.0 15	4.3 18	
Other	54.4 141	50.7 194	38.5 244	
Latina	44.6 166	45.8 232	40.6 309	
Non-Latina	23.6 216	26.6 683	12.7 951	

Notes:

The fertility rate is calculated per 1,000 women 15-17 years of age.

White, Black, Asian and Other races include Latinas. *Unknown race and ethnicity appear only for the total.

Source: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

Table 3. Average Annualized Low Birth Rates by Race and Ethnicity, 2009-2012, in Jeanes Hospital's Service Area

	Jeanes Hospital	Philadelphia County	SEPA	
	Rate per 1,000 Number	Rate per 1,000 Number	Rate per 1,000 Number	
All Live Births	103.9 916	108.7 2,514	90.6 4,525	
Race/Ethnicity*				
White	74.2 189	73.5 460	67.6 1,736	
Black	140.6 406	135.8 1,497	133.0 1,926	
Asian	82.8 49	83.5 118	79.5 269	
Other	97.2 220	96.8 326	89.3 435	
Latino/a	95.1 253	95.6 381	85.1 522	
Non-Latino/a	105.8 633	109.7 2,031	90.0 3,860	

Notes:

Low birth weight is defined as an infant weighing less than 2500 grams (5.5 lbs.) at birth. The low birth weight rate is calculate per 1,000 live births.

White, Black, Asian and Other races include Latino/as. *Unknown race and ethnicity appear only for the total.

Source: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

Table 4. Average Annualized Percentage of Infants Born Prematurely by Race and Ethnicity, 2009-2012, in Jeane Hospital's Service Area

	Jeane Hospital	Philadelphia County	SEPA	
	Percentage Number	Percentage Number	Percentage Number	
All Live Births	11.3 988	11.6 2,670	10.2 5,058	
Race/Ethnicity*				
White	9.6 243	8.9 554	8.6 2,192	
Black	14.1 405	13.9 1,523	13.6 1,955	
Asian	7.9 47	8.4 119	7.7 258	
Other	10.6 238	10.3 346	9.8 476	
Latino/a	10.2 271	10.3 410	9.7 591	
Non-Latino/a	11.6 686	11.7 2,158	10.2 4,325	

Notes:

Prematurity is defined as the birth of an infant before 37 weeks gestation. The percentage of infants born prematurely is calculated as a percentage of all live births that have birth certificate data on gestational age.

White, Black, Asian and Other races include Latino/as. *Unknown race and ethnicity appear only for the total.

Source: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

Table 5. Average Annualized Percentage of Women Receiving Late or No Pre-natal Care by Race and Ethnicity, 2009-2012, in Jeanes Hospital's Service Area

	Jeanes Hospital	Philadelphia County	SEPA	
	Percentage Number	Percentage Number	Percentage Number	
All Live Births	44.8 3,662	46.2 9,939	35.8 17,051	
Race/Ethnicity*				
White	33.6 807	32.5 1,953	24.1 6,045	
Black	50.8 1,344	53.0 5,317	51.7 6,905	
Asian	39.7 215	41.9 556	33.0 1,073	
Other	51.0 1,082	51.7 1,645	51.3 2,373	
Latina	49.5 1,234	50.2 1,883	49.3 2,875	
Non-Latina	42.5 2,357	45.2 7,766	33.5 13,756	

Notes:

The percentage of women receiving late or no pre-natal care is calculated as the percentage of all live births that have birth certificate data on receipt of prenatal care.

Late prenatal care is defined as not having a recorded prenatal care visit in the 1st or 2nd trimesters, or none at all.

White, Black, Asian, and Other races include Latina/os. *Unknown race and ethnicity only appear for the total.

Source: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

Table 6. Average Annualized Infant Mortality Rate by Race and Ethnicity, 2009-2012, in Jeanes Hospital's Service Area

	Jeanes Hospital	Philadelphia County	SEPA	
	Rate per 1000 Number	Rate per 1000 Number	Rate per 1000 Number	
All Live Births	8.6 76	9.3 215	7.3 365	
Race/Ethnicity*				
White	9.5 24	8.0 50	5.4 139	
Black	14.6 42	13.4 148	13.4 194	
Asian	4.2 3	4.2 6	3.6 12	
Other	3.2 7	3.4 12	4.0 20	
Latino/a	6.9 18	6.1 24	5.7 35	
Non-Latino/a	9.4 56	10.0 186	7.5 322	

Notes:

Infant mortality is defined as the death of an infant within the first year of birth and is calculated per 1,000 live infant births.

White, Black, Asian and Other races include Latino/as. Unknown race and ethnicity is included only in the total.

Source: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

Table 7. Age-Adjusted Annualized Mortality Rates for Selected Causes of Death, 2009-2012, in Jeanes Hospital's Service Area

	Healthy People 2020 Goal	Jeanes Hospital	Philadelphia County	SEPA	
	Rate per 100,000	Rate per 100,000 Avg. Number	Rate per 100,000 Avg. Number	Rate per 100,000 Avg. Number	
All Causes of Death		860.8 4,685	893.4 14,009	756.38 34,900	
All Cancers	161.4	201.8 1,057	211.9 3,267	183.9 8,325	
Female Breast Cancer	20.7	24.9 76	28.5 259	25.6 664	
Lung Cancer	45.5	55.0 284	58.0 888	49.0 2,193	
Colorectal Cancer	14.5	19.1 102	19.5 302	16.6 758	
Prostate Cancer	21.8	24.0 48	33.7 190	24.3 421	
Cervical Cancer	2.2	2.5 7	3.6 31	2.3 664	
Coronary Heart Disease	103.4	150.2 827	153.3 2,415	119.7 5,657	
Stroke	34.8	40.4 224	44.8 711	40.3 1,917	
HIV/AIDS	3.3	5.1 27	7.7 115	3.6 152	
Homicide	-	14.9 84	18.5 307	9.4 374	
Suicide	10.2	11.0 58	10.0 152	10.9 458	
All Accidents	-	52.5 284	45.0 692	37.0 1,576	
Motor Vehicle Accidents	-	7.6 41	6.2 98	6.0 248	
Accidental Drug/Alcohol Poisoning	-	3.2 17	3.2 49	3.6 1,576	
Diabetes	66.6*	22.0 118	23.0 357	17.4 796	

Highlighted cells do not meet HP2020 Goal.

Note:

Mortality rates are calculated per 100,000 population.
Denominators to calculate age-adjusted rates to the Standard 2000 population derive from 2010 Census ZCTA data broken down into 19 age groups.

*Diabetes-related mortality data are derived from the multiple-cause-of-death files. Data include all mentions of diabetes on the death certificate, whether as an underlying or a multiple cause of death. Diabetes is approximately three times as likely to be listed as multiple cause of death than as underlying cause.

APPENDIX D: HOUSEHOLD HEALTH SURVEY TABLES

KEY	
	Blue shading indicates HP 2020 Goal is not been met.
Bar graphs in right column show changes in the values of the indicators	

Table 1. Health Status of Adults 18+, 2015

	Service Area	Philadelphia County	SEPA	
	N %	N %	N %	
Overall Health Status				
Excellent/Very Good/Good	297,100 73.4	904,400 76.4	2,604,600 82.3	
Excellent/Very Good/Good (age adjusted)*	75.3	78.2	83.8	
Fair/Poor	107,800 26.6	278,700 23.6	560,800 17.7	

Healthy People 2020 Goal for Good or Better Health: 79.8%. Highlighted cells do not meet HP2020 Goal.

Mental Health

Diagnosed with mental health condition	82,000 20.2	245,800 20.8	551,400 17.5	
Receiving treatment for mental health condition	51,800 63.2	159,300 65.1	344,100 62.6	

Body Mass Index, Adults 20+

Overweight	141,900 35.7	377,800 33.0	1,057,800 34.4	
Obese	143,600 36.1	388,300 33.9	926,500 30.1	
Obese (age adjusted)*	35.2	34.0	29.3	

Healthy People 2020 Goal for Obesity is 30.6% of adults 20+. Highlighted cells do not meet HP2020 Goal. Overweight is defined as having a BMI of 25-29 and obese is defined as having a BMI of 30 or greater.

Chronic Health Conditions

Ever diagnosed with asthma	78,300 19.2	230,300 19.5	539,300 17.0	
Ever diagnosed with diabetes	66,100 16.2	181,500 15.4	401,500 12.7	
Ever diagnosed with high blood pressure	155,200 38.2	449,000 39.1	1,051,100 33.3	
High BP (age adjusted)*	33.0	33.5	27.4	
Not taking prescribed BP medication all or nearly all the time	10,200 7.7	28,000 7.3	46,300 5.2	
Not taking prescribed BP medication all or nearly all the time (age adjusted)*	5.7	7.4	6.7	

Healthy People 2020 Goal for adults with hypertension is 26.9% or fewer, and for adults with hypertension taking medication, 69.5% or more. Highlighted cells do not meet HP2020 goal.

Notes:

*Age adjusted using the direct method and the 2000 U.S. standard million population.

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

Table 2. Health Insurance and Access to Care for Adults 18+, 2015

	Service Area	Philadelphia County	SEPA	
	N	N	N	
	%	%	%	
Insurance Status				
Uninsured (18-64)	36,900	118,700	214,200	
	10.9	12.4	8.6	
No RX insurance	86,700	253,600	503,100	
	21.7	21.9	16.2	
Enrolled in Marketplace plan since 2013	32,000	84,000	198,200	
	44.3	38.0	36.3	
Healthy People 2020 Goal for health insurance is 100% of all adults. Highlighted cells do not meet HP2020 goal.				

Access to Care				
No regular source of care	62,400	174,400	400,600	
	15.3	14.7	12.7	
In the past year did not...				
Receive health care due to cost	54,600	136,100	323,400	
	13.4	11.5	10.2	
Fill a prescription due to cost	62,500	179,000	419,800	
	15.3	15.1	13.3	
Healthy People 2020 Goal for adults with no regular source of care is 26.1% Highlighted cells do not meet HP2020 goal.				

Notes:

Source: PHMC's 2015 Southeastern Pennsylvania Household Health Survey

Table 3. Personal Health Behaviors of Adults 18+, 2015

	Service Area	Philadelphia County	SEPA	
	N %	N %	N %	
Diet and Nutrition				
Fewer than four servings of fruits and vegetables in a typical day	336,600 85.7	922,800 81.4	2,369,100 77.1	
Ate fast food in the past week	166,500 40.7	457,300 38.6	1,087,700 34.3	
Cut a meal in the past year due to cost	14,300 15.0	36,400 11.6	61,500 6.6	

Physical Activity				
Did not exercise in the past month	115,800 28.6	271,600 23.0	685,400 21.7	
Exercised fewer than 3 days per week	215,000 53.1	558,500 47.3	1,526,800 48.4	
Comfortable visiting neighborhood outdoor space during the day	280,100 70.0	849,200 73.1	2,431,800 78.2	
Healthy People 2020 Goal for no leisuretime physical activity is 32.6%. Highlighted cells do not meet HP 2020 Goal.				

Cigarette Smoking				
Smokes cigarettes*	95,700 22.1	263,800 16.0	538,700 15.5	
Tried to quit smoking in past year (among smokers)	62,500 65.4	160,000 60.7	316,300 58.7	
Used e-cigarettes once or more in past month	31,500 7.7	86,700 7.3	217,900 6.9	
Someone smokes cigarettes inside home	64,800 15.8	180,800 15.3	372,100 11.7	
Healthy People 2020 Goal for cigarette smoking is 12%, Goal for smokers trying to quit is 80%, and goal for smokefree homes is 87%. Highlighted cells do not meet HP2020 Goal.				

Notes:

*Age adjusted using the direct method and the 2000 U.S. standard million population.

Table 5. Health Status and Service Needs of Older Adults 60+, 2015

	Service Area	Philadelphia County	SEPA	
	N %	N %	N %	
Health Status				
Excellent/Very Good/Good	59,300 61.4	205,000 70.7	689,900 79.3	
Fair/Poor	37,300 38.6	85,100 29.3	180,000 20.7	
Fallen in past year	23,600 24.3	63,500 21.9	191,500 22.0	
Activities of Daily Living				
At least one ADL limitation	15,200 15.7	46,300 15.9	105,400 12.1	
At least one IADL limitation	30,400 31.4	88,900 30.6	210,400 24.1	
ADL refers to Activities of Daily Living. IADL refers to Instrumental Activities of Daily Living.				
Mental Health and Social Isolation				
Signs of depression	21,600 24.3	48,200 18.2	97,400 12.1	
Talks to friends or relatives less than once a week	5,600 5.9	13,500 4.7	49,000 5.7	
Signs of depression is defined as having four or more depression symptoms on a ten item scale.				
Health Conditions				
Diagnosed with asthma	18,500 19.1	47,400 16.4	106,600 12.3	
Diagnosed with high blood pressure	63,600 65.8	191,400 66.1	493,600 56.8	
Diagnosed with diabetes	29,800 30.7	78,100 27.0	194,400 22.4	
Diagnosed with arthritis (2012)	49,000 57.3	348,000 29.1	440,100 52.8	
Wishes to Remain in Current Home				
Five years or less	25,500 30.8	59,900 22.8	162,500 20.4	
More than five years, less than ten	13,900 16.9	38,200 14.5	124,500 15.6	
Ten or more years	43,300 52.3	165,000 62.7	508,900 63.9	
Home Care & Other Services				
Paid for care in the home in past year	10,400 10.7	26,400 9.1	67,600 7.8	
Needs meal or food programs	4,700 5.4	18,200 7.0	25,000 3.1	
Needs transportation services	6,900 9.0	24,900 10.5	47,300 6.1	

Notes:

*Age adjusted using the direct method and the 2000 U.S. standard million population.

Table 6. Selected Child (Ages 0-17) Health Indicators, 2015

	Service Area	Philadelphia County	SEPA	
	N %	N %	N %	
Health Status				
Excellent/Very Good/Good	131,700 91.6	318,400 93.4	867,600 95.3	
Fair/Poor	12,000 8.4	22,500 6.6	42,700 4.7	
Diagnosed with asthma	25,700 17.9	73,500 21.5	167,500 18.4	
Access to Care				
No regular source of care	9,300 6.5	14,600 4.3	31,800 3.5	
Did not visit dentist in past year	30,400 21.2	69,500 20.4	161,000 17.7	
Did not receive needed dental care due to cost	3,800 2.6	16,900 4.9	35,000 3.8	
Body Mass Index (age 6+)				
Overweight	17,200 20.0	36,900 17.9	93,400 16.2	
Obese	30,800 35.7	65,700 32.0	123,500 21.4	
Overweight is calculated for children 6-17 years and is defined as scoring in the 85th-94th BMI-for-age percentile. Obese is calculated for children 6-17 years and is defined as scoring in the 95th of greater BMI-for-age percentile.				
Nutrition and Physical Activity				
Fewer than four servings of fruits and vegetables in a typical day	91,100 74.6	211,200 74.0	579,300 74.0	
Exercised fewer than 3 times per week (age 3+)	25,800 21.7	53,300 19.0	140,800 18.1	
Early Childhood Education				
Average number of hours/week in ECE setting (age 0-6)	14.1	14.4	13.6

APPENDIX E: SIGNIFICANCE TESTING

KEY

NS = not statistically significant,
.05 = statistically significant,
.01 = highly statistically significant,
.001 = very highly statistically significant.

Green = the value for this variable for the SERVICE area is significantly better than for the remainder of SEPA

Red = the value for this variable for the SERVICE area is significantly worse than for the remainder of SEPA

Adults (18-64)	
Health Measure	Significance level
In fair or poor health	0.001
Ever diagnosed with high blood pressure	0.001
Ever diagnosed with diabetes	0.001
Ever diagnosed with asthma	0.05
Overweight (age 20+) (BMI percentile = 25 - 29.9)	0.001
Obese (age 20+) (BMI percentile = 30 or higher)	0.001
Ever diagnosed with a mental health condition	0.01
Receive treatment for a mental health condition	NS
Did not receive care in past year due to cost	0.001
Did not fill prescription in past year due to cost	0.05
Currently uninsured (ages 18-64)	0.01
Looked into buying insurance through healthcare.gov	NS
Difficult to find a plan with affordable monthly premiums	NS
Difficult to find a plan with affordable copays and deductibles	NS
Does not have a regular source of healthcare	0.01
No visits to healthcare provider in past year	NS
No dental visit in past year	0.001
Blood pressure not taken in past year	0.001
No colonoscopy or sigmoidoscopy in past 10 years (50+)	0.01
No pap test in past 3 years (female 21-65)	0.01
No breast exam in past year (female)	NS
No mammogram in past 2 years (female 50-74)	NS
No prostate screening in past year (male 45+)	0.05
Consumed fast food three or more times in past week	0.001
Fewer than 4 servings of fruits and vegetables per day	0.001
<3 days with 30 minutes of exercise/week, past month	0.001
Currently smokes cigarettes	0.001
Tried to quit smoking in past year	0.05
Low social capital	0.001
Older Adults (60+)	
In fair or poor health	0.001
Any ADL limitations	NS
Any IADL limitations	0.01
Signs of depression (4+ symptoms in 10 point scale)	0.001
Children (0-17)	
In fair or poor health	0.001
Overweight (BMI percentile = 85 – 94.9)	0.001
Obese (BMI percentile = 95 or higher)	0.001
Has no regular source of healthcare	0.001
Fewer than 4 servings of fruits and vegetables per day	NS
<3 days with 30 minutes of exercise/week, past month	0.05
Examined by dentist in the past year	0.05
