I. INTRODUCTION

ABOUT JEANES HOSPITAL

Jeanes Hospital was founded in 1928 by virtue of a bequeath in the will of Philadelphia Quaker leader Anna T. Jeanes. Now more than eight decades later, Jeanes Hospital is a member of the Temple University Health System. Jeanes Hospital's mission is to be the destination for all who need ambulatory, inpatient acute, surgical and home care in Northeast Philadelphia and surrounding areas, by combining the compassionate nature of a Quaker-founded community hospital with the advanced capabilities of an academic medical center. Jeanes Hospital also devotes manpower and budgetary resources to provide health screenings, vaccinations and health education opportunities to its community. Jeanes Hospital includes 176 licensed beds. Last year, Jeanes discharged 7,600 inpatients, cared for 110,000 outpatients, and handled 30,000 emergency department visits. Jeanes Home Health division also conducted over 33,000 visits to patients in their homes by registered nurses.

Jeanes Hospital's key services include:

- High-acuity surgical services – cardiothoracic surgery, joint replacement surgery, spine surgery, weight-loss surgery, neurosurgery, oncologic surgery, minimally-invasive general and urology surgery;
- Medical services – cardiology, oncology, primary care, wound care; and
- Procedures and tests – cardiac catheterization, electrophysiology, stress echocardiogram, MRI scan, CT scan, endoscopy, interventional radiology, digital mammography, hyperbaric oxygen therapy.

In addition to Jeanes Hospital, other hospital members of the Temple University Health System include Temple University Hospital and the American Oncologic Hospital of the Fox Chase Cancer Center.

PURPOSE AND METHODOLOGY

This report summarizes the results of an assessment of the health status and health care needs of residents of the Jeanes Hospital service area. The needs assessment was conducted by Public Health Management Corporation, a private non-profit public health institute. The purpose of the needs assessment is to identify and prioritize community health needs so that the hospital can develop strategies and implementation plans that benefit the public as well as satisfy the requirements of the Affordable Care Act.

This introduction includes a definition of the community assessed in the report, the demographic and socioeconomic characteristics of the residents, and the existing health care resources followed by II. Needs Assessment Process and Methods; III. Findings; and IV. Unmet Community Health Needs. Tables, maps, and a list of community members who participated in the needs assessment are included in the Appendices.

Quantitative information from the U.S. Census, Pennsylvania Department of Health vital statistics, and the Southeastern Pennsylvania Household Health Survey was analyzed for the hospital's service area using the Statistical Program for Social Sciences (SPSS). Frequency distributions were produced for

variables for multiple years of data so trends over time could be identified and described. The unmet health care needs for this service area were identified and prioritized by comparing the health status, access to care, health behaviors, and utilization of services for residents of the service area to results for the county and state and the Healthy People 2020 goals for the nation. In addition, for Household Health Survey measures, tests of significance were conducted to identify and prioritize unmet needs.

PHMC also collaborated with the participating hospitals to identify individuals living and/or working in the communities in the hospitals' service areas who could provide input to the needs assessment as community members, public health experts, and as leaders or persons with knowledge of underserved racial minorities, low income residents, and/or the chronically ill. (For a list of the names, titles, organizations, and area of expertise of community meeting participants, see Appendix A). The participating hospitals and PHMC worked together to obtain meeting venues, contact potential participants, and encourage attendance. Meeting participants were not compensated. Input from the community meeting participants, including county and local health department officials and public health experts, was used to further identify and prioritize unmet needs, local problems with access to care, and populations with special health care needs.

Qualitative information from the community meetings was analyzed by identifying and coding themes common to participants, and also themes that were unique. The resulting analysis was organized into major topic areas related to health status, access to care, special population needs, unmet needs, and health care priorities.

PUBLIC HEALTH MANAGEMENT CORPORATION QUALIFICATIONS

Public Health Management Corporation (PHMC) is a 501(c)(3) non-profit corporation that was founded in 1972 to address problems in the organization and delivery of health and social services. PHMC is a nonprofit public health institute that creates and sustains healthier communities and envisions a healthy community for all. PHMC uses best practices to improve community health through direct service, partnership, innovation, policy, research, technical assistance, and a prepared workforce.

PHMC's Research and Evaluation Group (REG) was uniquely qualified to provide comprehensive CHNA services to DVHC's not-for-profit member hospitals and facilities. It is the only public health institute in Pennsylvania, has many years' experience collaborating with health care stakeholders, and can facilitate the participation of these diverse groups as required by the ACA. PHMC staff are public health experts who have conducted many CHNAs over the past twenty years for hospitals, health departments, foundations, and other non-profits.

A list of community and population assessments PHMC has completed includes:

- Philadelphia Health Care Trust Needs Assessment, 2011
- School District of Philadelphia Head Start Needs Assessment, 2010
- Jewish Federation of Greater Philadelphia Older Adult Needs Assessment, 2010
- Main Line Area Older Adults Needs Assessment, 2010
- William Penn Foundation Youth Development Initiative Population Studies, 2006, 2008, 2010
- National Nursing Centers Consortium Northeast Philadelphia Needs Assessment, 2009
- Latino Youth Needs Assessment, 2009
- National Children's Study Montgomery County Vanguard Center Needs Assessment, 2008

- Planned Parenthood of Bucks County LGBTQ Needs Assessment, 2007
- Project HOME North Philadelphia Needs Assessment, 2006
- Children's Hospital of Philadelphia Early Head Start Needs Assessment, 2003 and 2006
- Philadelphia Corporation for Aging Older Adults Needs Assessment, 2004
- North Penn (Montco) Community Health Special Populations Needs Assessment, 2003
- North Penn (Montco) Community Health Needs Assessment, 2002
- Brandywine Health Foundation Community Needs Assessment, 2002
- Philadelphia Chinatown Health Needs Assessment, 2001
- Philadelphia Latino Community Health Needs Assessment, 2001
- Burlington County, NJ Homeless Veterans Needs Assessment, 2001
- Phoenixville Community Health Foundation Special Populations Needs Assessment, 2000
- American Red Cross (SEPA Chapter) Needs and Impact Assessments, 1999
- Berwick, Pennsylvania Community Health Needs Assessment, 1999
- East Parkside Needs Assessment, 1999
- Phoenixville Community Health Foundation Needs Assessment, 1999
- City of Philadelphia Office of Housing and Community Development Elderly Housing Needs Assessment, 1997
- Presbyterian Foundation Assisted Living Assessment of West Philadelphia, 1997
- Five County (NJ) Elderly Health Needs Assessment, 1997
- Suburban Camden County Health Needs Assessment, 1997
- Bucks County Community Health Needs Assessment - Quantitative Analysis, 1994; Update, 1997
- Cumberland, Gloucester, and Salem Counties Health Needs Assessments, 1996
- Presbyterian Foundation Assisted Living Assessment of South and North Philadelphia, 1996
- Montgomery County Health Department Maternal and Child Health Needs Assessment - quantitative data analysis, 1996
- Haddington Area Needs Assessment, 1996
- Partnership for Community Health in the Lehigh Valley - implementation phase, 1996
- Delaware Valley Health Care Council Regional Health Profile, 1996
- City of Camden Needs Assessment, 1996
- Paoli Memorial Hospital Needs Assessment, 1994
- Northeast Philadelphia Partnership for a Healthier Community - qualitative data analysis, 1994
- Misericordia Hospital Community Health Needs Assessment - 1993
- Crozer-Keystone Health System, Delaware County Needs Assessment - quantitative data analysis, 1993
- Chester County Title V Maternal and Child Health Needs Assessment - 1993
- Chester County Maternal and Child Health Consortium Needs Assessment 1993
- Bucks County Title V Maternal and Child Health Needs Assessment - 1993

PHMC's CHNA qualifications also include the Southeastern Pennsylvania Community Health Data Base (www.CHDBdata.org), which provides an unmatched set of information on local community health needs that can be used to develop focused findings supported by reliable data. These data can also be used in developing priorities and rationales for strategic plans that are ACA compliant.

The biennial SEPA Household Health Survey collects information on more than 13,000 residents (children, adults, and seniors) living in the five-county SEPA region. The survey is the longest running community health survey in the United States, as well as the largest regional surveys of its kind. REG staff Francine Axler and Lisa R. Kleiner are the co-directors of the community health needs assessment.

Francine Axler, Senior Research Associate. Since 1989, Francine has been actively involved in the field of public health and health promotion, specifically in the collection and dissemination of health status, health behaviors, and utilization of health services data for residents of Southeastern Pennsylvania. Francine is particularly focused on teaching health and human service providers how to utilize community level health data to develop needed, effective and targeted health promotion programs for vulnerable populations. Francine directs PHMC's Community Health Data Base. She has a degree in sociology and a graduate degree in public health education.

Lisa Kleiner, Senior Research Associate. For the past twenty-five years, Lisa has worked on a broad range of evaluation, research, and technical assistance projects. Lisa has conducted and coordinated over 25 population and community needs assessments focusing on older adults, racial/cultural minorities, persons with behavioral health needs, homeless families, maternal and child health and other at-risk groups and communities. In addition to this expertise, Lisa has provided training and technical assistance to over 200 organizations to enable them to build their capacity to define and measure program outcomes and impact, tailoring the technical assistance to the specific needs of the organization and staff. Lisa has a law degree and a graduate degree in social work.

Collaborative Process

In February 2011, Delaware Valley Healthcare Council of HAP (DVHC), the membership association for hospitals in the five-county region of southeastern Pennsylvania, established a Community Health Needs Assessment Workgroup to assist hospitals in:

- Understanding Affordable Care Act (ACA) requirements and Internal Revenue Service guidance around community health needs assessments.
- Identifying the best resources, tools, and services for conducting needs assessments.

The Workgroup consisted of representatives from the following collaborating hospitals, health systems, and organizations:

Collaborating Organizations
Abington Health
Aria Health
Bucks County Health Improvement Partnership
The Children's Hospital of Philadelphia
Crozer-Keystone Health System
Einstein Healthcare Network
Holy Redeemer
Jefferson Health System
Magee Rehabilitation Hospital
Main Line Health
Mercy Health System of SEPA
Penn Medicine (UPHS)
St. Mary Medical Center
Temple University Health System

The 24-member workgroup included representatives from 13 hospitals and health systems representing 35 (70 percent) of 48 DVHC-member not-for-profit hospital facilities in Bucks, Chester, Delaware, Montgomery, and Philadelphia Counties. The group held a series of meetings to review ACA requirements with policy experts from the American Hospital Association and consider the types of resources that might be needed to conduct needs assessments.

Under the workgroup's guidance, DVHC developed a scope of work to define the research services and other resources which hospitals might need to assist them in conducting community health needs assessments. Based on the scope of work, DVHC issued a request for proposal to identify highly qualified research partners who could support hospitals in conducting needs assessments.

After a rigorous evaluation process that included extensive input from workgroup members, Public Health Management Corporation (PHMC) was selected as the most appropriate research partner. PHMC's selection was due in part to their Community Health Data Base's in-depth, zip-code-level health information for the five-county region. In addition, many hospitals are familiar with this resource and are or have been database subscribers.

With direction and guidance from the workgroup, DVHC and PHMC then collaborated to develop the overall approach to conducting needs assessments for hospitals wishing to participate in the program. Twenty-seven DVHC member facilities participated in the program, as listed below.

Abington Memorial Hospital
Lansdale Hospital
The Children's Hospital of Philadelphia
Crozer-Chester Medical Center
Delaware County Memorial Hospital
Springfield Hospital
Taylor Hospital
Doylestown Hospital
Eagleville Hospital
Einstein Medical Center Philadelphia
Einstein Medical Center Elkins Park
Einstein Medical Center Montgomery
MossRehab
Belmont Behavioral Health Center for
Comprehensive Treatment

Grand View Hospital
Holy Redeemer Hospital
Mercy Fitzgerald Hospital
Mercy Philadelphia Hospital
Mercy Suburban Hospital
Nazareth Hospital
St. Mary Medical Center
Temple University Hospital
Jeanes Hospital
Fox Chase Cancer Center
Episcopal Hospital
Hospital of the University of Pennsylvania
Pennsylvania Hospital
Penn Presbyterian Medical Center

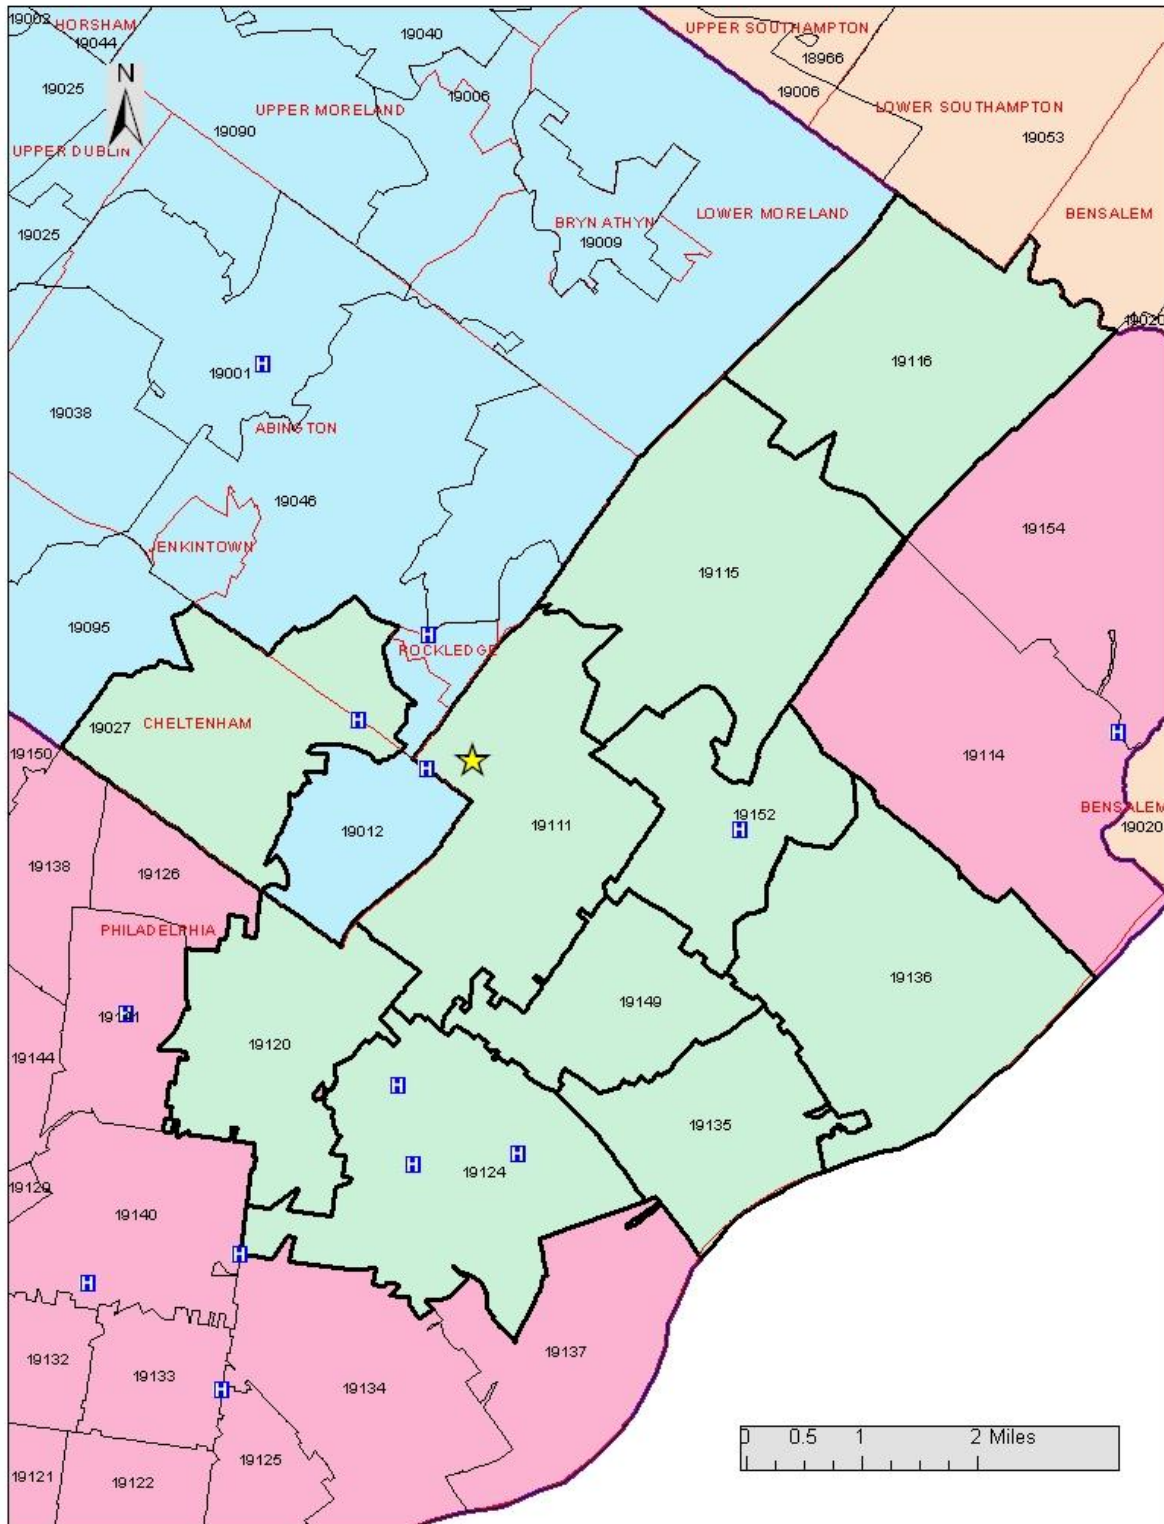

COMMUNITY DEFINITION

Jeanes Hospital is located in Philadelphia County. The hospital's primary service area, from which 75% of its discharged patients reside, (2010 Pop. **445,800**¹) below was defined as the community for the purposes of this assessment. The Jeanes Hospital service area includes the following ZIP codes:

Jeanes Hospital Service Area
19027, 19111, 19115, 19116, 19120, 19124, 19135, 19136, 19149, 19152

¹ Source: Nielsen-Claritas Pop-Facts Database and 2010 U.S. Census.

COMMUNITY DEMOGRAPHICS

This report includes a description of demographic and socioeconomic characteristics of the residents of Jeanes Hospital's service area, as these characteristics are strong indicators of access to health care and good health. Please see Appendix B for all Census data and tables.

Population Size

The total population of Jeanes Hospital's service area **increased to approximately 445,800 residents in 2010 from 425,200 residents in 2000.**

- The service areas' population is estimated to continue to increase in 2013 (to approximately 453,200 residents) and 2018 (to approximately 464,000 residents).

Demographic Characteristics

Age

In Jeanes Hospital's service area, **one-quarter of residents are between the ages of 0-17 (25%), nearly four in ten are 18-44 (38%), nearly one-quarter are 45-64 (24%), and 12% are 65 or older.**

- When comparing to 2000, the service area saw an increase in the percentage of residents ages 45-64 and a decrease in the percentage of those ages 65 or older.
- When comparing to Philadelphia County, Jeanes Hospital's service area has a slightly higher percentage of those ages 0-17 and a slightly lower percentage of those ages 18-44.
- In comparison to the state as a whole, the service area a younger population with higher percentages of residents ages 0-17 and 18-44.

Gender

Approximately **48% of Jeanes Hospital's service area is male and 52% is female**; these percentages are projected to remain static through 2018 and are comparable to the gender breakdown of both Philadelphia County and Pennsylvania as a whole.

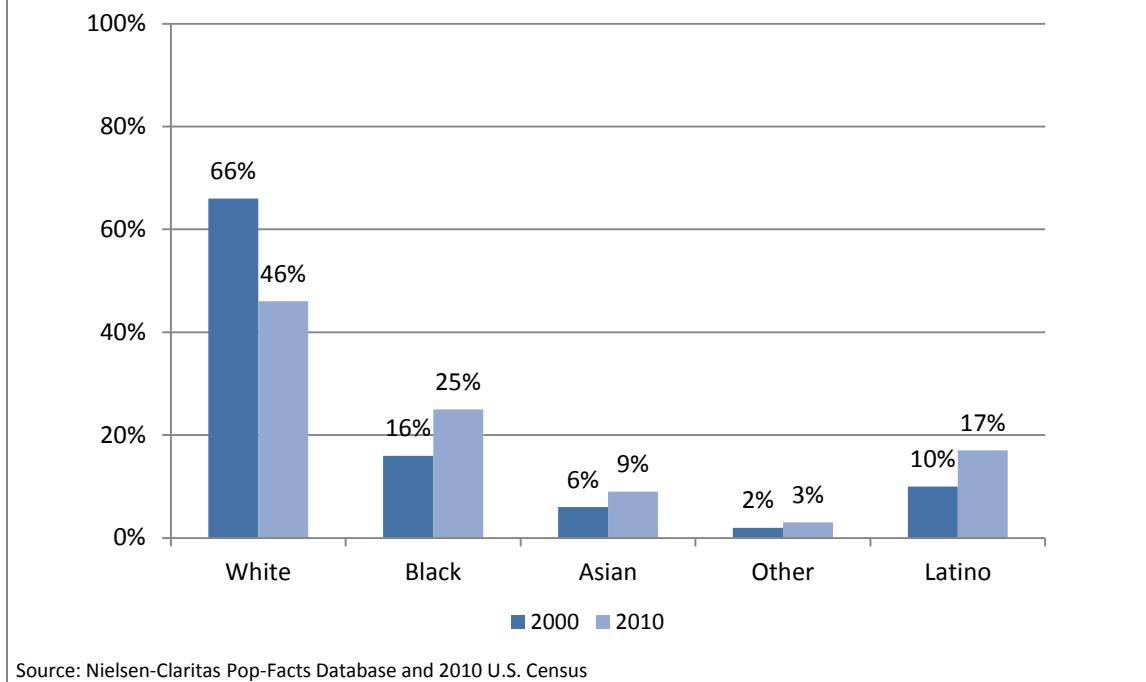

Race/Ethnicity

In Jeanes Hospital's service area, **nearly half of residents identify as White (46%), one-quarter identify as Black (25%), nearly one-fifth identify as Latino (17%), 9% identify as Asian, and 3% identify as an "other" race/ethnicity.**

- The service area saw some changes in the racial/ethnic identity of its population from 2000 with increasing percentages of non-White residents. (Figure 1)
- In comparison to Philadelphia County, the service area has higher percentages of White, Latino, and Asian residents and a lower percentage of Black residents.
- Some of the changes in racial/ethnic identity of Jeanes Hospital's service area mirror the changes taking place on a county-level with an increasing Latino population and a decreasing population of White residents.
- In addition, the service area has substantially higher percentages of Black, Asian and Latino residents when compared to the state as a whole.

Figure 1. Race/Ethnicity, 2000 and 2010

Latino Origin

When looking at the Latino origin, **Jeanes Hospital service area residents most commonly identify as Puerto Rican**, followed by those of an “other” Latino origin, and less than one percent of residents who identify as Mexican and Cuban.

- The service area has a slightly higher percentage of Puerto Rican residents when compared to Philadelphia County and a substantially higher percentage when compared to the state.

Asian Origin

In Jeanes Hospital’s service area, **approximately 9% of residents identify as Asian**.

- **Service area residents most commonly identify as Indian, Chinese, and Korean.**
- When comparing to the county, Jeanes Hospital’s service area has higher percentages of Indian and Korean residents.
- Looking at the state, the service area has higher percentages of Indian, Chinese, Korean and Vietnamese residents.

Language Spoken at Home

Nearly three-quarters of residents in Jeanes Hospital’s service area speak English at home (73%), 11% speak an “other” language, one-tenth speak Spanish (10%), and 5% speak an Asian language.

- Fewer residents speak English at home in the service area, nearly twice as many speak an “other” language, and slightly more speak Spanish compared to Philadelphia County and the state.

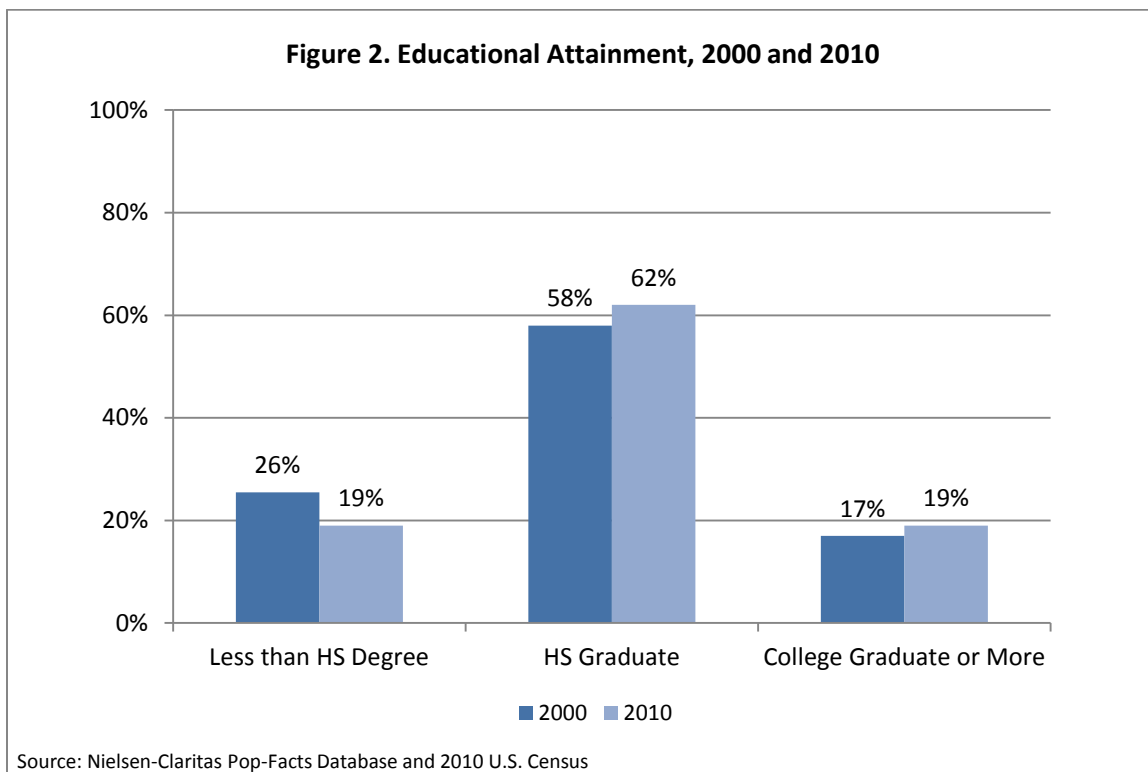

Socioeconomic Indicators

Education

In Jeanes Hospital's service area, **nearly one-fifth of residents have less than a high school degree (19%), more than six in ten have graduated from high school (62%), and nearly one-fifth have a college degree or more (19%).**

- The service area saw some improvement in educational attainment from 2000. (Figure 2)
- Residents of the service area are slightly less likely to have less than a high school degree and more likely to be a high school graduate compared to Philadelphia County residents.
- When compared to the state, although Pennsylvania has a comparable percentage of residents who are high school graduates, the service area has a higher percentage of those with less than a high school degree and a lower percentage of those with a college degree or more than the state.

Employment

Approximately 93% of residents of Jeanes Hospital's service area are employed and 7% are unemployed.

- **The percentage of those who are unemployed is estimated to increase to 15% in 2013.**
- In comparison to Philadelphia County and the state, the service area has a lower percentage of unemployed residents.

Poverty Status

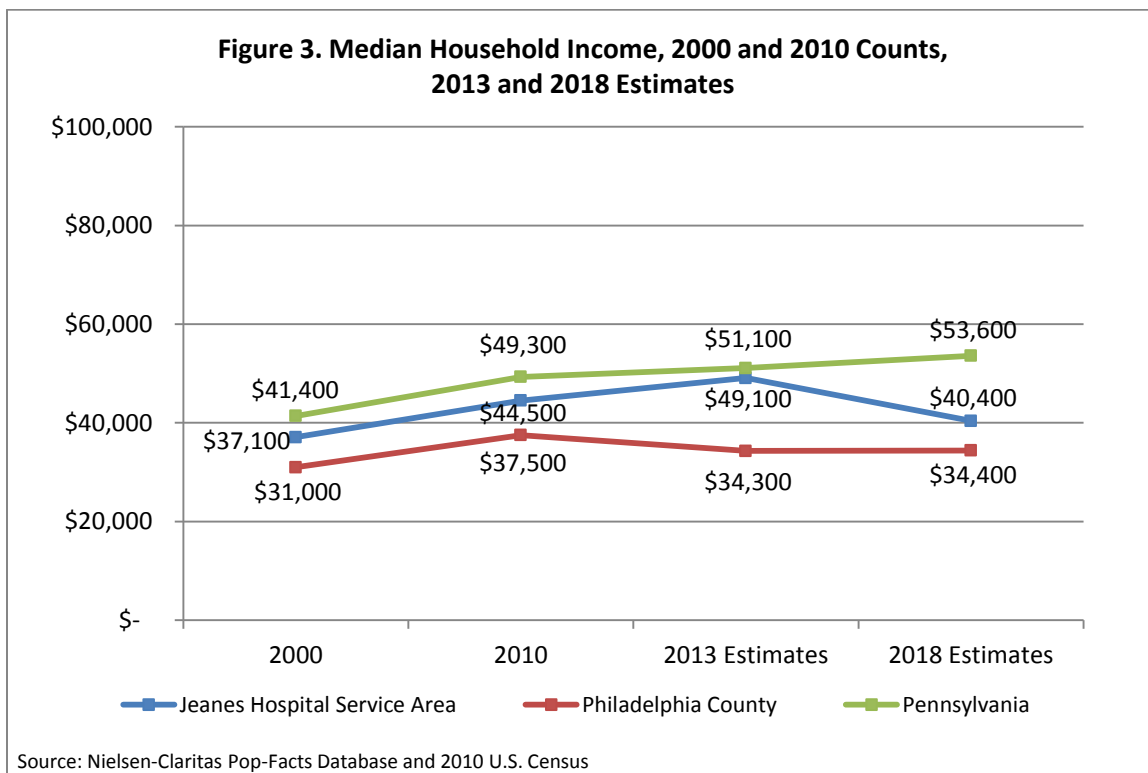

When looking at poverty status, **12% of families without children and 17% of families with children are living in poverty in Jeanes Hospital's service area.**

- The percentage of families without children doubled from 2000 and both percentages are estimated to increase in 2013.
- Families, both with and without children, living in Jeanes Hospital's service area are less likely to live in poverty compared to Philadelphia County, but slightly more likely to live in poverty compared to Pennsylvania families overall.

Median Household Income

The 2000 median household income in Jeanes Hospital's service area was approximately \$37,100, which increased to \$44,500 in 2010.

- Although 2010 saw an increase in the median household income, this number is estimated to drop in 2013.
- The median household income in the service area is higher than that of Philadelphia County, but lower than the median household income in the state. (Figure 3)

Home Ownership

In Jeanes Hospital's service area, **38% of residents rent their home and 62% own their home.**

- The percentage of residents who rent their home in the service area is lower than the County, but higher than the state.

EXISTING HEALTH CARE RESOURCES

The existing health and social services in the service area, and for Southeastern Pennsylvania as a whole, were inventoried for this report. Information on health and social services was obtained by internet searches and from the Yellow Pages. Health services included: acute care general hospitals; inpatient psychiatric hospitals and long-term psychiatric facilities; and rehabilitation hospitals. Skilled and intermediate care nursing facilities were not included. Health services also included community health centers and clinics, urgent care centers, and state, city, and county health department service locations. Existing social services which were inventoried included: food pantries, WIC centers, farmer's markets, and soup kitchens; community outpatient mental health and mental retardation services; senior services; social work services; homeless and domestic violence shelters; and YMCA's. These existing health care and social service resources are shown on the Jeanes Hospital service area maps in Appendix E. Maps of health care and social service resources are also included for Philadelphia County in Appendix E.

II. NEEDS ASSESSMENT PROCESS AND METHODS

The steps in the needs assessment process were: defining the community; identifying existing primary and secondary data and data needs; collecting primary and secondary data; analyzing data; and preparing a written narrative report. The data acquisition and analysis are described in more detail below.

DATA ACQUISITION AND ANALYSIS

Both primary and secondary and quantitative and qualitative data were obtained and analyzed for this needs assessment. Obtaining information from multiple sources, known as triangulation, helps provide context for information and allows researchers to identify results which are consistent across more than one data source.

Data Sources and Dates

Quantitative information for this needs assessment was obtained from sources listed below for the most recent years available.

Community Health Needs Assessment Data Sources

Data Source	Dates
U.S. Census of Population and Housing	2000, 2010
Claritas, Inc. Pop-Facts	2013, 2018
Pennsylvania Department of Health	2005-2008
PHMC Southeastern Pennsylvania Household Health Survey	2010, 2012

PHMC Southeastern Pennsylvania Household Health Survey

The 2012 Southeastern Pennsylvania Household Health Survey questionnaire examines health status, utilization of and access to health care among adults and children in the five county area including Bucks, Chester, Delaware, Montgomery and Philadelphia counties. The survey includes many questions which have been administered and tested in national and local health surveys, including items from instruments developed by the following organizations: the National Center for Health Statistics (NCHS) for the National Health Interview Survey (NHIS), The Behavioral Risk Factor Surveillance System (BRFSS), The California Women's Health Survey, The Social Capital Community Benchmark Survey (Kennedy School of Government, Harvard University) and The Survey on Childhood Obesity (Kaiser Family Foundation/San Jose Mercury News).

The 2012 Household Health Survey was conducted through telephone interviews with people 18 years of age and older living in 10,018 households in Southeastern Pennsylvania. All telephone households within Bucks, Chester, Delaware, Montgomery and Philadelphia counties were eligible to be selected for the sample, as were cell phone users. Households in each of the five counties were selected to guarantee representation from all geographic areas and from all population subgroups. When needed, the interviews were conducted in Spanish. A total of 1,237 interviews were conducted with adults residing in the service area, including 251 adults age 65 and over and 251 households with a selected

child under the age of 18.

The 2012 Southeastern Pennsylvania Household Health Survey was administered for PHMC by Social Science Research Solutions, Inc. (SSRS), a research firm in Media, Pennsylvania, between May and September 2012. All interviews were administered by telephone. Most households (8,009 total) were contacted on home phones (“landlines”) using a computerized Random Digit Dialing (RDD) methodology so that households with unpublished numbers and residents who had recently moved would be included in the sample. A total of 2,009 cell phone interviews were conducted with adults in the five county area. Cell phone respondents received the same survey questionnaire as landline respondents.

The sample for this study was drawn from all telephone households in the five counties. The final sample of interviews is representative of the population in each of the five counties so that the results can be generalized to the populations of these counties. Within each selected household, the Last Birthday Method was used to select the adult respondent for the interview (with the exception of the cell phone sample). In households with more than one eligible adult, the adult who last had a birthday was selected as the adult respondent. In households with children, the person under age 18 who most recently had a birthday was selected for the child interview. The survey incorporates over-samples of people ages 60-74 and 75 and older to provide a sufficient number of interviews for separate analyses of the responses of people in these subgroups.

U.S. Census

This report includes data on the population of Jeanes Hospital’s service area residents, Philadelphia County residents, and Pennsylvania residents along with socio-demographic and socioeconomic characteristics for the years 2000, 2010, 2013 and 2018. Data from the 2000 U.S. Census, the 2010 American Community Survey, and the Nielsen-Claritas Pop-Facts Database were also used. The Nielsen-Claritas Pop-Facts Database uses an internal methodology to calculate and project socio-demographic and socioeconomic characteristics for non-census years, relying on the U.S. Census, the Current Population Survey, and the American Community Survey.

Vital Statistics

The most recent information on births, birth outcomes, deaths, and reportable diseases and conditions for residents of Jeanes Hospital’s service area and Philadelphia County was obtained from the Pennsylvania Department of Health, Bureau of Health Statistics and Research. Four year (2005-2008) annualized average rates for natality and mortality were calculated by PHMC. Mortality rates were age-adjusted using the Direct Method and the 2000 U.S. standard million population. The most recent (2010) morbidity information was also obtained from the state Department of Health, and rates were calculated by PHMC. Morbidity information, including information on HIV and AIDS cases, is not available at the ZIP code level and, therefore, rates are presented for the county only. The denominators for all 2005-2008 vital statistics rates for the county and state were interpolated from the 2000 and 2010 U.S. Census. The number of women ages 15-44 and the number of adolescents ages 10-17 were also interpolated from the 2000 and 2010 US Census.

COMMUNITY REPRESENTATIVES

Information on the health status and health care needs of the Jeanes Hospital service area was also collected through community meetings with residents, public health representatives, service providers, and advocates knowledgeable about community health. The meetings were guided by a set of written questions. Three meetings were held: two at Temple University Hospital on July 17 and 18, 2012, one at its Episcopal Campus on June 16, 2012, and one at Jeanes Hospital on July 23, 2012. Community leaders, providers, public health representatives, and residents participated.

In addition to the meetings held at Jeanes Hospital and Temple University Hospital facilities, information on the health status and health needs were obtained by PHMC at four additional meetings held in Philadelphia County. These meetings were held in:

- Center City (PHMC) on July 24, 2012;
- West/Southwest Philadelphia (Boys Latin Charter School) on July 10, 2012;
- Northeast Philadelphia (Holy Family University) on May 30, 2012; and
- Northwest Philadelphia (the York House) on June 26, 2012.

(For complete lists of participant names and agencies from all community meetings, please see Appendix A).

INFORMATION GAPS

Quantitative information for socioeconomic and demographic information, vital statistics, and health was available at the ZIP code cluster level for the service area. To fill potential gaps in information, these data were supplemented by detailed information about the service area obtained from community meetings.

The next section, III. Findings, summarizes the results of the needs assessment process.

III. FINDINGS

HEALTH NEEDS OF THE COMMUNITY

Health Status

The health of a community can be assessed by comparing birth outcomes, self-reported health status and health conditions, communicable disease rates, self-reported health concerns and perceptions, and mortality rates to statewide indicators and Healthy People 2020 goals for the nation.

Birth Rate

There is an average of more than 6,500 births annually to women in Jeanes Hospital's service area (See Appendix C for the Vital Statistics Tables).

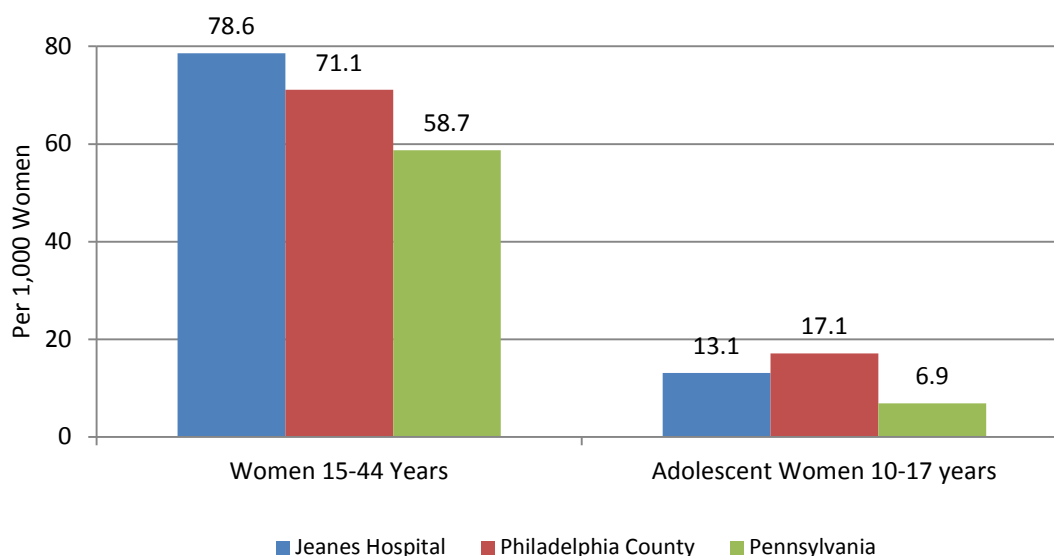

- **The birth rate in the service area (78.6 per 1,000 women 15-44 years of age) is higher than the Philadelphia County rate (71.1) and the Pennsylvania rate (58.7)** (Figure 4).
- Within the service area, Latina women have the highest birth rate (118.3), while White women have the lowest birth rate (53.0). In general, the racial and ethnic birth rates in the service area are higher than the county and the state.

Teenage pregnancy has been associated with a number of negative birth outcomes, including prematurity and low birth weight, making it an important outcome to track.

- **In the service area, the adolescent birth rate is 13.1 per 1,000 women 10-17 years of age, which is lower than the county rate (17.1) but nearly twice the state rate (6.9)** (Figure 4).
- Within the service area, the adolescent birth rate is highest for Latina women (26.9) and lowest for White women (4.9). However, the adolescent birth rate for Latinas in the service area is below the countywide rate for Latinas (31.5) but is comparable with the statewide rate for Latinas (25.5).

Figure 4. Average Annualized Birth Rates for Women 15-44 Years and Adolescent Women 10-17 Years, 2005-2008

Source: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

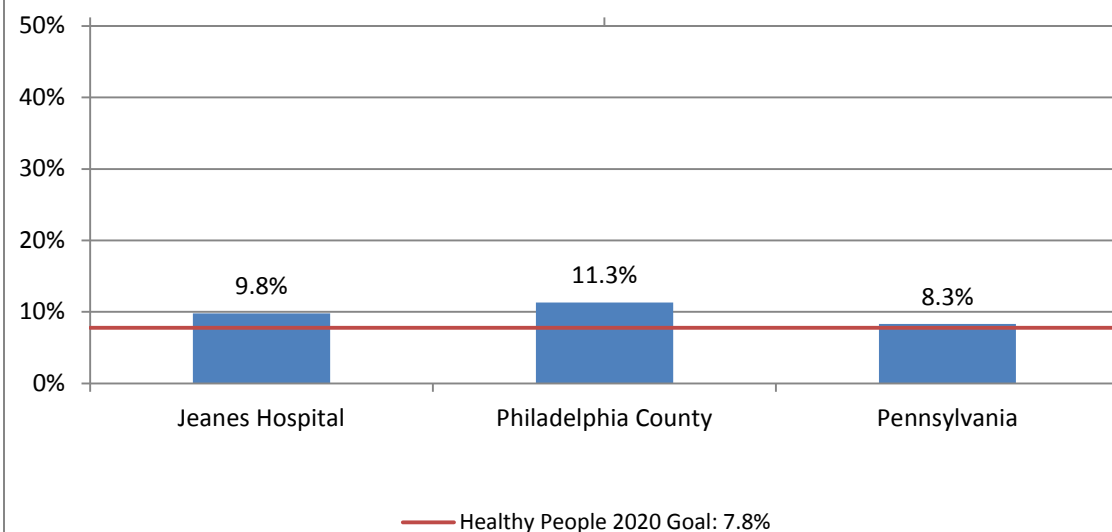

Low Birth Weight

Low birth weight infants (<2,500 grams or 5lbs 8 ozs.) are at greater risk for dying within the first year of life than infants of normal birth weight.

- **In the Jeanes Hospital service area, 9.8% of infants are low birth weight.** This percentage is generally comparable with the Philadelphia County average (11.3%) and the state average (8.3%), but **has not met the Healthy People 2020 target goal (7.8%)** (Figure 5). The percentage of infants born at low birth weight in the service area represents an annual average of 640 infants weighing less than 2,500 grams at birth.
- **In the service area, the percentage of low birth weight infants is highest among Black infants (13.4%)** and lowest for White infants (7.3%). In general, the racial and ethnic percentages of infants in the service area who are born at low birth weight are comparable to the county and state.

Figure 5. Average Annualized Percentage of Infants Born at Low Birth Weight, 2005-2008

Source: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

Infant Mortality Rate

In Jeanes Hospital's service area, every year an average of 54 infants die before their first birthday, representing an infant mortality rate of 8.2 infant deaths per 1,000 live births.

- The service area's infant mortality rate is slightly below the Philadelphia County rate (12.2) but comparable with the Pennsylvania rate (7.5), and **has not met the Healthy People 2020 target goal of 6.0 infant deaths per 1,000 live births.**

Self-reported Health Status

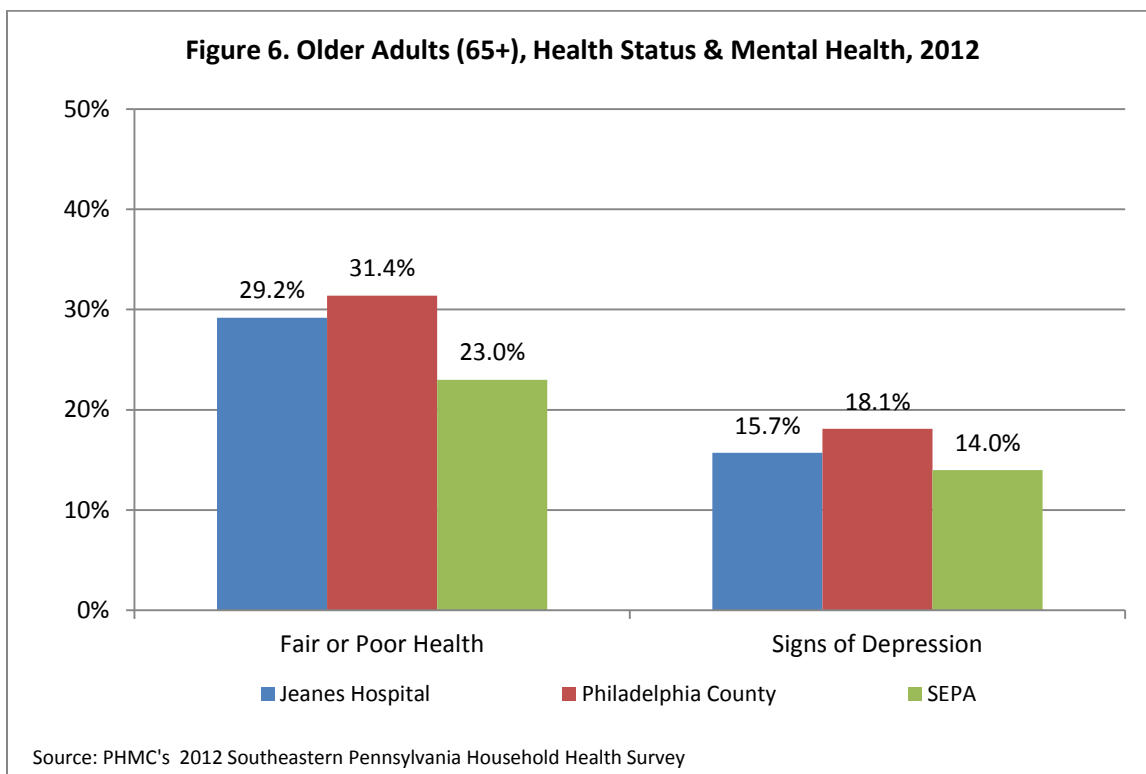

Fair or Poor Health

Self-reported health status is one of the best indicators of the population health. This measure has consistently shown to correlate very strongly with mortality rates.² In the Jeanes Hospital service area, **the majority (78.4%) of adults rates their health as excellent, very good or good** (See Appendix D for Household Health Survey Tables). **However, a sizable percentage (21.6%) of adults is in fair or poor health, representing 73,200 adults.**

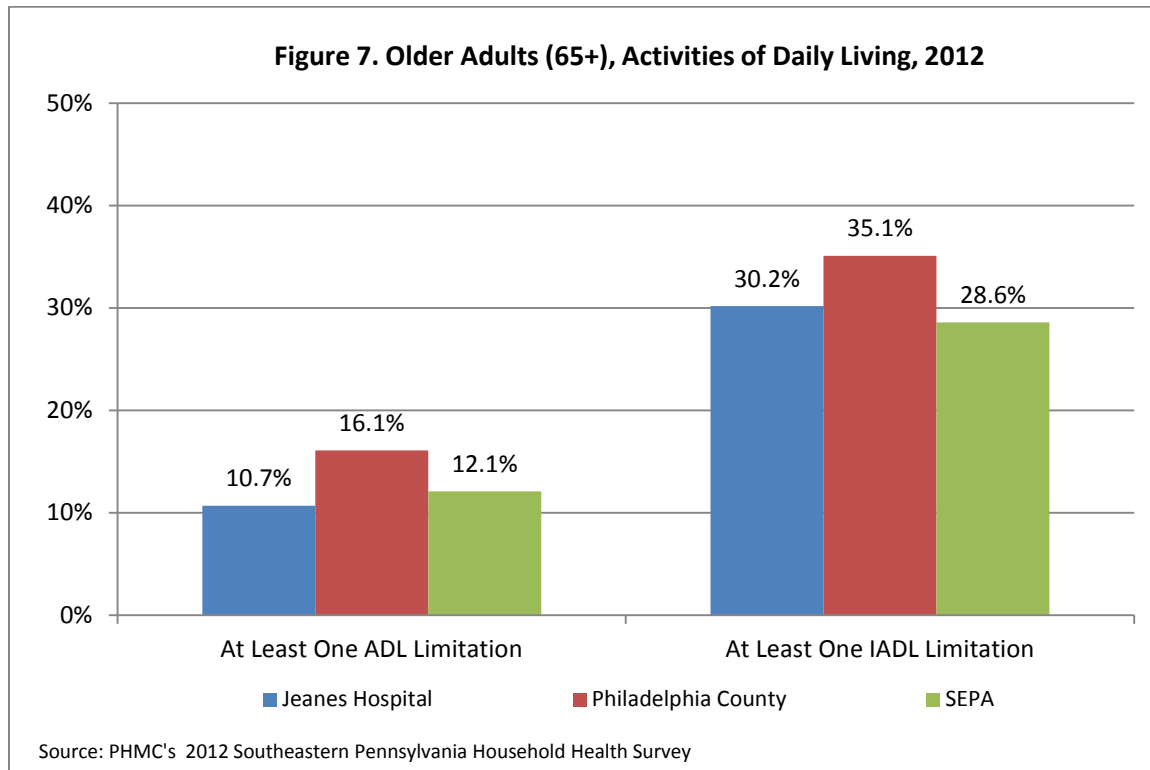

- This percentage is higher than the statewide average³ (16.8%) and the SEPA region as a whole (16.1%).
- Among older adults in the service area, 29.2% are in fair or poor health; this percentage represents 16,900 adults 65 years of age and older. The percentage of older adults in fair or poor health has remained steady since 2010. (Figure 6)

² Idler EL, Benyamini Y. Self-Rated Health and Mortality: A Review of Twenty-Seven Community Studies. *Journal of Health and Social Behavior*. 1997; 21-37.

³ 2011 Behavioral Risks of Pennsylvania Adults, PA Department of Health.

- Three in ten (30.2%) of older adults have at least one or more instrumental activities of daily living limitations and one in ten (10.7%) has at least one or more activities of daily living limitations. (Figure 7)

- In addition, 6.2% of children in the service area are in fair or poor health.

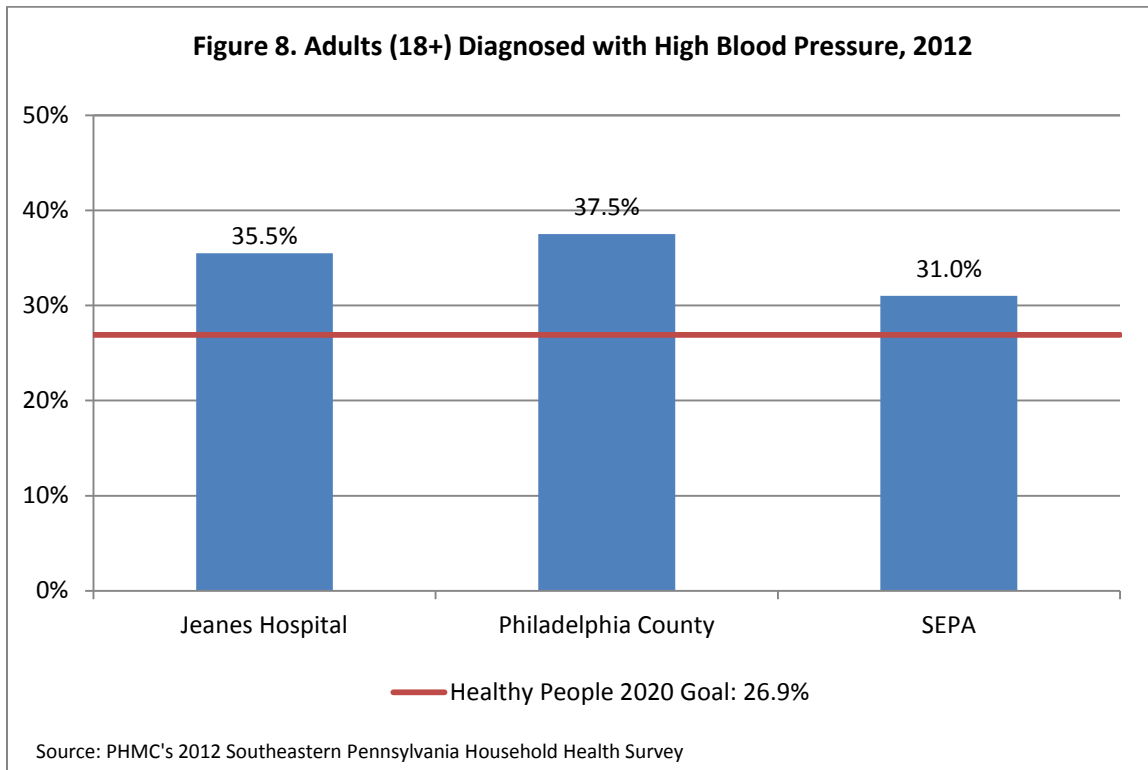

Information gathered through community members showed **a need for services to help elderly stay in their homes and a need for support for caregivers**. They also discussed a lack of awareness in the community regarding these types of services.

Health Conditions

High blood pressure, diabetes, asthma, cancer, and mental health conditions are common illnesses that require ongoing care. In the Jeanes Hospital service area:

- **One-third (35.5%) of adults have been diagnosed with high blood pressure; this represents 120,300 adults.** This percentage has slightly increased from 29.2% in 2010 and is higher than the Healthy People 2020 goal of 26.9% of adults with high blood pressure.
- In Pennsylvania, three in ten (31.0%) adults have high blood pressure.⁴ The percentage of adults in the service area with high blood pressure is higher than for the region as whole (31%) but is slightly lower than for Philadelphia County (37.5%). (Figure 8)

⁴ 2009 Behavioral Risks of Pennsylvania Adults, PA Department of Health.

- **Nearly one in six (15.7%) adults in the service area has been diagnosed with diabetes;** this percentage represents approximately 53,200 adults and is considerably higher than the statewide percentage of 9.5% of adults diagnosed with diabetes.⁵ **The percentage of adults in the service area with diabetes is also higher than for the region as a whole (12.4%).**
- **More than one in six (17.1%) of adults in the service area have asthma.** This percentage is similar to SEPA (16.0%), but higher than Pennsylvania (12.9%)⁶. The percentage of adults with asthma in the service area is slightly lower than adults in Philadelphia County (19.4%).
- Eight percent (8.4%) of adults in the service area have had cancer at some point in their lives, representing 28,500 adults. The percentage of adults who ever had cancer is similar to SEPA (8.7%).
- **One-third (31.8%) of adults in the service area is obese and one-third (33.9%) of adults are overweight.** A similar percentage of adults are obese or overweight statewide (28.6% and 36.0%, respectively).⁷ The Healthy People 2020 goal for adult obesity is 30.6%. The percentage of adults in the service area who are overweight has decreased since 2010 from 36.7% to 33.9% in 2012. (Figure 9)

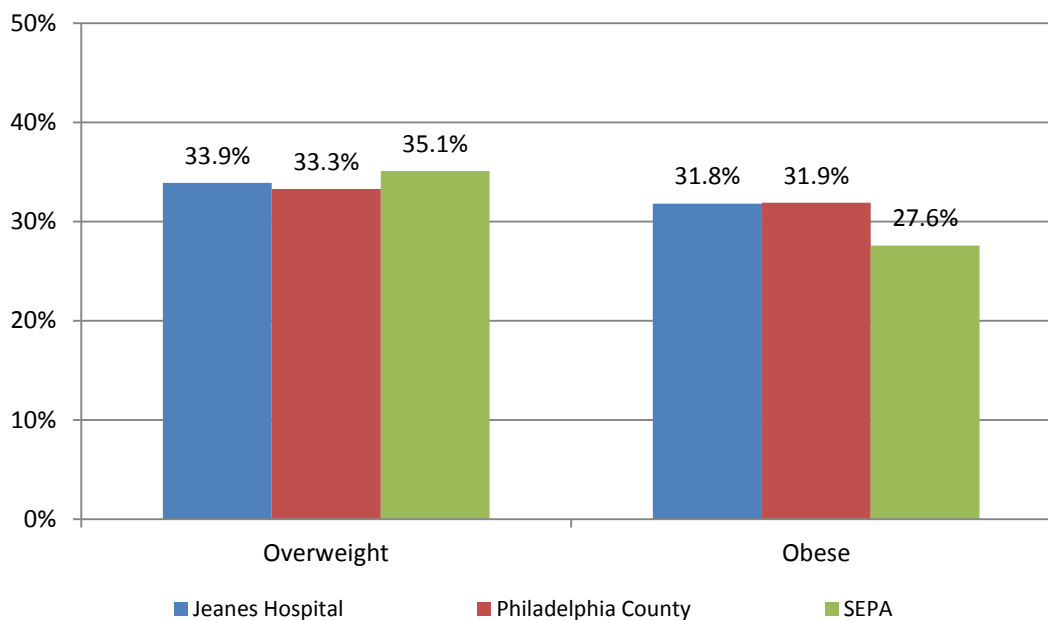

⁵ 2011 Behavioral Risks of Pennsylvania Adults, PA Department of Health.

⁶ 2011 Behavioral Risks of Pennsylvania Adults, PA Department of Health.

⁷ 2011 Behavioral Risks of Pennsylvania Adults, PA Department of Health.

Figure 9. Adults (18+), Body Mass Index, 2012

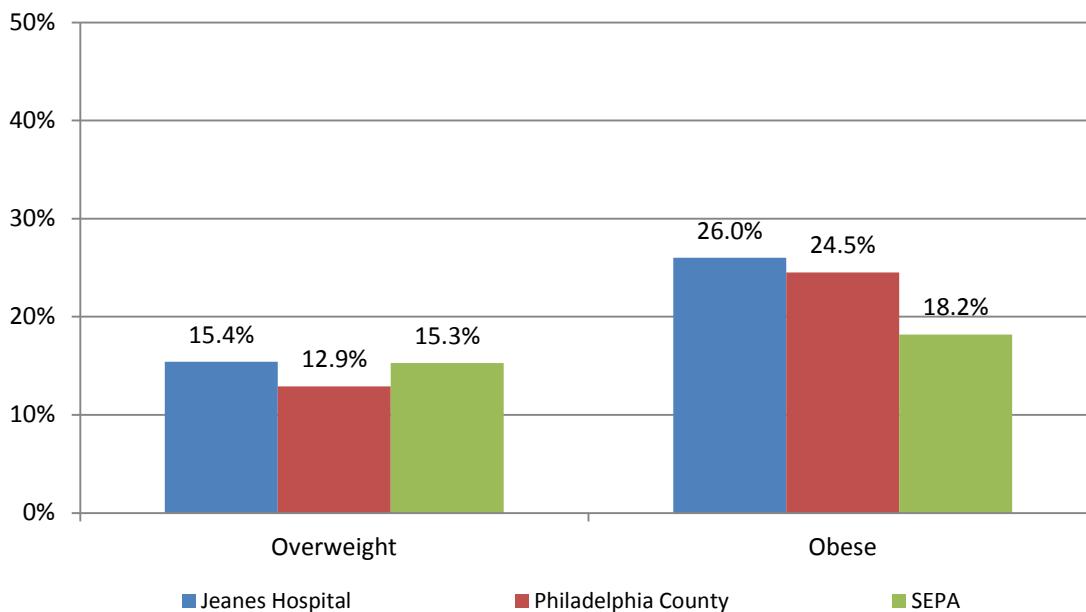

Source: PHMC's 2012 Southeastern Pennsylvania Household Health Survey

- **More than one-quarter (26.0%) of children in the service area are obese and 15.4% are overweight.** The percentage of obese children in the service area is higher than SEPA as a whole (18.2%). The percentage of obese children in the service area has increased from 21.3% in 2010 to 26.0% in 2012. (Figure 10)

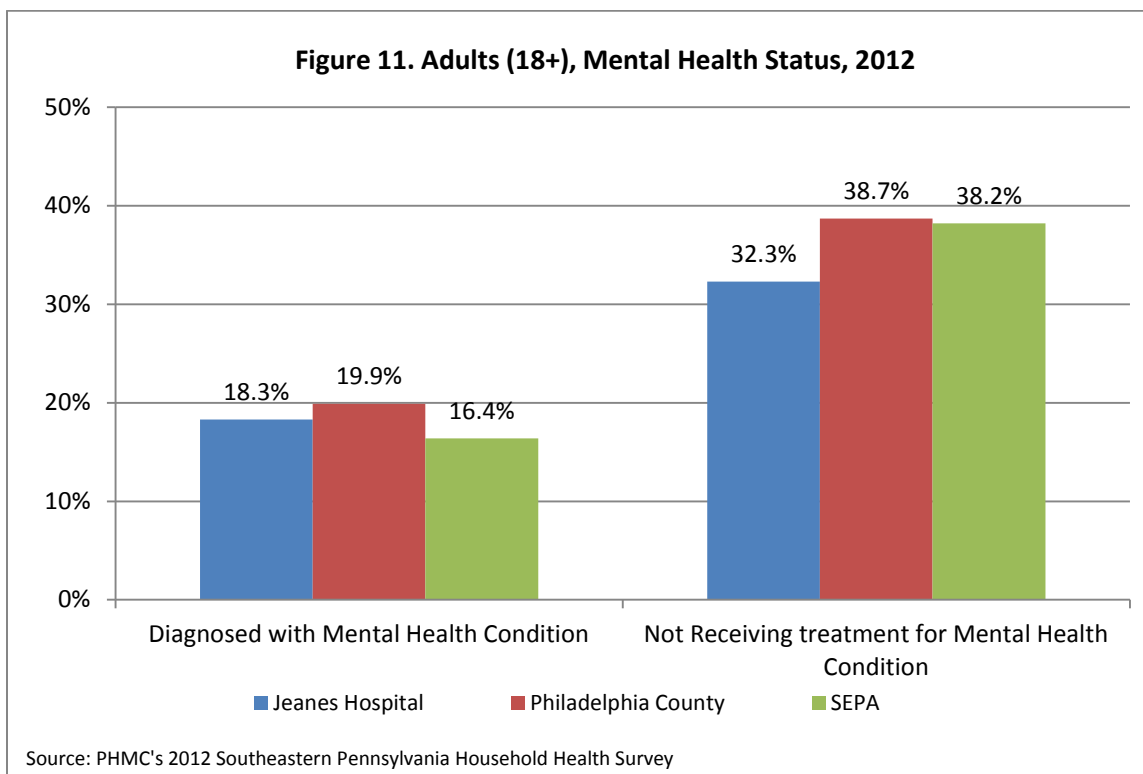

Figure 10. Children (6-17), Body Mass Index, 2012

Source: PHMC's 2012 Southeastern Pennsylvania Household Health Survey

- **Nearly one in five (18.3%) adults in the service area has been diagnosed with a mental health condition;** this percentage represents 62,000 adults. Of those with a mental health condition, one-third (32.3%) are not receiving treatment for the condition. (Figure 11)
 - One in six (15.7%) older adults in the service area has signs of depression which are defined as having four or more depression symptom on a ten item scale. This percentage is slightly higher than for the region as a whole (14%).

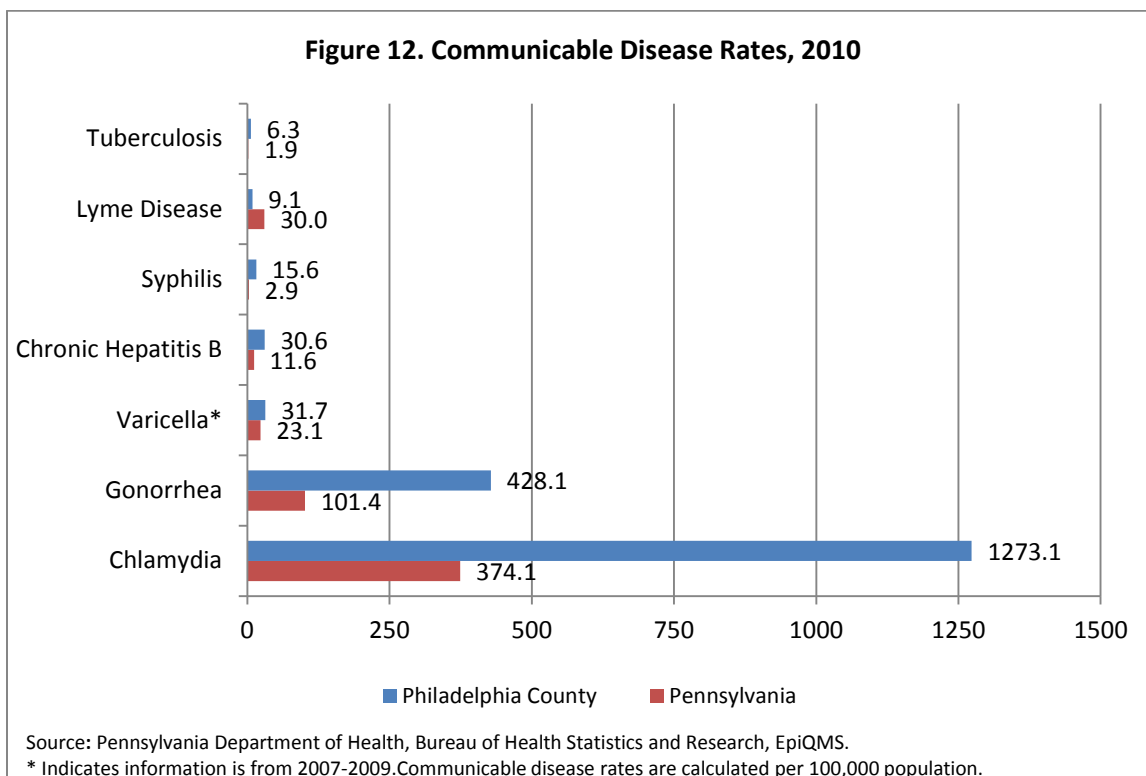

- Approximately 27,800 adults (8.3%) in the service area are in recovery for a substance abuse problem.

Community members indicated that chronic diseases associated with obesity, such as diabetes and hypertension, are problematic in adolescent and adult populations in the community. Community members also identified the following services as those with which adults have difficulties accessing:

- Basic, primary care services;
- Prescription medications services and prescription drug plans; and
- Drug and alcohol programs.

Communicable Diseases

The communicable disease rates for **chronic Hepatitis B, Tuberculosis, Varicella (chicken pox), Chlamydia, Gonorrhea, and Syphilis (primary and secondary)** in Philadelphia County are **higher** than state rates while the county rate for **Lyme Disease** is **lower** compared to the state rate (Figure 12). The county rate for Pertussis (whooping cough) is comparable to the state rate.

Morbidity

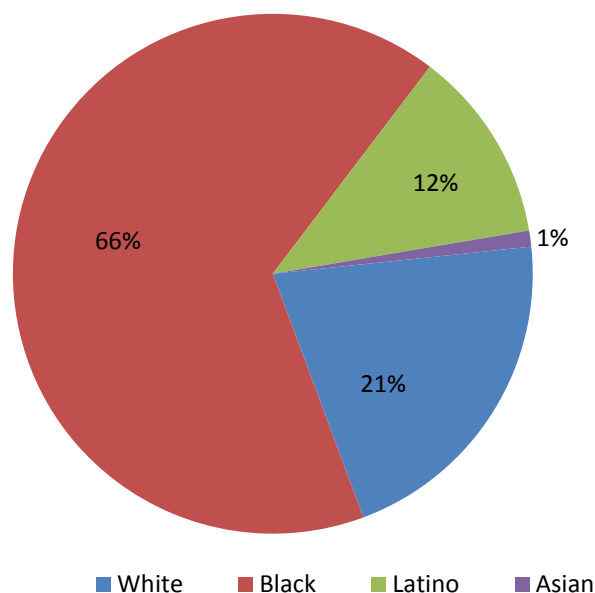

HIV and AIDS

In Philadelphia County, there are 16,234 individuals who are living with HIV, including AIDS, representing a prevalence rate of 1,121.6 cases per 100,000 population. This prevalence rate is five times higher than the state's rate (244.9).

- Among Philadelphia residents who are living with HIV or AIDS, more than two-thirds (69%) are men.
- Two-thirds (66%) are Black, one-fifth (21%) are White, more than one-tenth (12%) are Latino, and 1% are Asian (Figure 13).

Figure 13. Racial and Ethnic Distribution of Individuals Living with HIV or AIDS, Philadelphia County, 2008

Source: Pennsylvania Department of Health, HIV/AIDS Investigation-Bureau of Epidemiology and American Community Survey.

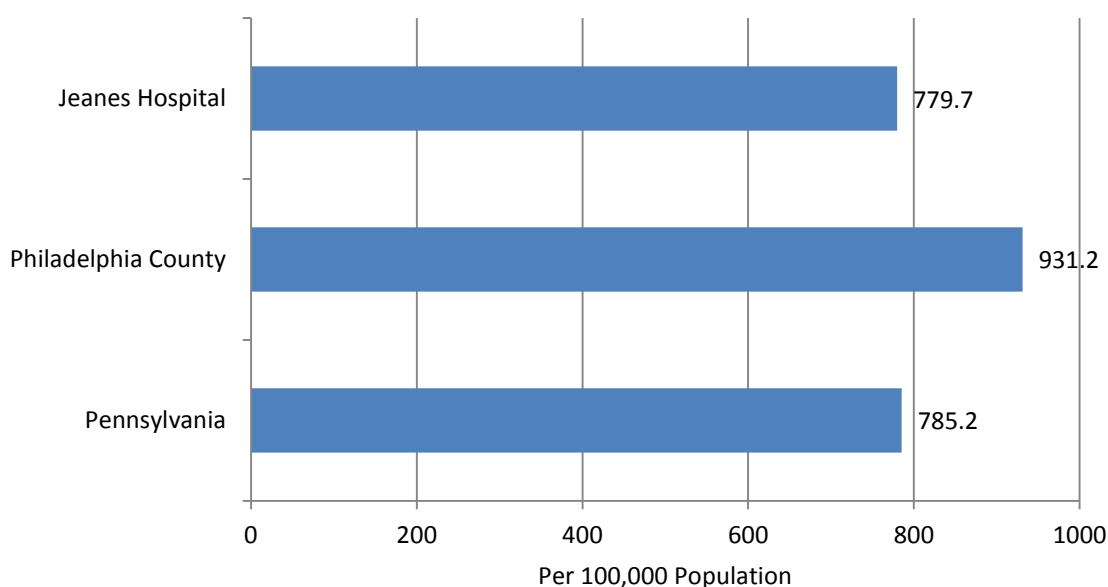

Overall Mortality

The overall death rate in Jeanes Hospital's service area (779.7 deaths per 100,000 population) is below the Philadelphia County rate (931.2 deaths per 100,000 population) and the Pennsylvania rate (785.2 deaths per 100,000 population) (Figure 14).

- **Heart disease is the leading cause of death in the service area (196.4), the county (232.2), and the state (203.2).**
- The other four leading causes of death in the service area are: all forms of cancer (187.3), lung cancer (52.0), stroke (37.3), and female breast cancer (24.0).
- Many of the death rates (all cancers combined, lung cancer, female breast cancer, prostate cancer, colorectal cancer, homicide, and HIV/AIDS) are lower in the service area than in the county, but are generally comparable with the state.

Figure 14. Average Annualized Overall Mortality Rate, 2005-2008

Source: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

Access and Barriers to Care

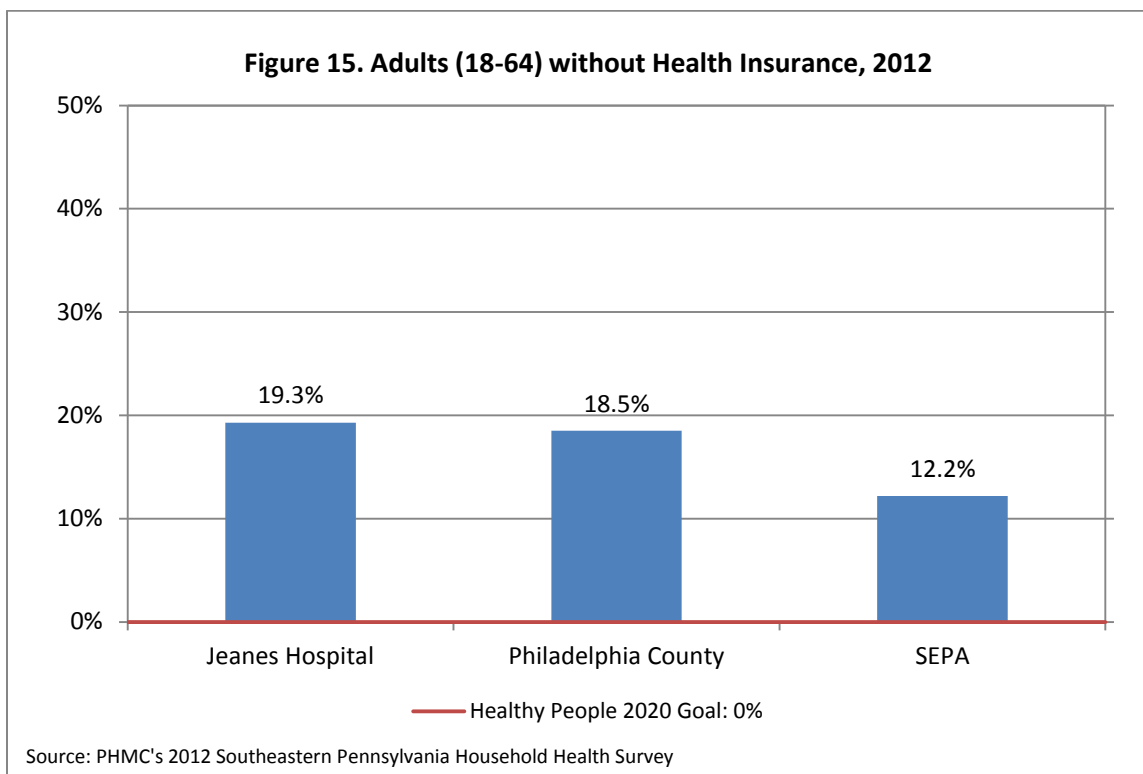

The Healthy People 2020 Goals for access to health care include:

- Increase the proportion of the population with health insurance to **100%**;
- Reduce the proportion of individuals who are unable to obtain or delay in obtaining necessary medical care, dental care or prescription medicines to **9% overall** (4.2% for medical care, 5% for dental care and 2.8% for prescription medications); and
- Increase the proportion of persons with a usual primary care provider to **83.9%**.

Health Insurance Status

Having health insurance and a regular place to go when sick are important in ensuring continuity of care over time. The majority of adults (80.7%) in the service area have health insurance coverage. However, a sizable percentage of adults do not have any private or public health insurance; **19.3% of adults aged 18-64 in the service area are uninsured, representing 53,000 uninsured adults (Figure 15).**

- The percentage of uninsured adults in the service area has increased **since 2010 from 13.9% to 19.3% in 2012.**
- The percentage of adults in the service area without insurance is comparable to that of Philadelphia County (18.5%), higher than the region (12.2%), and does not meet the Healthy People 2020 goal of 100% of adults with health coverage.

Community members indicated that a lack of insurance may contribute to access problems. Community members mentioned that **insurance is more expensive for individuals** and many can't afford to purchase it or they have insurance with such high deductibles.

Community members also expressed the concern that **the complexity of the health care system is another barrier to care**. Community members indicated that **older adults have more difficulty navigating the system than younger adults**. Community members also noted that families, particularly transient families, need to be led through the process of applying for CHIP. They also discussed the community's general lack of knowledge on how to access health care services.

Prescription Drug Coverage

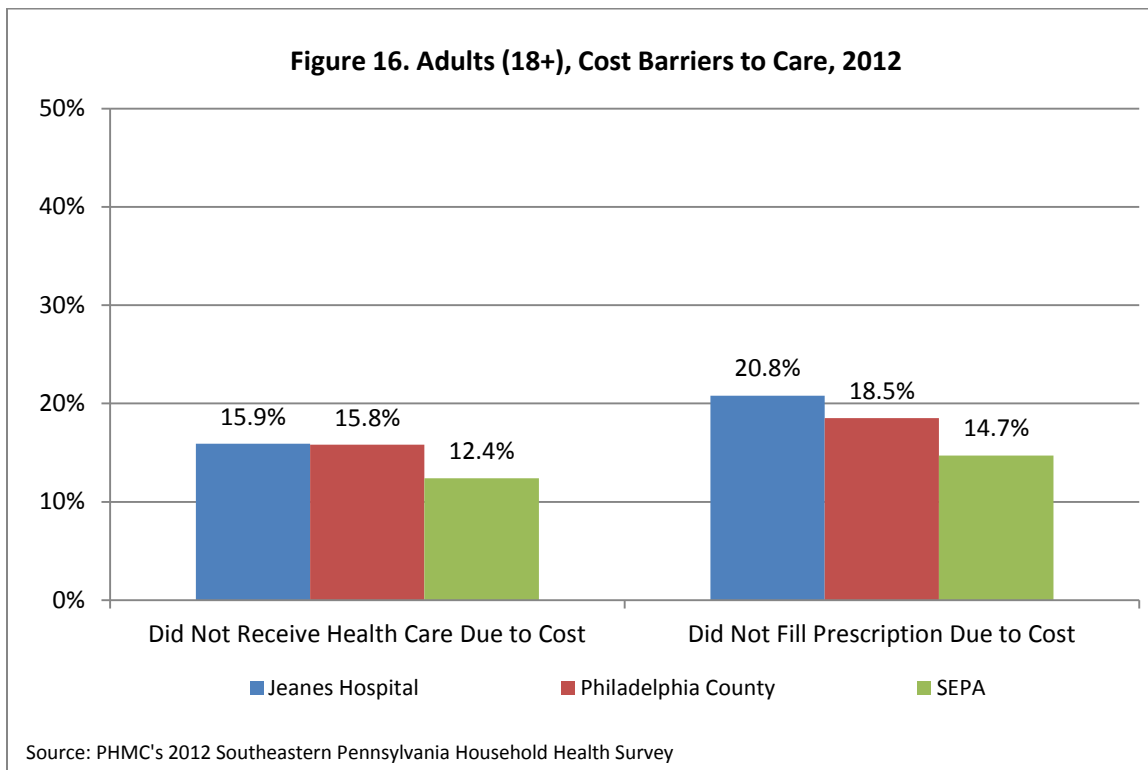

- **One in four (25.3%) adults in the service area does not have prescription drug coverage.** This percentage represents 85,500 adults without this coverage and is higher than compared to the percentage in 2010; in 2010 11.3% of adults did not have prescription drug coverage.
- The percentage of adults without prescription drug coverage in the service area is higher than in SEPA as a whole (18.6%).

Economic Barriers

- With or without health insurance, **54,000 adults in the service area are unable to get needed care due to the cost of that care; 15.9% of adults reported that there was a time in the past year when they needed health care, but did not receive it due to the cost.** (Figure 16)
- About 70,600 adults in service area (20.8%) were prescribed a medication but did not fill the prescription due to cost in the past year. (Figure 16)

- **One in four (27.1%) adults in the service area in 2010 did not get dental care due to the cost of the visit.** This percentage is similar to adults in Philadelphia County (26.8%), but higher compared to SEPA (24.1%).

Other Barriers to Care

Cultural and language barriers were identified by the community groups as prominent barriers to care in the Jeanes Hospital service area.

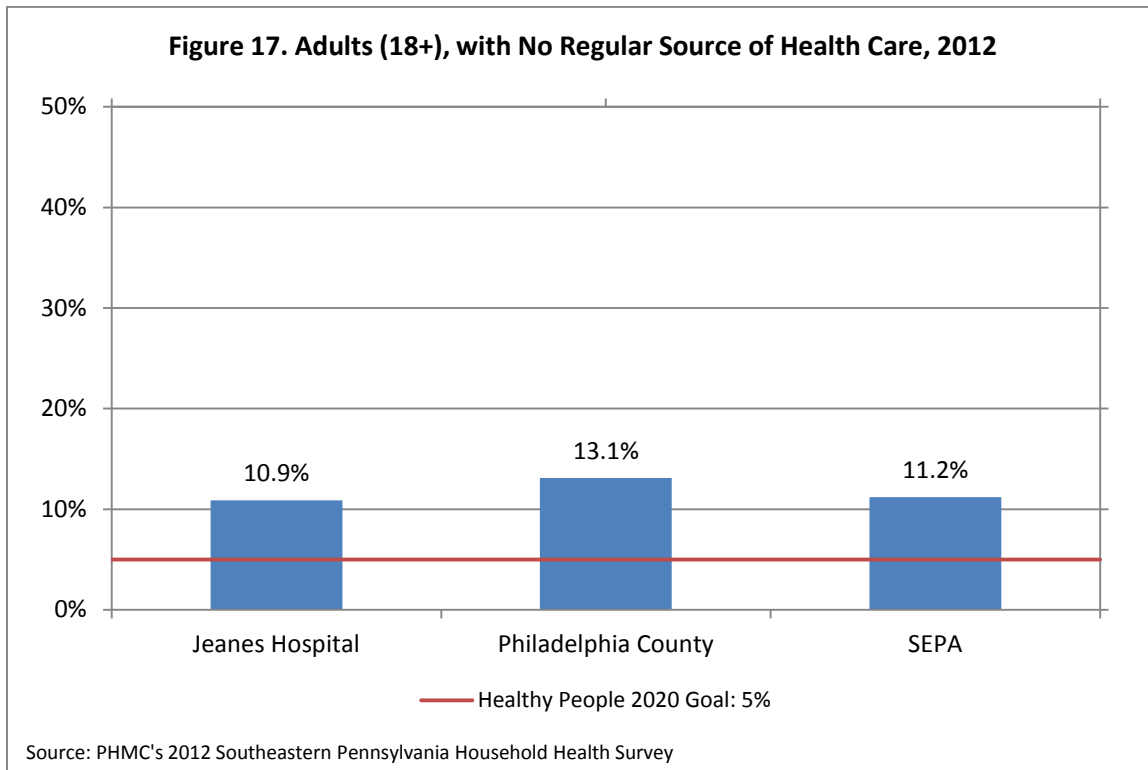

- According to community members, there are growing immigrant populations in the Jeanes Hospital service area, many of whom experience barriers to care. Specifically, community members indicated that the area's Brazilian and Chinese populations are growing.
- With increasing immigrant populations, many of whom are non-English speakers, community members reported the need for language services in addition to Language Line.
- Community members also expressed concern that many immigrant populations are afraid to go to the hospital, even when they need health care. They also described the need for health care providers who are culturally sensitive to the needs of Muslim and Indian women.

Source of Care

Having a regular source of care is important since people who have a regular source of care are more likely to seek care when they are sick compared with those who do not.

- **In the service area, 10.9% of adults do not have a regular source of care; this percentage represents approximately 37,000 adults (Figure 17).**
- **The percentage of adults in the service area with a regular source of care (89.1%) is higher than the Healthy People 2020 goal of 83.9%.**
 - Most children (95.9%) in the service area have a regular source of care. However, approximately 4,500 children in the service area do not have a regular source of care.

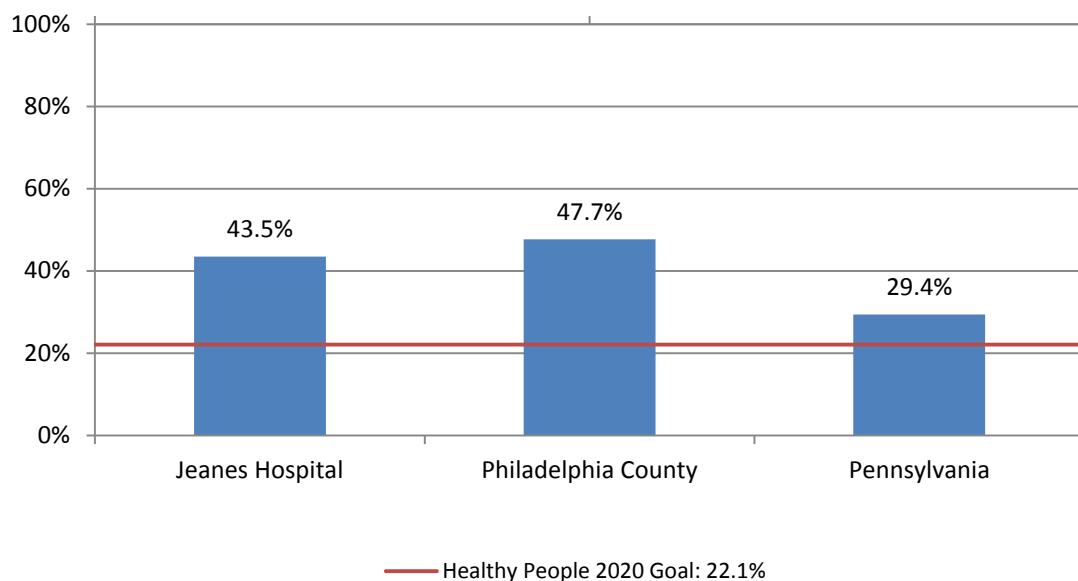

Pre-Natal Care

Receiving pre-natal care during the first trimester of pregnancy can help ensure that health concerns are identified and addressed in a timely manner.

- **Nearly six in 10 women in Jeanes Hospital's service area (56.5%) receive early pre-natal care, which is higher than the Philadelphia County average (52.3%) but far below the Pennsylvania average (70.6%) and has not met the Healthy People 2020 target goal of 77.9%.**
- **In fact, more than four in 10 women in the service area (43.5%) receive pre-natal care during the second or third trimester of pregnancy or no pre-natal care at all, representing an average of more than 2,300 women annually in the service area (Figure 18).**
- One-half of Black women (50.1%) in the service area receive late or no pre-natal care compared to approximately one-third of White women (34.7%). The racial and ethnic percentages of women in the service area receiving late or no pre-natal care are generally below the county averages.

Figure 18. Average Annualized Percentage of Women Receiving Late or No Pre-Natal Care, 2005-2008

Source: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

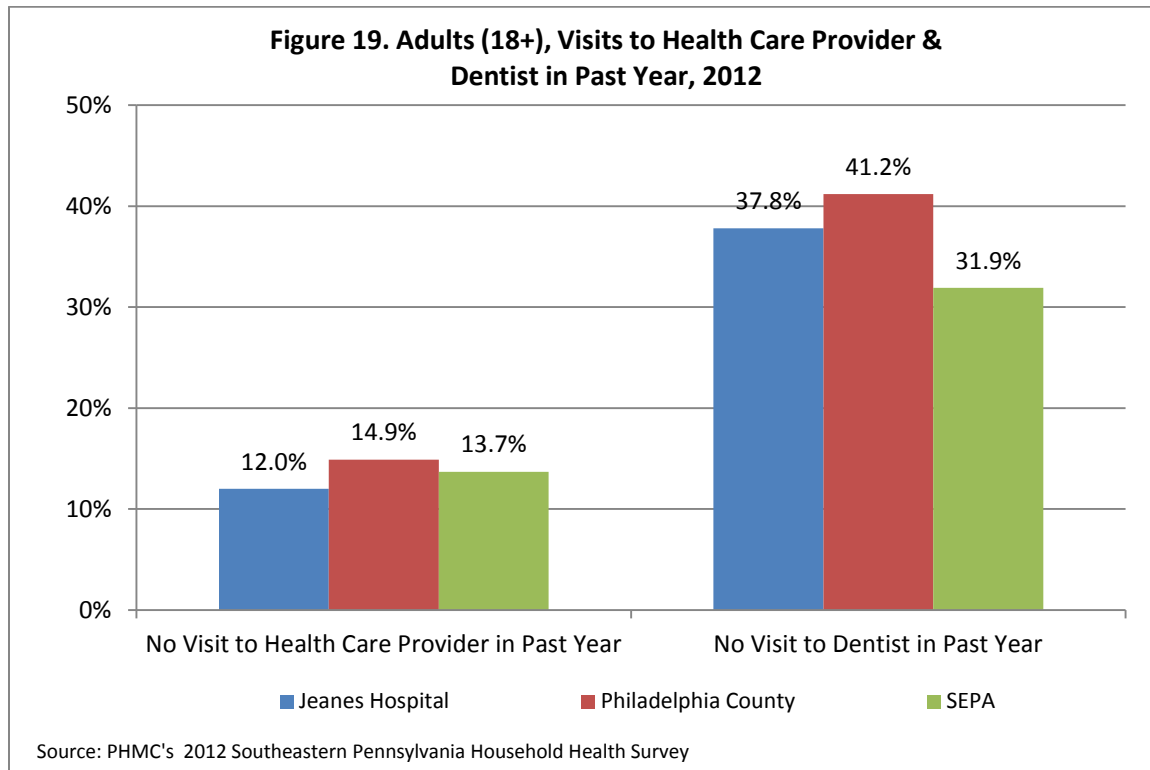

Utilization of Services

Regular health screenings can help identify health problems before they start. Early detection can improve chances for treatment and cure and help individuals to live longer, healthier lives. **In the service area, one in eight (12.1%) adults did not visit a health care provider in the past year; this percentage represents 39,400 adults.** (Figure 19)

Dental Visit

- **More than one in three (37.8%) adults in the service area did not visit a dentist in the past year; this percentage represents 128,300 adults. This percentage has increased slightly since 2010 (35.4%), but is lower than compared to adults in Philadelphia County (41.2%).** (Figure 19)
- The percentage of adults (37.8%) who did not visit a dentist in 2012 in the service area is higher than for adults statewide (29.0%).⁸

⁸ 2011 Behavioral Risks of Pennsylvania Adults, PA Department of Health.

- 15.4% of children in the service area did not visit a dentist in the past year. This percentage is comparable to that of Philadelphia County (15.1%), but is higher than for children in SEPA as a whole (9.3%).

Recommended Screenings

The following screenings have been recommended for preventative health for adults. As described below, many adults in the service area are not utilizing these services.

Blood Pressure

- **10.8% of adults in the service area did not have a blood pressure test in the past year; this percentage represents 36,200 adults.** The percentage of adults who did not have a blood pressure test in the past year in service area is comparable to adults in Philadelphia County (11.5%) and SEPA as a whole (10.4%).

Colonoscopy

Regular screenings beginning at age 50 are fundamental in preventing colorectal cancer.

- **One in five (20.4%) adults 50 years of age and older in the service area did not have a colonoscopy in the past ten years.** Statewide, 65% of adults ages 50 and over have had a colon cancer screening in the past ten years.⁹ The percentage of adults in the service area who did not have a colonoscopy in the past ten years is higher in 2012 compared to 2010 (20.4% versus 16.7%, respectively).

⁹ 2010 Behavioral Risks of Pennsylvania Adults, PA Department of Health.

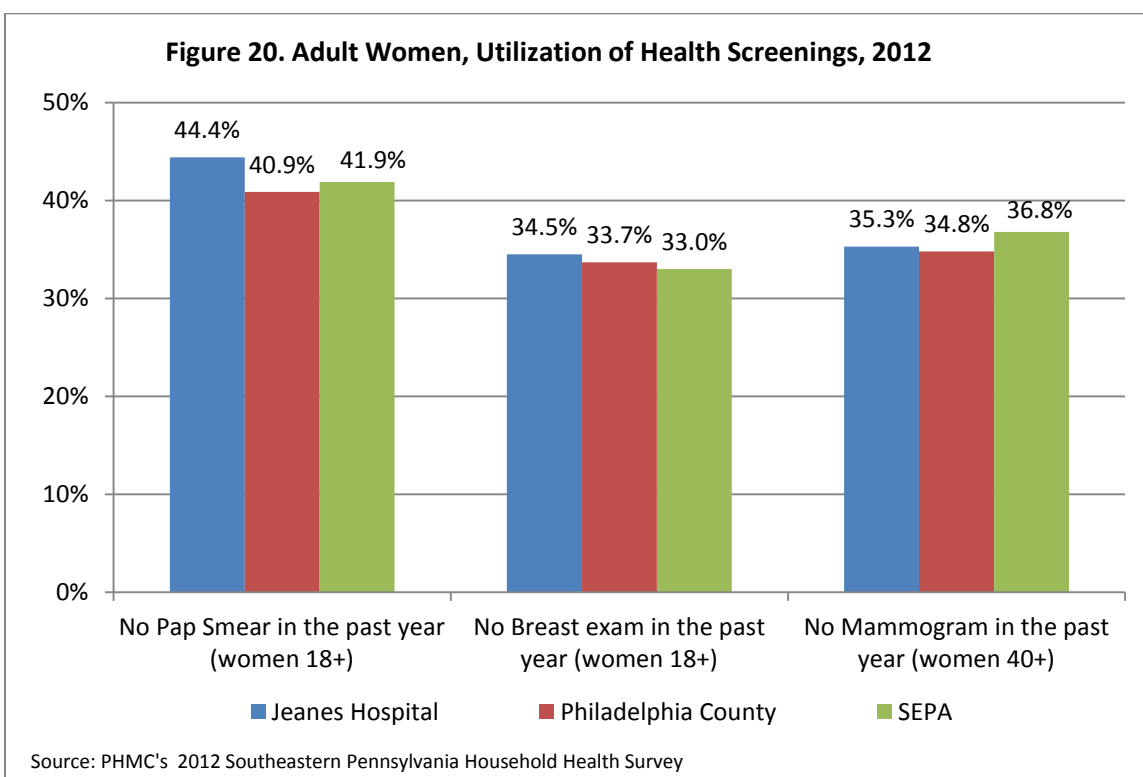

Pap Smear Test

- **More than four in ten (44.4%) women in the service area did not receive a Pap Smear test in the past year.** This percentage represents approximately 80,700 women. The percentage of women who have not received a Pap Smear test in the past year is higher in the service area compared to women in Philadelphia County (40.9%) SEPA as a whole (41.9%). (Figure 20)

Mammogram

The American Cancer Society recommends annual mammograms beginning at age 40 for women in good health.

- **More than one in three (35.5%) women age 40 or older in the service area is not receiving this screening annually. This is lower than the statewide percentage (42.0%)¹⁰ and for the region as a whole (36.8%).** (Figure 20)

Jeanes Hospital community members identified women's health issues as a high need service.

- Domestic violence is an issue in the community as is access to women's health services for both insured and uninsured women.
- In addition, preventive care is not thought to be started early enough.
- Community members also indicated that that gynecological care for sexually active teenagers is needed.

¹⁰ 2011 Behavioral Risks of Pennsylvania Adults, PA Department of Health.

PSA or Rectal Exams for Prostate Cancer

- **Nearly one-half (47.9%) of men ages 45 years and over in the service area did not have a screening for prostate cancer in the past year.** The percentage of men who have not have a prostate exam in the past year is higher in the service area is similar to SEPA as a whole (45.4%). Statewide, 53% of men age 50 and over did not have this test.

Health Behaviors

Nutrition

According to the USDA's MyPlate food guidelines, adults should eat four to five servings of fruits and vegetables daily.¹¹

- In the service area, **eight in ten (79.6%) adults do not reach this recommended goal.** Nationally, less than three-quarters of adults (74%) eat three or more servings of fruits and vegetables daily.¹²
- Fast foods are high in unhealthy calories, saturated fats, sugar, and salt. **One in six (16.8%) adults in the service area eats fast food two or more times a week.**

Exercise

The U.S. Department of Health and Human Services' 2008 Physical Activity Guidelines for Americans recommends that adults (ages 18-64) get two and a half hours of moderate aerobic physical activity each week.¹³

- **One in seven (13.5%) of adults in the service area does not participate in any exercise.** One-half (51.6%) of adults exercise three or more days a week as recommended.
- The Healthy People 2020 goal is to reduce the percentage of adults who participate in no leisure time physical activity to 32.6%.

Tobacco Use

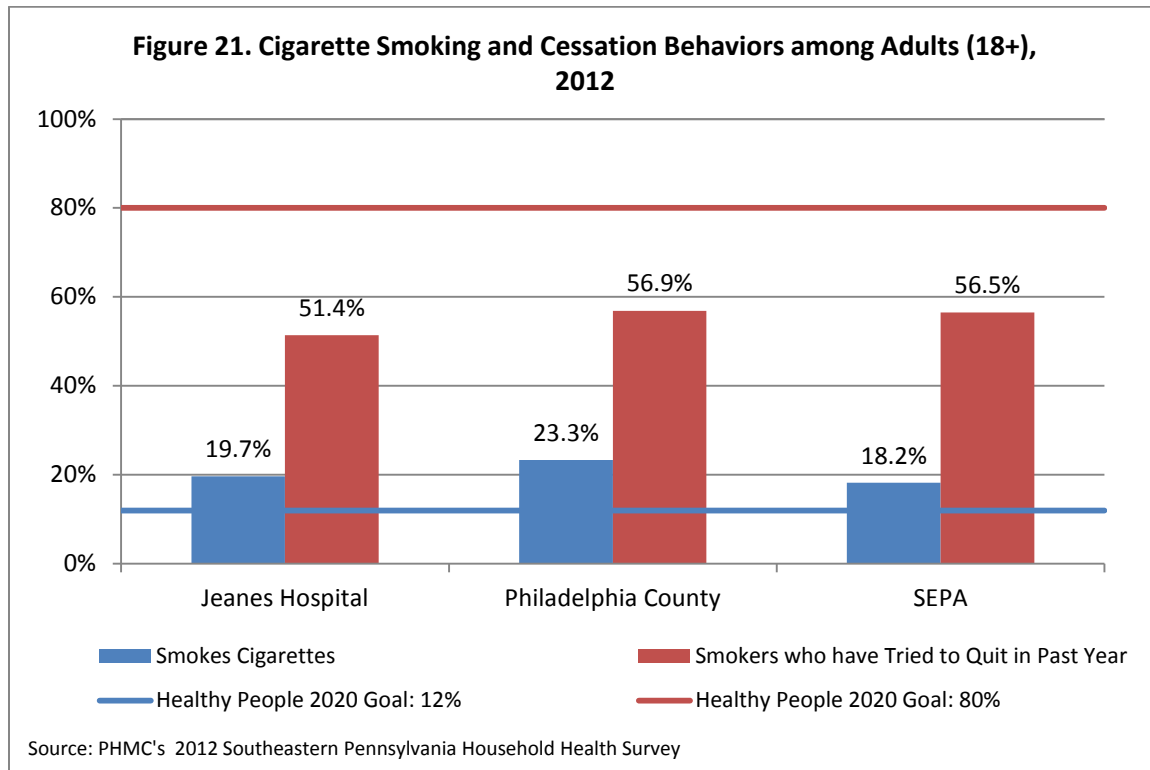

- **One in five (19.7%) adults in service area currently smokes; this percentage is comparable to the smoking rate of SEPA as a whole (18.2%), but lower than the statewide rate (22.4%).** (Figure 21)
- The percentage of adults who smoke in the service area does not meet the Healthy People 2020 goal of 12%.¹⁴
- **One-half (51.4%) of adults who smoke in the service area tried to quit in the past year.**
- The percentage of adults in the service area who smoke has decreased since 2010; in 2010 23.8% of adults smoked cigarettes.

¹³ U.S. Department of Health and Human Services. 2008 Physical Activity Guidelines for Americans, 2008.

¹⁴ 2011 Behavioral Risks of Pennsylvania Adults, PA Department of Health.

Alcohol Consumption

According to the Centers for Disease Control and Prevention (CDC), binge drinking is a common pattern of excessive alcohol use in the U.S. and is defined as five or more drinks on one occasion.¹⁵

- **One in three (31.2%) service area adults participated in binge drinking on one or more occasions in the past month.** The binge drinking percentage is higher than the statewide percentage of 18.3%.¹⁶

Social Capital and Neighborhood

Neighborhood factors have important roles in the overall health and well-being of residents. Social capital is one measure used to understand an individual's neighborhood and role in that neighborhood.

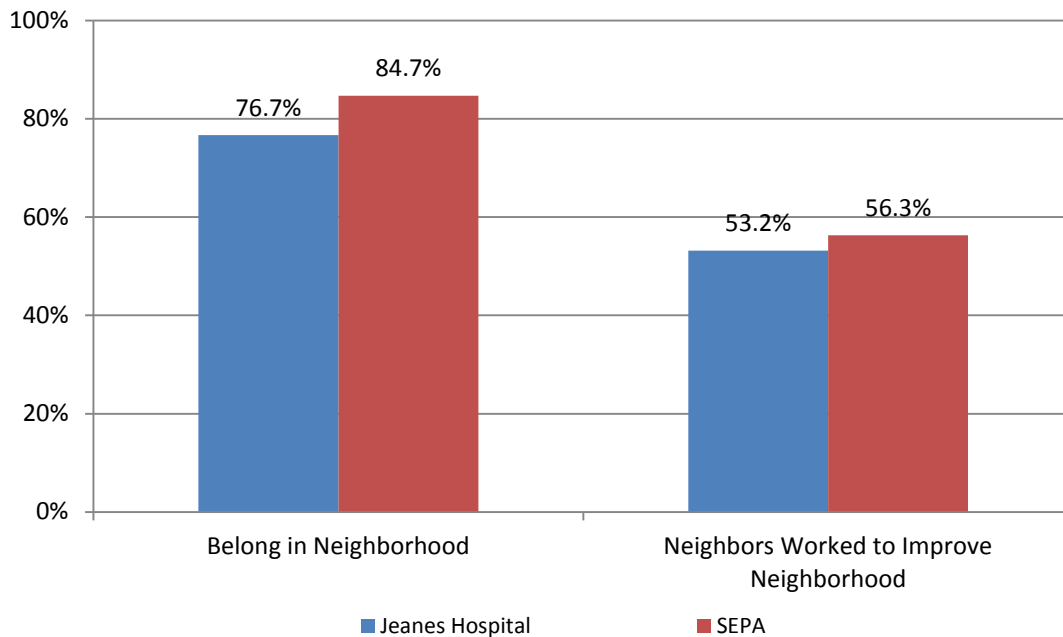

- **The majority (83.9%) of adults in service area feel like they belong in their neighborhood, and more than one-half (59.0%) have worked on a community project to improve the area.** (Figure 22)

¹⁵ U.S. Centers for Disease Control and Prevention. Fact Sheets – Binge Drinking – Alcohol (2010).

¹⁶ 2011 Behavioral Risks of Pennsylvania Adults, PA Department of Health.

Figure 22. Adults (18-64), Social Capital, 2012

Source: PHMC's 2012 Southeastern Pennsylvania Household Health Survey

Best Methods for Sharing Health Information

Community members indicated that materials should be available at the places where people already visit. **These places include: minute clinics, grocery and ethnic food stores, shopping centers, churches, soup kitchens and food banks, community centers, police stations, and other places where there are activities and free food.** Traditional outlets, such as newspapers, radio, newsletters of local organizations, and television, were also mentioned as good methods. Translating information into different languages for language-specific sources was also recommended.

HEALTH NEEDS OF SPECIAL POPULATIONS

One of the goals of this needs assessment is to identify the health needs of special populations across the service area. The following section focuses on the selected health status and access to care needs of special populations in the service area.

Health Status

- Within the service area more than one in three (35.5%) poor adults living below 150% of the Federal Poverty Level are in fair or poor health compared to 16.2% of non-poor adults. More than one in four Latino (26.5%) adults is in fair or poor health, followed by 22.5% of Black adults and 20.9% of White adults.

- Poor adults (34.6%) in the service area are nearly equally as likely to have high blood pressure compared to non-poor (31.5%) adults. In the service area, Black (35.5%) and White (35.2%) and equally as likely to have high blood pressure. 25.3% of Latino adults have high blood pressure.
- Poor adults are more likely to have been diagnosed with a mental health condition compared to the non-poor; nearly one-quarter (24%) of poor adults have been diagnosed with a mental health condition compared to 12.8% non-poor adults. Approximately one in five Latino (19.2%), 16.2% White and 14.1% Black adults in the service area have been diagnosed with a mental health problem.
- One in three poor adults (30.4%) smoke cigarettes. Poor adults are more likely to smoke cigarettes compared to non-poor adults (19%).

Insurance Status

- Nearly one in three (31.2%) poor adults in the service area is uninsured compared to 11% of non-poor adults. Latino adults (24.8%) are more likely to be uninsured than are Black (21.5%) and White (9.2%) adults.

Community members indicated that problems accessing health care strongly impact the uninsured and underinsured community. These individuals may be both legal and illegal residents and are not considered the “working poor.” Non-English speakers also experience issues related to access.

In addition, community members indicated that women in the Northeast/Upper-Northeast experience issues with accessing obstetrics and pre-natal/natal care. Community members expressed a need for community-based prenatal care. In addition, community members reported that uninsured children have trouble getting necessary services and said that the process for enrolling in CHIP can be very challenging.

Geographic Areas with High Need

Community members reported that the neighborhoods where immigrants have settled are in high need. Other needy areas include Lawndale/Lawncrest, Castor Garden, and Oxford Circle.

EXAMINATION OF SPECIAL DATA FOR JEANES HOSPITAL ACUTE AND JEANES HOSPITAL ACUTE REHAB UNIT

The following is a brief examination of Jeanes Hospital inpatient data from January–December 2011. These data are for Jeanes Hospital Acute and its Acute Rehabilitation Unit. The data were provided by Jeanes Hospital staff for the purpose of providing additional information to assess unmet need for this community health needs assessment. Tables for these data are located in Appendix F.

- According to inpatient data, the hospital had 9,583 inpatient admissions including rehab and 7,568 inpatient admissions from the emergency department from January–December 2011.
- More inpatients were female versus male (5,012 versus 3,732, respectively). The majority of patients were White (6,200) followed by Black (1,249) patients.

- Jeanes Hospital Acute had a lower average inpatient age; the average age for inpatient admissions for Jeanes Hospital Acute was 64.6 versus 71.6 for Jeanes Hospital Rehab.
- The top five diagnostic conditions indicated for inpatient admission at Jeanes Hospital Acute were: Esophagitis, Gastroenterology and general digestive disorders (530), heart failure and shock (326), chest pain (307), Chronic Obstructive Pulmonary Disease (262), and major joint replacement or reattachment of lower extremity (224).
- During the time period these data were collected, the mortality rate was 2.0% for Jeanes Hospital Acute and 0% for Jeanes Hospital Rehab. All rates were within their expected norms.
- Complication rates represent events that occurred in the hospital. They are deemed to have not been present at the time of admission. The percentage of complication rates for Jeanes Hospital Acute and Jeanes Hospital Rehab was 7.6 % and 19.7 % respectively. Both programs performed as expected.
- The average length of stay was 4.8 days at Jeanes Hospital Acute. Jeanes Hospital Rehab was 13.3 days.
- Most (5,056) patients at Jeanes Hospital Acute were discharged to their homes or self care. This is followed by discharged to home under the care of an organized home health service (1,320), transferred to a rehab facility (937), or a skilled nursing facility (658). At Jeanes Hospital Rehab, more patients were discharged to their homes under the care of an organized home health service (124) compared to their homes or self care (20) or some other place.

IV. UNMET COMMUNITY HEALTH NEEDS

UNMET NEEDS AND IDENTIFICATION PROCESS

The unmet health care needs for this service area were identified and prioritized by comparing the health status, access to care, health behaviors, and utilization of services for residents of the service area to results for the county and state and the Healthy People 2020 goals for the nation. In addition, for Household Health Survey measures, tests of significance were conducted to identify and prioritize unmet needs. Lastly, input from the community meeting participants was also used to further identify and prioritize unmet needs, local problems with access to care, and populations with special health care needs.

- In the Jeanes Hospital service area, while the majority (78.4%) of adults rates their health as excellent, very good or good a sizable percentage (21.6%) of adults is in fair or poor health. This percentage is higher than the statewide average¹⁷ (16.8%), and the percentage in fair or poor health for the SEPA region as a whole (16.1%).
- Heart disease is the leading cause of death in the service area. One-third (35.5%) of adults have been diagnosed with high blood pressure and one in six (15.7%) adults in the service area has been diagnosed with diabetes. One-third (31.8%) of adults in the service area is obese and one-third (33.9%) of adults are overweight; 26.0% of children in the service area are obese and 15.4% are overweight.
- One in five adults aged 18-64 in the service area are uninsured, representing 53,000 uninsured adults. Approximately 54,000 adults in the service area are unable to get needed care due to the cost of that care and 15.9% of adults reported that there was a time in the past year when they needed healthcare, but did not receive it due to the cost. One in four (27.1%) adults in the service area in 2010 did not get dental care due to the cost of the visit.

For many SEPA Household Health Survey indicators, the findings for the service area were **statistically significantly worse ($p < .01$)** than the remainder of SEPA. These indicators could be prioritized for improvement. These areas are:

- Percentage of uninsured adults and adults without prescription drug coverage;
- Overweight or obese adults and children;
- Adults and older adults in fair or poor health and with asthma, diabetes or high blood pressure; and
- Dental visits among adults and children.

Preliminary analysis of the quantitative and qualitative data collected shows that the unmet health care needs of the residents of this service area include the following priority needs:

¹⁷ 2011 Behavioral Risks of Pennsylvania Adults, PA Department of Health.

- Access to primary and preventive care for adults and children, particularly those individuals living in poverty and those who are uninsured or underinsured; and
- Access to dental care, prescription coverage for adults and children, and behavioral and mental health services for women and older adults.

Priority unmet needs in this area also include increased educational programs to address:

- Cultural and language barriers particularly among non-English speakers, including Asians and Latinos;
- Navigating the complex health care system, particularly for older adults;
- Chronic disease management including heart disease, mental health, and cancer management for all residents;
- Overweight and obese prevention, interventions, and programs for children and adults; and
- Increased access to OB/GYN services.

Many of these unmet needs are already being addressed in the service area by the hospital, other health care providers, government, and local non-profits. In addition, many of these unmet needs are not within the hospital's mission. This list should be used to assist the hospital in addressing these needs in their needs assessment implementation plan.

APPENDIX A: COMMUNITY MEETING ATTENDEES

Jeanes Hospital Community Meeting

Community Health Needs Assessment

July 23, 2012

List of Participants (8)

Name	Agency	Title	Email	Phone No.	Area of expertise
Daniel Kaye	Katie's Foundation for Child Safety	Board Member	Daniel.sear-kaye@comcast.net	215-704-8270	Special knowledge or expertise in public health; Nonprofit organization focused on child safety

APPENDIX C: VITAL STATISTICS TABLES

**Table 1: Average Annualized Birth Rates for Women 15-44 Years
by Race and Ethnicity, 2005-2008**

	Service Area	Philadelphia County	Pennsylvania
	Rate (Number)	Rate (Number)	Rate (Number)
Total	78.6 (6,523)	71.1 (22,759)	58.7 (144,233)
White	53.0 (2,483)	48.9 (6,093)	52.6 (105,608)
Black	97.0 (1,943)	74.9 (11,121)	74.6 (21,237)
Asian	91.6 (567)	72.0 (1,415)	78.8 (5,298)
Other	112.9 (1,120)	110.8 (3,028)	92.6 (8,810)
Latina	118.3 (1,422)	114.0 (3,761)	110.0 (13,040)
Non-Latina	69.7 (4,947)	63.6 (18,255)	55.4 (129,559)

Notes:

The birth rate is calculated per 1,000 women 15-44 years of age.

White, Black, Asian and Other races include Latinas.

Source: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

**Table 2: Average Annualized Birth Rates for Adolescent Women 10-17 Years
by Race and Ethnicity, 2005-2008**

	Service Area	Philadelphia County	Pennsylvania
	Rate (Number)	Rate (Number)	Rate (Number)
Total	13.1 (301)	17.1 (1,361)	6.9 (4,427)
White	4.9 (60)	5.2 (128)	3.7 (1,900)
Black	23.3 (141)	20.5 (891)	19.8 (1,653)
Asian	ND	6.3 (23)	3.0 (42)
Other	22.3 (67)	28.7 (237)	19.0 (604)
Latina	26.9 (100)	31.5 (319)	25.5 (935)
Non-Latina	10.1 (193)	14.2 (990)	5.6 (3,400)

Notes:

The birth rate is calculated per 1,000 women 10-17 years of age.

White, Black, Asian and Other races include Latinas.

ND=Not Displayed. Rates are not calculated and displayed when the count is less than 10.

Source: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

Table 3: Average Annualized Percentage of Infants Born at Low Birth Weight by Race and Ethnicity, 2005-2008

	Service Area	Philadelphia County	Pennsylvania
	Percent (Number)	Percent (Number)	Percent (Number)
Total	9.8 (640)	11.3 (2,595)	8.3 (12,022)
White	7.3 (183)	7.7 (469)	7.1 (7,552)
Black	13.4 (263)	14.2 (1,594)	13.6 (2,918)
Asian	7.6 (44)	7.7 (109)	8.0 (424)
Other	10.1 (114)	10.1 (307)	9.0 (795)
Latino/a	9.2 (131)	9.5 (361)	8.7 (1,142)
Non-Latino/a	9.9 (492)	11.6 (2,126)	8.2 (10,648)

Notes:

Low birth weight is defined as an infant weighing less than 2500 grams (5.5 lbs.) at birth.

White, Black, Asian and Other races include Latino/as.

Source: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

**Table 4: Average Annualized Infant Mortality Rate
by Race and Ethnicity, 2005-2008**

	Service Area	Philadelphia County	Pennsylvania
	Rate (Number)	Rate (Number)	Rate (Number)
Total	8.2 (54)	12.2 (279)	7.5 (1,090)
White	8.9 (22)	11.6 (71)	6.4 (681)
Black	12.8 (25)	16.1 (181)	16.2 (348)
Asian	ND	ND	4.3 (23)
Other	ND	ND	ND
Latino/a	ND	8.9 (34)	7.0 (92)
Non-Latino/a	9.0 (45)	13.0 (238)	7.6 (985)

Notes:

Infant mortality is defined as the death of an infant within the first year of birth and is calculated per 1,000 live infant births.

White, Black, Asian and Other races include Latino/as.

ND=Not Displayed. Rates are not calculated and displayed when the count is less than 10.

Source: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

Table 5: Average Annualized Mortality Rates, 2005-2008

	Service Area	Philadelphia County	Pennsylvania
	Rate (Number)	Rate (Number)	Rate (Number)
All Causes	779.7 (4,048)	931.2 (14,960)	785.2 (124,136)

APPENDIX D: HOUSEHOLD HEALTH SURVEY TABLES

Table 1. Health Status

		Service Area		Philadelphia County		SEPA	
		2010	2012	2010	2012	2010	2012
		N	N	N	N	N	N
		(%)	(%)	(%)	(%)	(%)	(%)
Health Status	Excellent/Very Good/Good	261,700 (78.8)	266,200 (78.4)	911,900 (22.8)	923,800 (77.1)	2,577,100 (83.8)	2,623,800 (83.9)
	Fair/Poor	70,300 (21.2)	73,200 (21.6)	268,600 (22.8)	274,800 (22.9)	498,200 (16.2)	501,900 (16.1)
Mental Health	Diagnosed with mental health condition	44,600 (13.5)	62,000 (18.3)	183,200 (15.6)	238,100 (19.9)	448,900 (14.6)	513,200 (16.4)
	Receiving treatment for mental health condition	27,600 (61.9)	42,000 (67.7)	112,200 (61.3)	146,100 (61.3)	276,200 (61.7)	316,100 (61.8)
	High level of stress	114,000 (34.9)	N/A	445,000 (38.4)	N/A	1,141,200 (37.6)	N/A
	Currently in recovery	27,400 (8.3)	27,800 (8.3)	134,000 (11.4)	138,500 (11.7)	275,900 (9.0)	256,600 (8.3)
Body Mass Index	Overweight	119,100 (36.7)	113,900 (33.9)	393,700 (34.2)	390,100 (33.3)	1,075,100 (35.7)	1,074,300 (35.1)
	Obese	97,800 (30.2)	106,700 (31.8)	369,300 (32.1)	374,200 (31.9)	791,300 (26.3)	844,100 (27.6)
Chronic Health Conditions	Ever diagnosed with cancer	N/A	28,500 (8.4)	N/A	88,500 (7.4)	N/A	273,700 (8.7)
	Ever diagnosed with asthma	50,000 (15.0)	57,700 (17.1)	194,200 (16.5)	232,600 (19.4)	460,000 (15.0)	501,600 (16.0)
	Ever diagnosed with diabetes	39,700 (12.0)	53,200 (15.7)	157,500 (13.4)	191,400 (16.0)	334,000 (10.9)	388,800 (12.4)
	Ever diagnosed with high blood pressure	96,200 (29.2)	120,300 (35.5)	422,900 (36.0)	448,300 (37.5)	969,400 (31.6)	968,800 (31.0)

Notes: N/A equals not asked

High level of stress is defined as seven or higher on a 10 point scale.

Overweight is defined as having a BMI of 25-29 and obese is defined as having a BMI of 30 or greater.
